MyDancr

Club Manager Operations Manual

A simple guide to the current club dashboard. Find a task below, then follow the three numbered arrows and matching steps.

Updated 29 October 2026

Illustrations show selected controls with sample information. They are not screenshots. Owners, managers and staff see different options.

Open the table page	**13**	Help and shift handover	**26**
Handle table requests	**14**		

Find your way around

mydancr.com/dashboard/venue

Use your own club login. These four tabs run the club dashboard.

SIMPLIFIED VIEW • Follow the numbered arrows

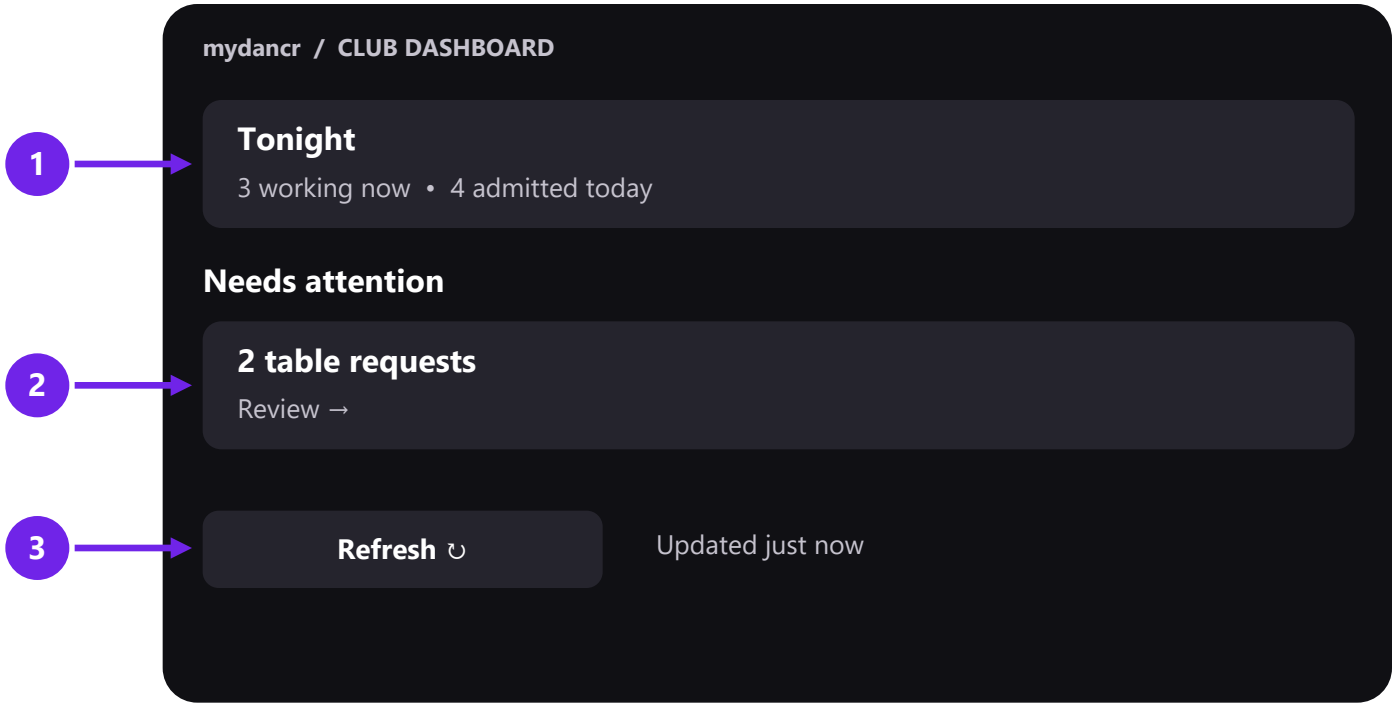

1. **Tonight**
   Guest list, rides and VIP visits.
2. **Dancers & tables**
   Roster, table requests and media approval.
3. **Results and Club**
   Results shows activity. Club holds settings, deals, marketing and tools.

Remember Some controls appear only for owners or managers. If a section is missing, check your role with the club owner.

Start your shift

Tonight

Start here to see what needs your attention.

SIMPLIFIED VIEW • Follow the numbered arrows

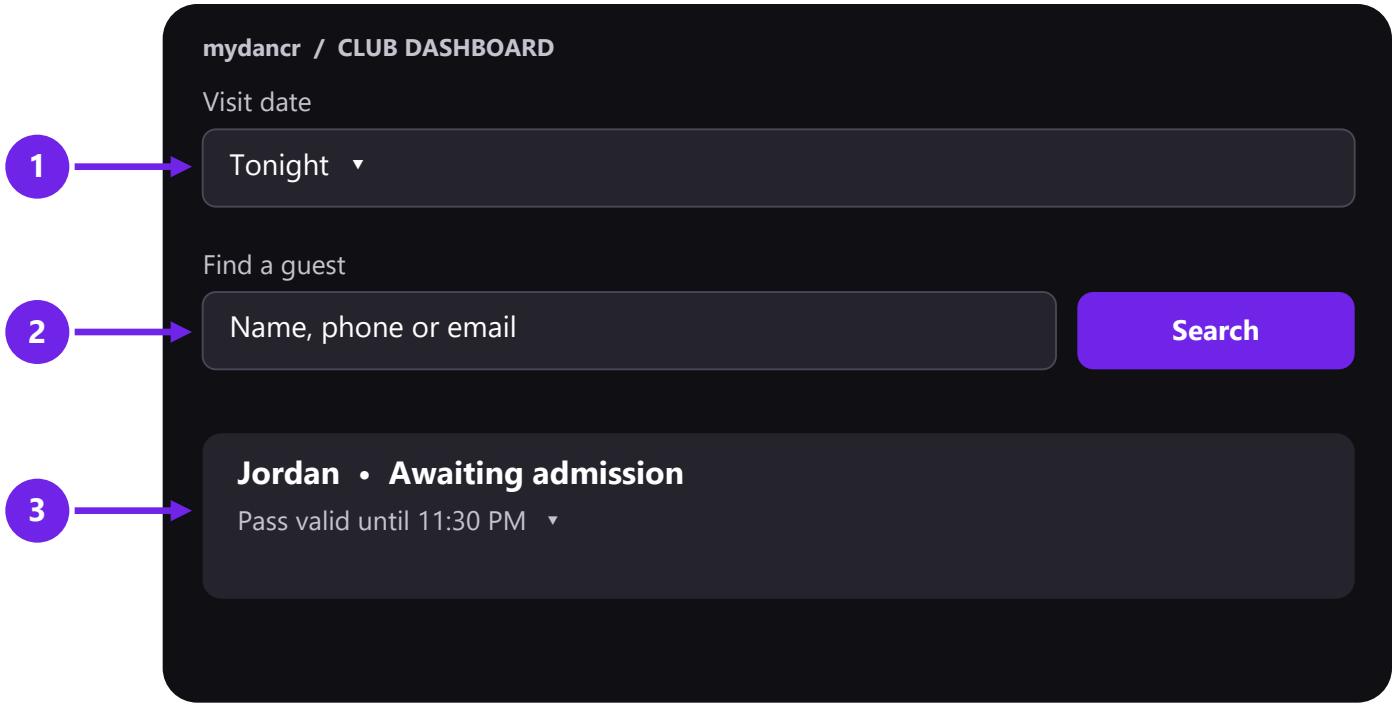

1. **Check Working now**
   Open the count to see the dancers currently checked in.
2. **Open Needs attention**
   Tap Review beside a guest, table, VIP or ride queue.
3. **Refresh when needed**
   Use the refresh arrow to load the latest information.

Remember Working now counts MyDancr check-ins. Other dancers may also be working at the club.

Find a guest

Tonight > Guest list

Look up a guest and check their pass status.

SIMPLIFIED VIEW • Follow the numbered arrows

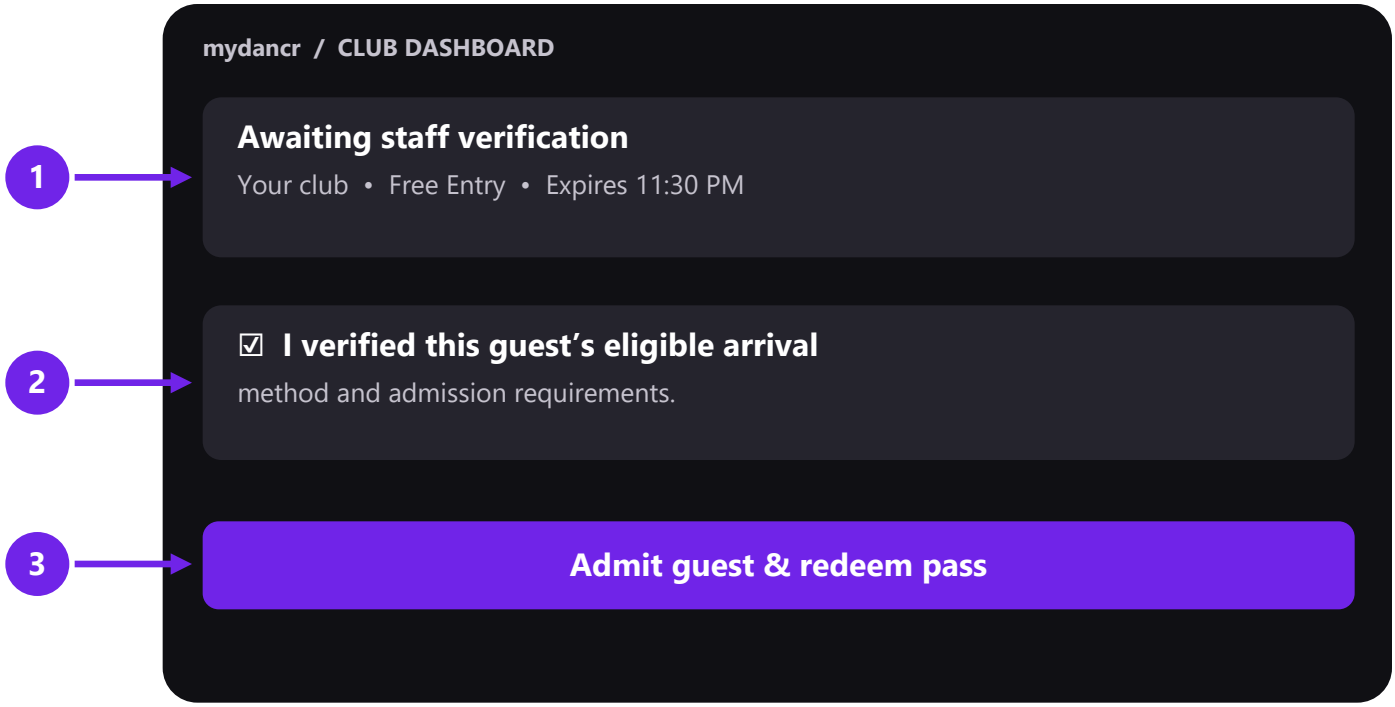

1. **Choose the visit date**
   Use Tonight, Choose a date or All active passes.
2. **Search for the guest**
   Enter a name, phone number or email, then tap Search.
3. **Open the guest row**
   Check Awaiting admission, Admitted or Expired and the pass expiry time.

Remember Use the status filters to narrow the list. Guest list is a lookup screen; scan the guest's pass to record admission. See page 5.

Admit a guest at the door

Scan the QR code on the guest's admission pass

A pass is used only after authorized club staff confirm it.

SIMPLIFIED VIEW • Follow the numbered arrows

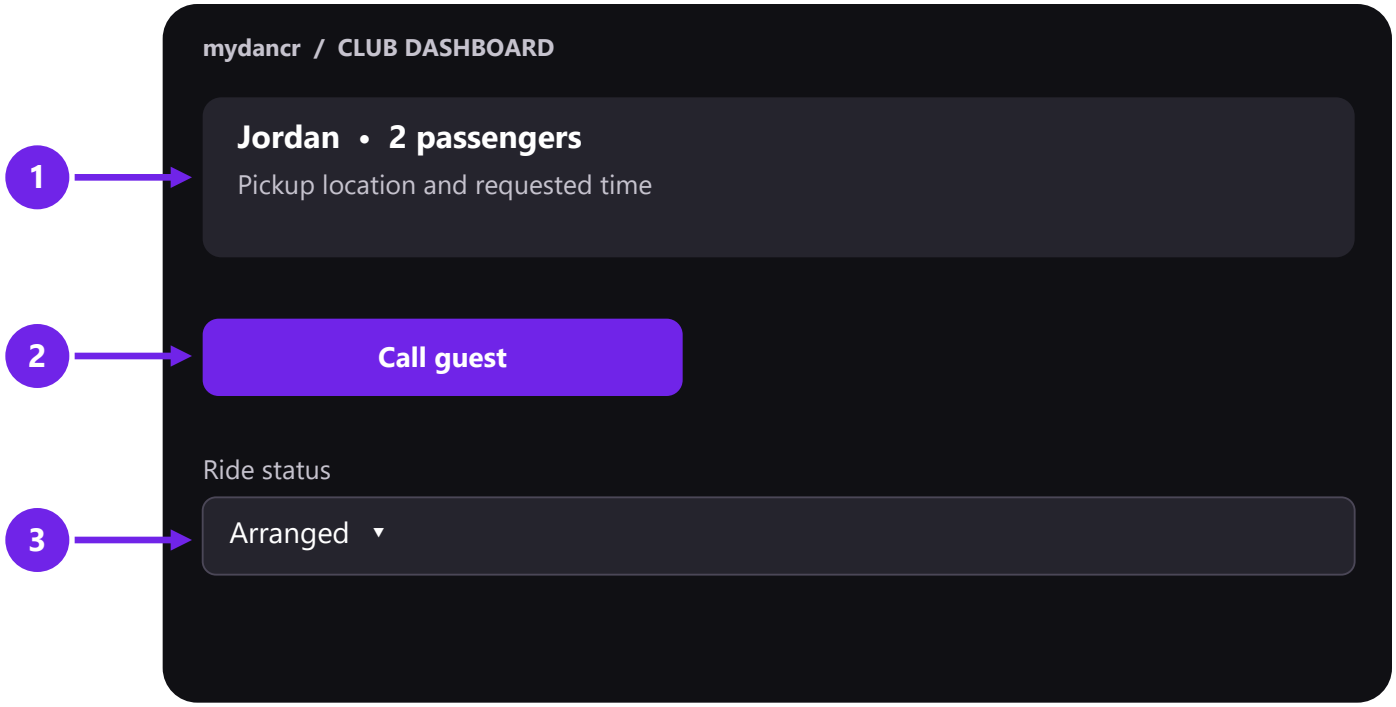

1. **Scan and check the pass**
   Ask the guest to open Show admission pass. Scan its QR code and check the club, offer and expiry.
2. **Verify eligibility**
   Sign in as club staff if prompted. Check the arrival method and entry requirements, then tick the verification box.
3. **Confirm admission**
   Tap Admit guest & redeem pass. Wait for Admission confirmed.

Remember Each pass admits one guest. Already used or expired passes cannot be used again. Opening a pass alone does not record admission.

Handle a ride request

Tonight > Ride requests

Contact the guest and keep the ride status up to date.

SIMPLIFIED VIEW • Follow the numbered arrows

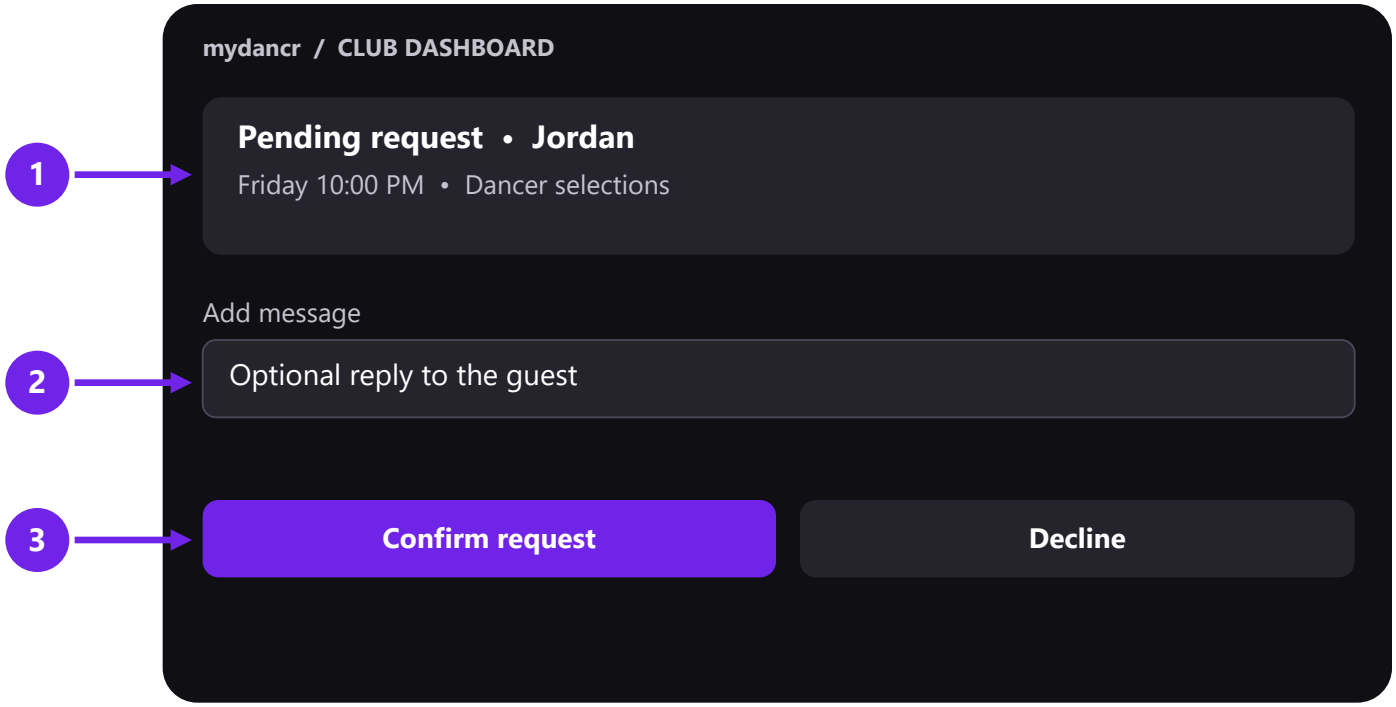

1. **Open the request**
   Check the pickup location, passengers, requested time and notes.
2. **Call the guest**
   Tap Call guest to arrange the pickup with your team.
3. **Update Ride status**
   Choose Received, Contacted, Arranged, Completed or Cancelled as the ride progresses.

Remember Open requests shows recent work. Use All requests and Load older requests for history. Rides are available to owners and managers when enabled or when requests exist.

Review a VIP visit

Tonight > VIP requests > Requests

Review each visit request, even when the guest already has VIP access.

SIMPLIFIED VIEW • Follow the numbered arrows

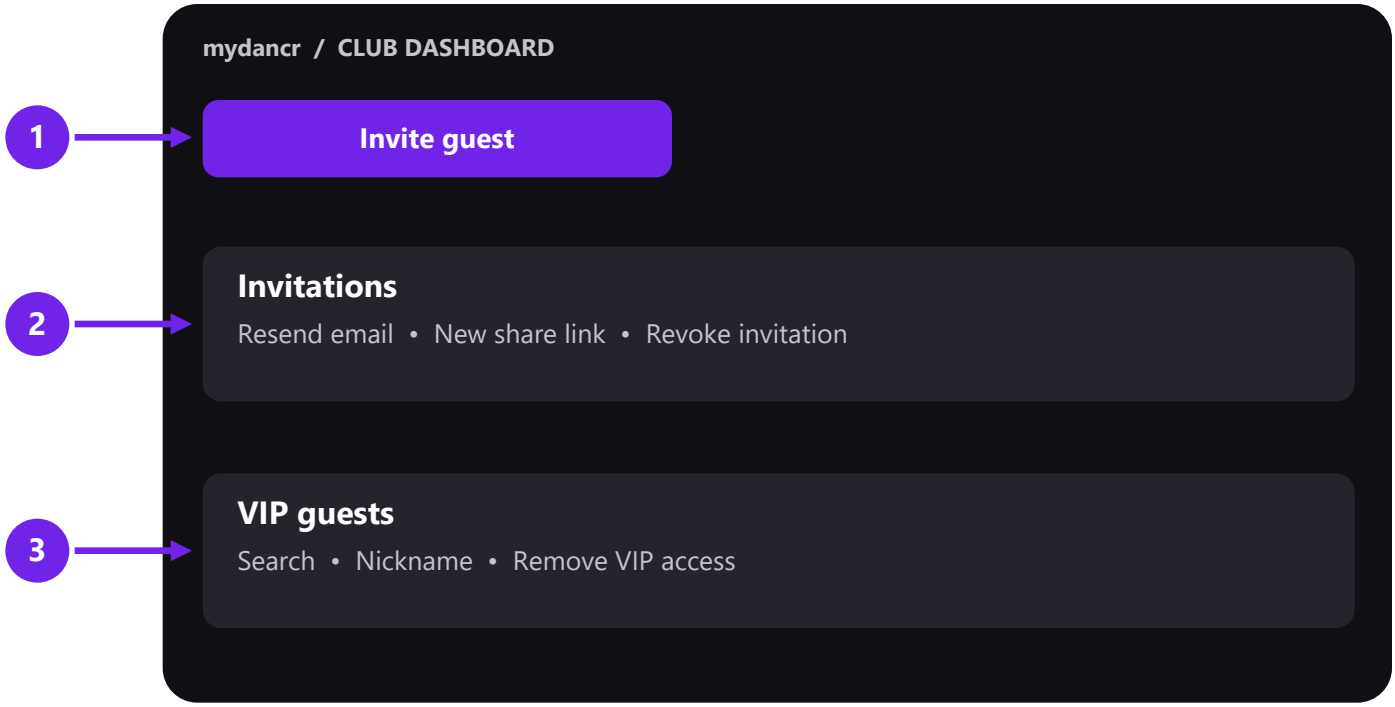

1. **Open a pending request**
   Check the visit date, time, selected dancers and guest notes.
2. **Add a reply if useful**
   Use Add message to explain arrangements or needed changes.
3. **Confirm or decline**
   Choose Confirm request or Decline. All statuses shows earlier requests.

Remember A confirmed visit can be cancelled with Cancel confirmed request. A request or confirmation does not prove the guest arrived.

Invite and manage VIP guests

Tonight > VIP requests

Invite a guest by email, then manage their access here.

SIMPLIFIED VIEW • Follow the numbered arrows

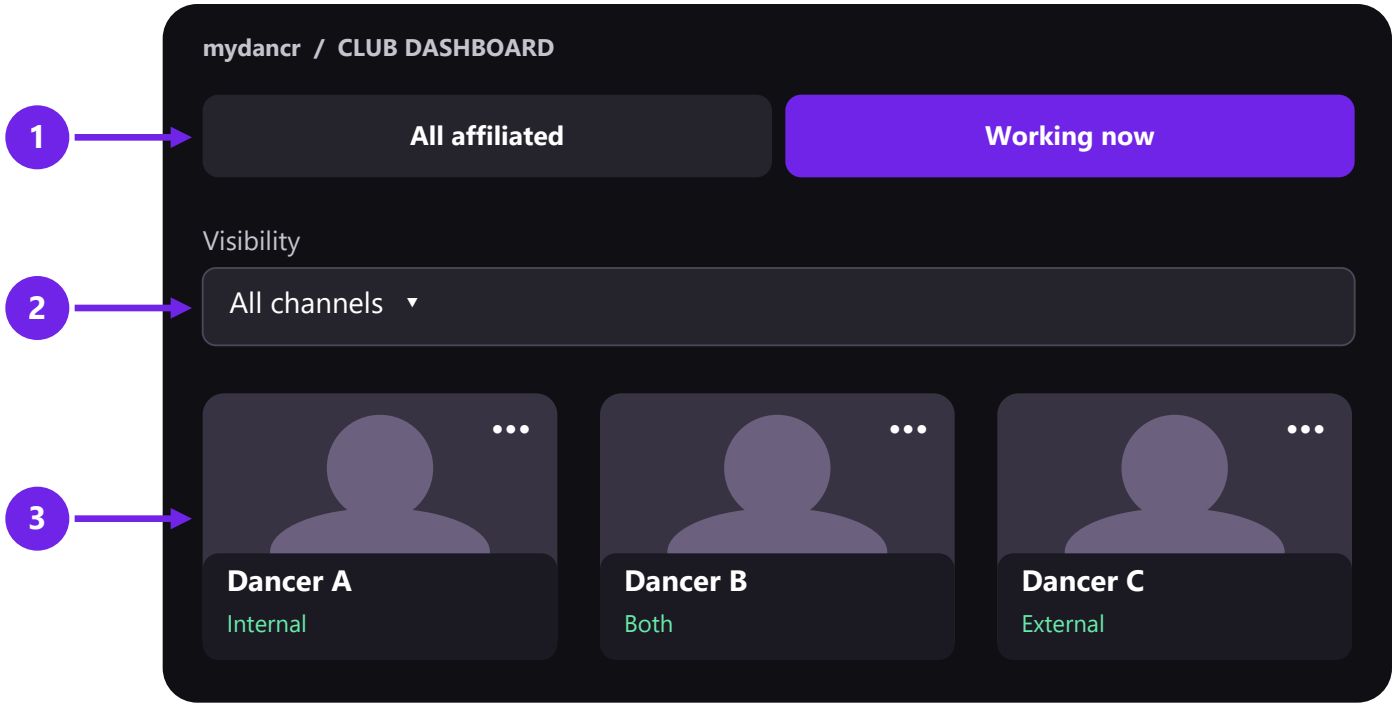

1. **Tap Invite guest**
   Enter the guest's email and an optional private nickname, then Send invitation.
2. **Manage Invitations**
   Copy or share the private link. Resend email, create a New share link, or Revoke invitation if needed.
3. **Manage VIP guests**
   Search activated guests. Open the three-dot menu to edit a nickname or Remove VIP access.

Remember The invitation is for that email only. A new link replaces the old one. Removing VIP access keeps existing visit requests available for review.

Check the dancer roster

Dancers & tables > Roster

Find a dancer and see where their current check-in is visible.

SIMPLIFIED VIEW • Follow the numbered arrows

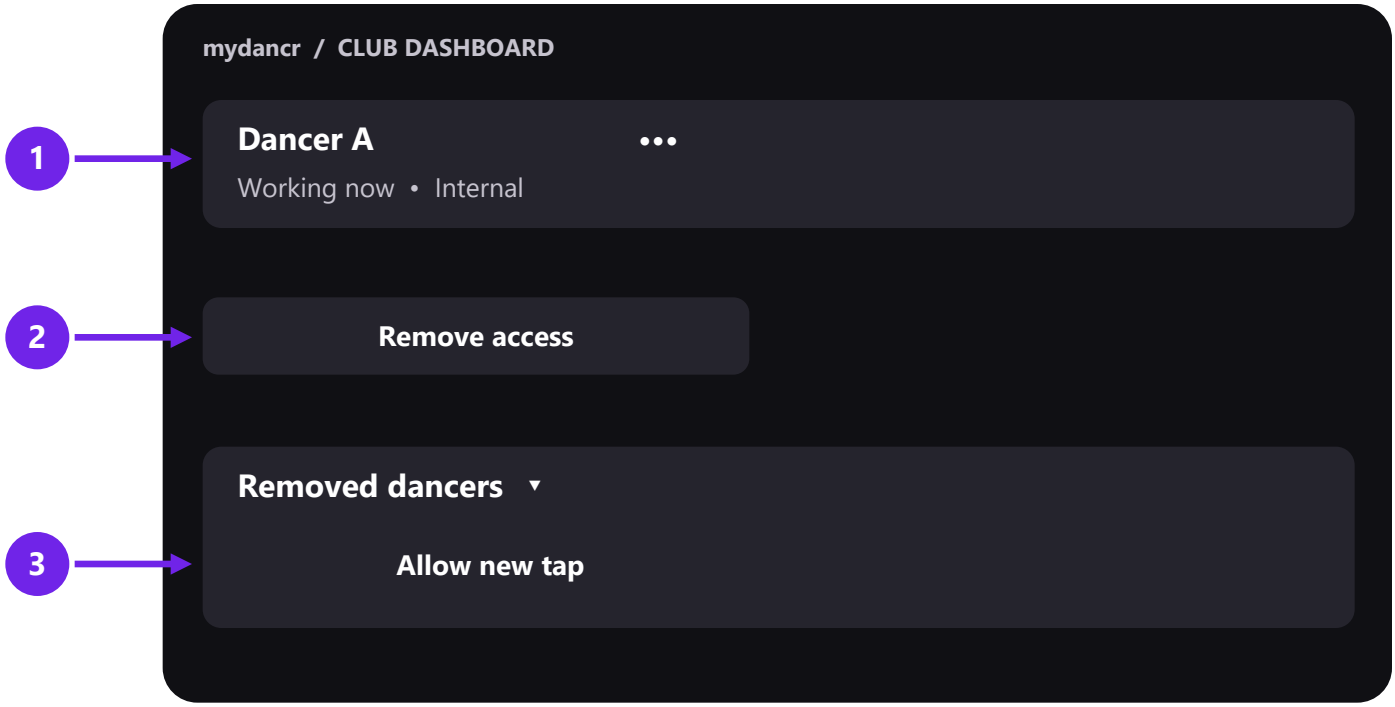

1. **Choose the roster view**
   Use All affiliated or Working now. Search a stage name or change the name sort.
2. **Filter the channel**
   All channels shows everyone in this view. Internal and External narrow it by visibility.
3. **Open a dancer**
   Tap the photo for the profile. The three-dot menu shows check-in details.

Remember Internal includes table guests and invited VIP guests. External is public. Both uses both channels. Dancers choose visibility when they tap in.

Manage dancer access

Dancers & tables > Roster

Use these controls when a dancer leaves the club or is allowed to return.

SIMPLIFIED VIEW • Follow the numbered arrows

1. **Open the dancer's menu**
   Tap the three dots on their roster card.

2. **Remove access when needed**
   This removes the club affiliation and its active appearances. It keeps the dancer's account and media.

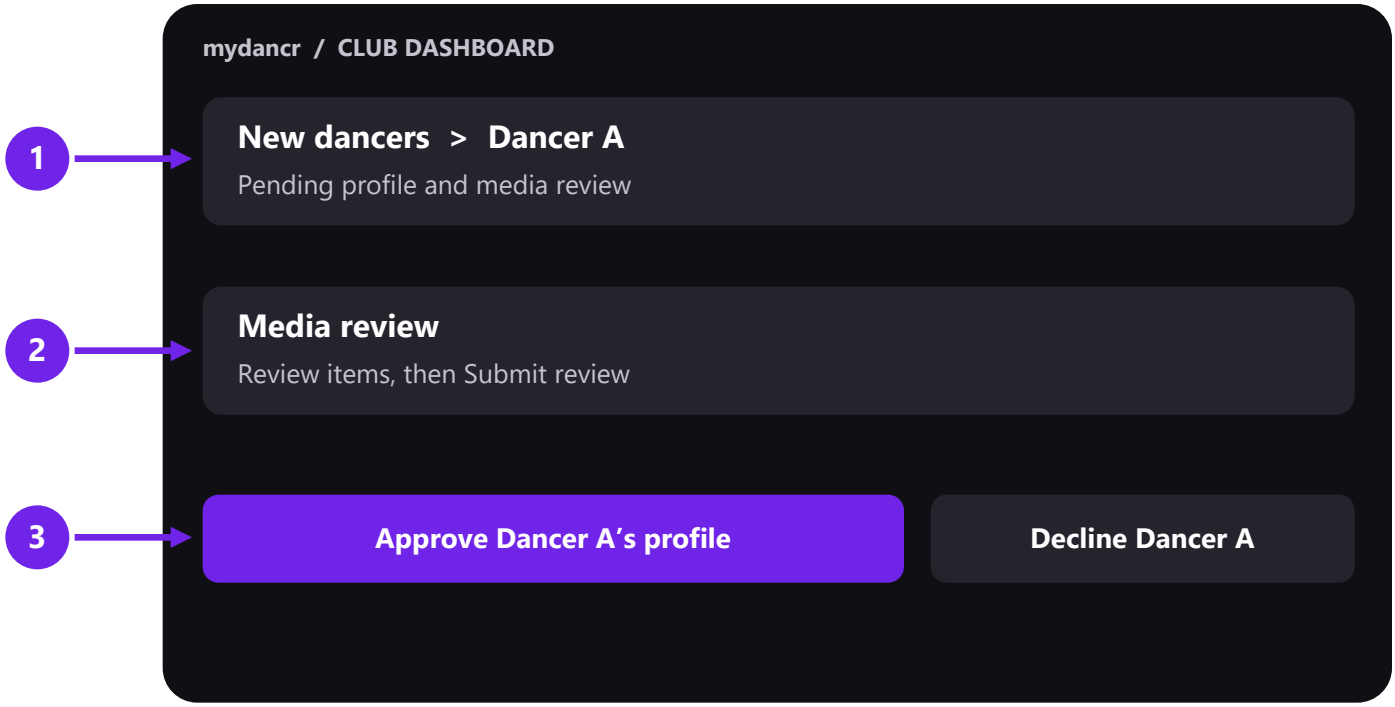

3. **Allow a return**
   Open Removed dancers and choose Allow new tap. The dancer can then tap the club tag and request review again.

Remember Remove access is not a routine end-of-shift action. For a normal checkout, the dancer uses End Working Now in their own dashboard.

Review a new dancer

Dancers & tables > Media approval > New dancers

Review the submitted media and then the club affiliation.

SIMPLIFIED VIEW • Follow the numbered arrows

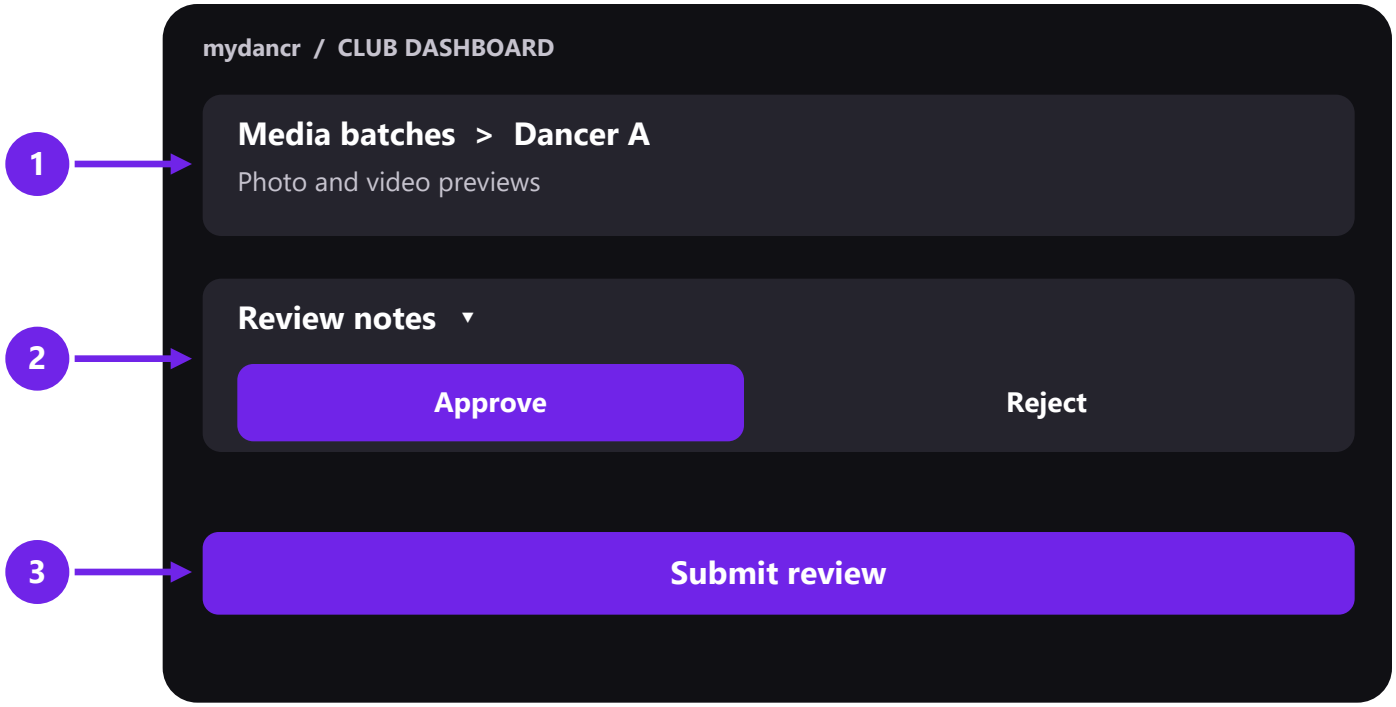

1. **Open the dancer**
   Select the pending dancer to view their profile and media.
2. **Finish the media review**
   Approve or Reject every editable item, add clear notes where needed, then Submit review.
3. **Decide the profile**
   When media decisions are complete, choose Approve [name]'s profile or Decline [name].

Remember Club approval does not skip required final media review. Approval within 6 hours of the saved tap activates the remaining check-in time. After that, the dancer needs a new eligible tap.

Review media updates

Dancers & tables > Media approval > Media updates

Finish the entire batch so the dancer gets a complete result.

SIMPLIFIED VIEW • Follow the numbered arrows

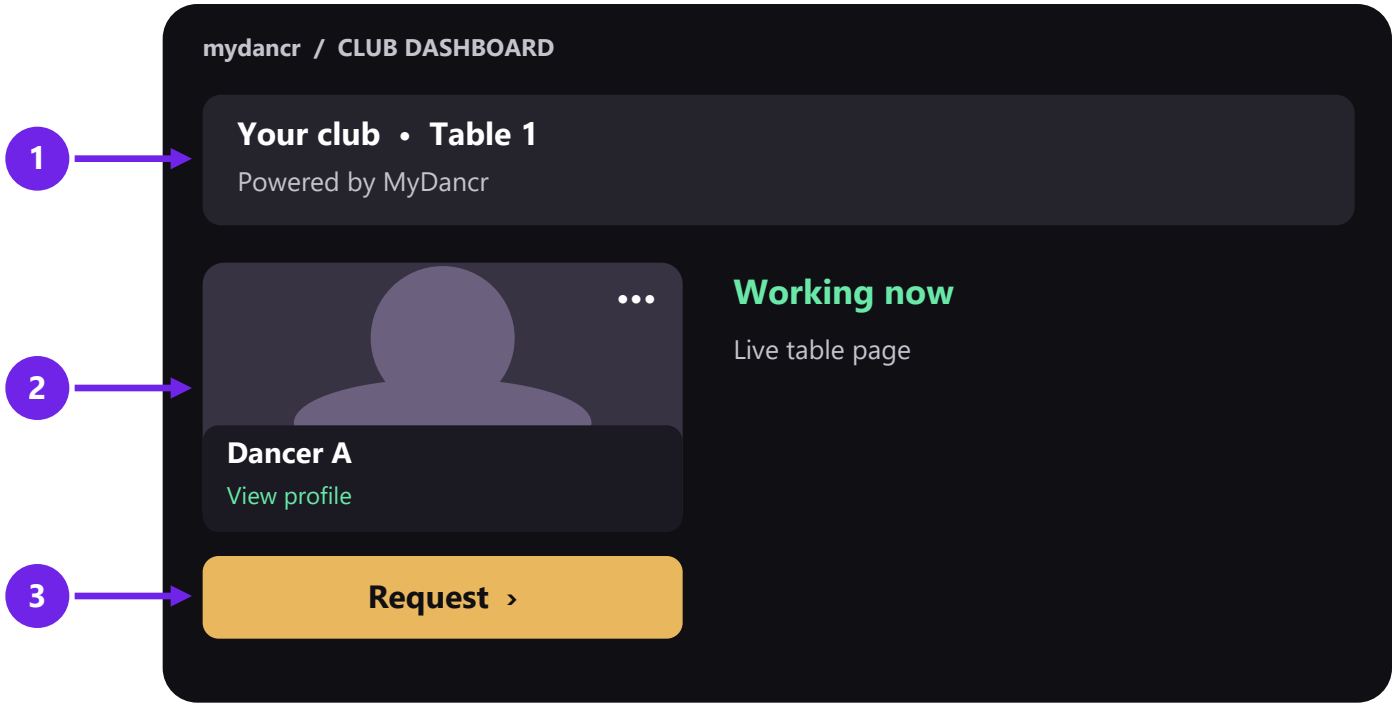

1. **Open the media batch**
   Look at every photo and play each video. Use Next for additional items.
2. **Save every decision**
   Choose Approve or Reject. Add a short reason under Review notes; choose Approve or Reject again after changing notes.
3. **Tap Submit review**
   New media goes to MyDancr for final review. Media already approved by MyDancr needs only this club's approval.

Remember The active club determines the approved media shown. Going live needs an approved main photo, 3 approved photos in total and 1 approved video. The avatar is not an extra photo. A completed batch produces one result email.

Open the customer table page

Dancers & tables > View internal

This opens an existing live table page for your club.

SIMPLIFIED VIEW • Follow the numbered arrows

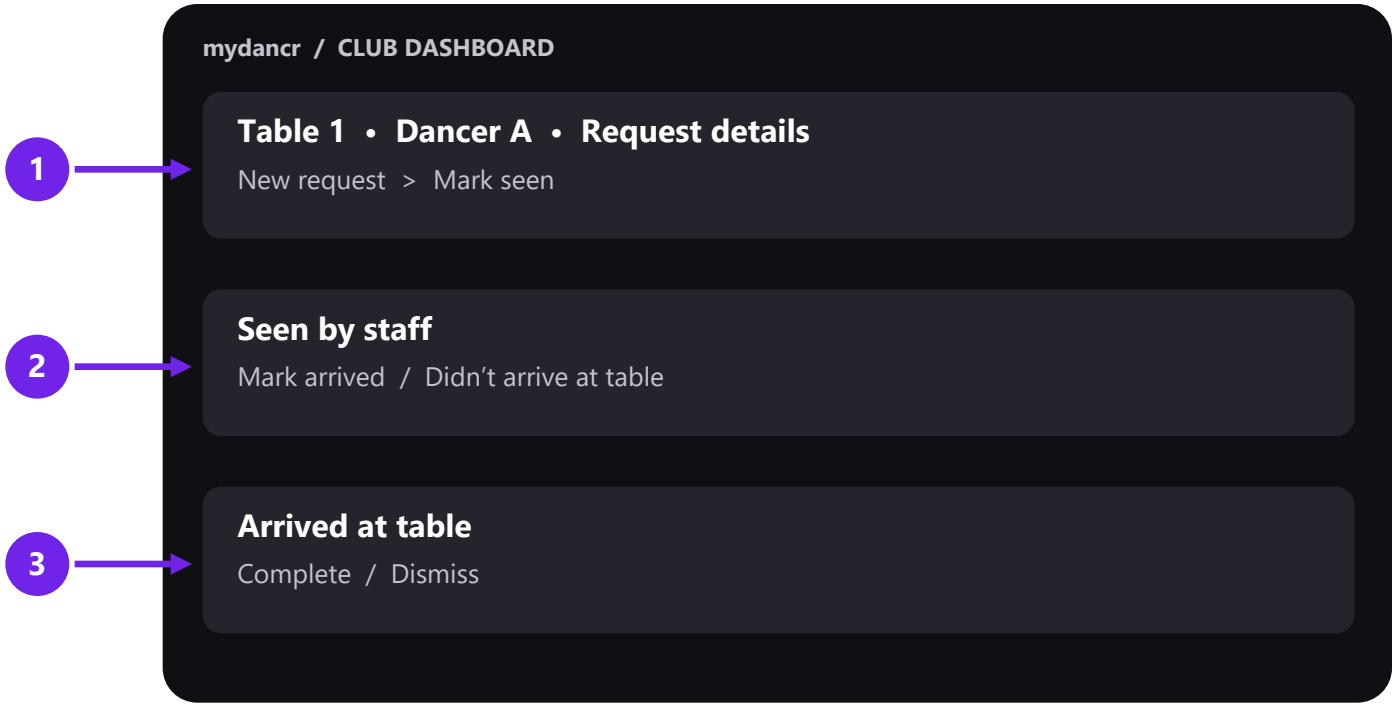

1. **Open View internal**
   Check the table label in the header so you know which table you opened.
2. **View a dancer**
   Tap a card to open the profile. Request appears on the card and opened profile.
3. **Send a request only when intended**
   The live Request button sends a request to club staff. Customers use the assigned table tag to open their table page.

Remember View internal is live. Only a screen explicitly labelled Customer preview is a simulation. If no table page is available, ask MyDancr to set up the table tags.

Handle table requests

Dancers & tables > Table requests

Acknowledge the request, coordinate with the dancer, and record the result.

SIMPLIFIED VIEW • Follow the numbered arrows

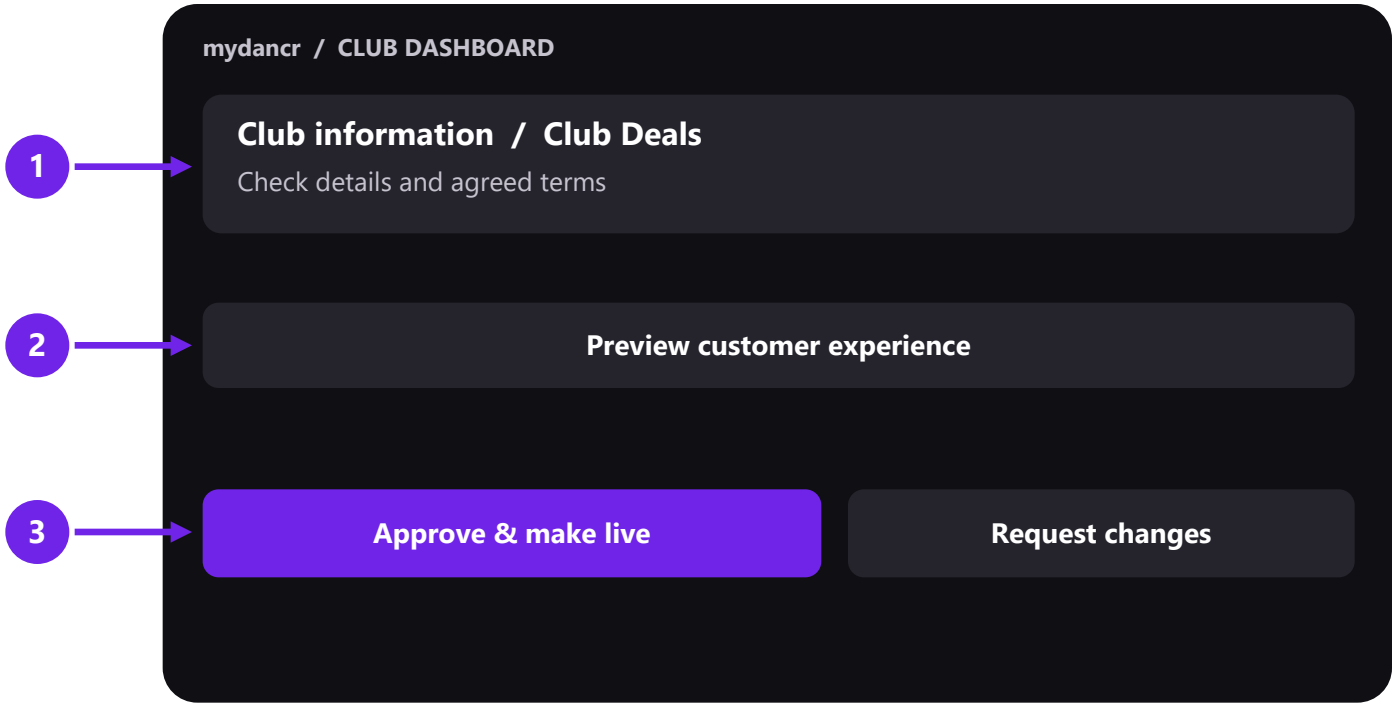

1. **Mark seen**
   Open the request card's three-dot menu. Check the table and dancer, then tap Mark seen.
2. **Record what happened**
   Choose Mark arrived when the dancer reaches the table, or Didn't arrive at table if they do not.
3. **Close the request**
   After arrival, tap Complete when finished. Use Dismiss when cancelling the request.

Remember Being seen by staff does not guarantee availability. Cards marked Sample are examples and do not change the live queue.

Review and publish the club page

Club > Review your club page & deal / Club page & deals

Check the information and agreed deal before making the page live.

SIMPLIFIED VIEW • Follow the numbered arrows

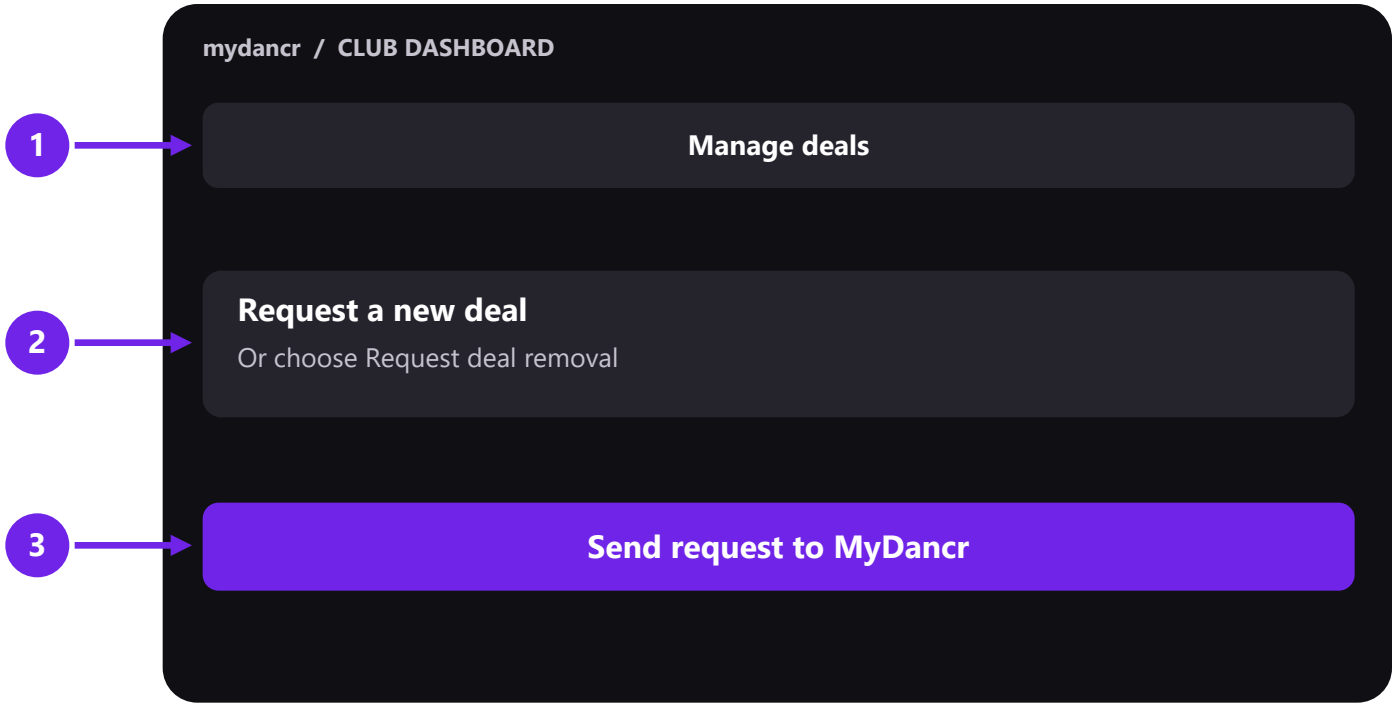

1. **Check Club information and Club Deals**
   Review the logo, name, address, phone, website, hours and offer terms.
2. **Preview the page**
   When available, tap Preview customer experience to inspect the customer view.
3. **Approve or request changes**
   Choose Approve & make live when correct. Otherwise use Request changes and explain the correction.

Remember After publication, use View club page or Request a change. A page may be Hidden if there is no active deal or it was made private. Ask MyDancr if the reason is unclear.

Request a deal change

Club > Club Deals > Manage deals

Send MyDancr the details of a new offer or a removal request.

SIMPLIFIED VIEW • Follow the numbered arrows

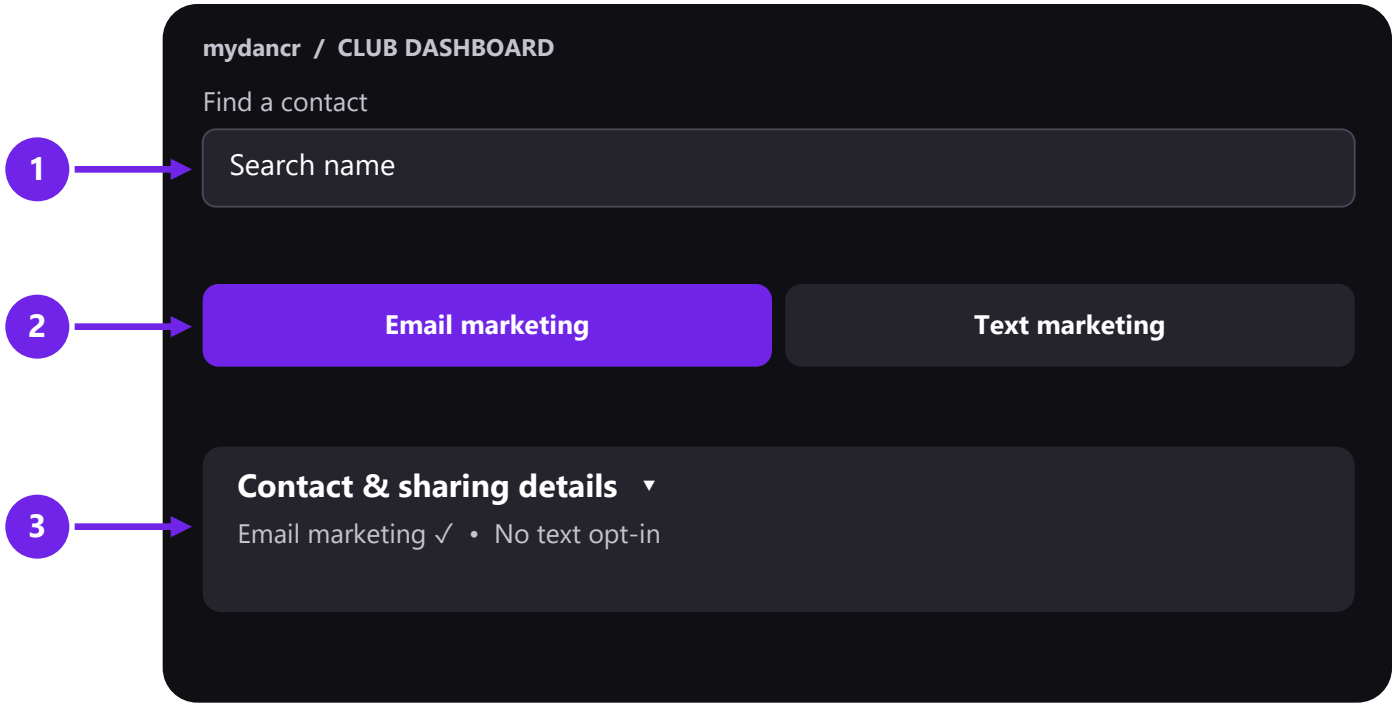

1. **Open Manage deals**
   Read the current offer and customer terms first.
2. **Choose the request**
   Use Request a new deal or Request deal removal. Enter the offer, conditions and requested timing clearly.
3. **Send the request**
   Use Send request to MyDancr or Send removal request to MyDancr. Check messages for the response.

Remember A request is not an immediate live change. Removing the last active deal can hide the club's public listing. Marketing posts are separate; see page 18.

Use shared customer contacts

Club > Contacts & marketing

Check which details the customer shared and which marketing they opted into.

SIMPLIFIED VIEW • Follow the numbered arrows

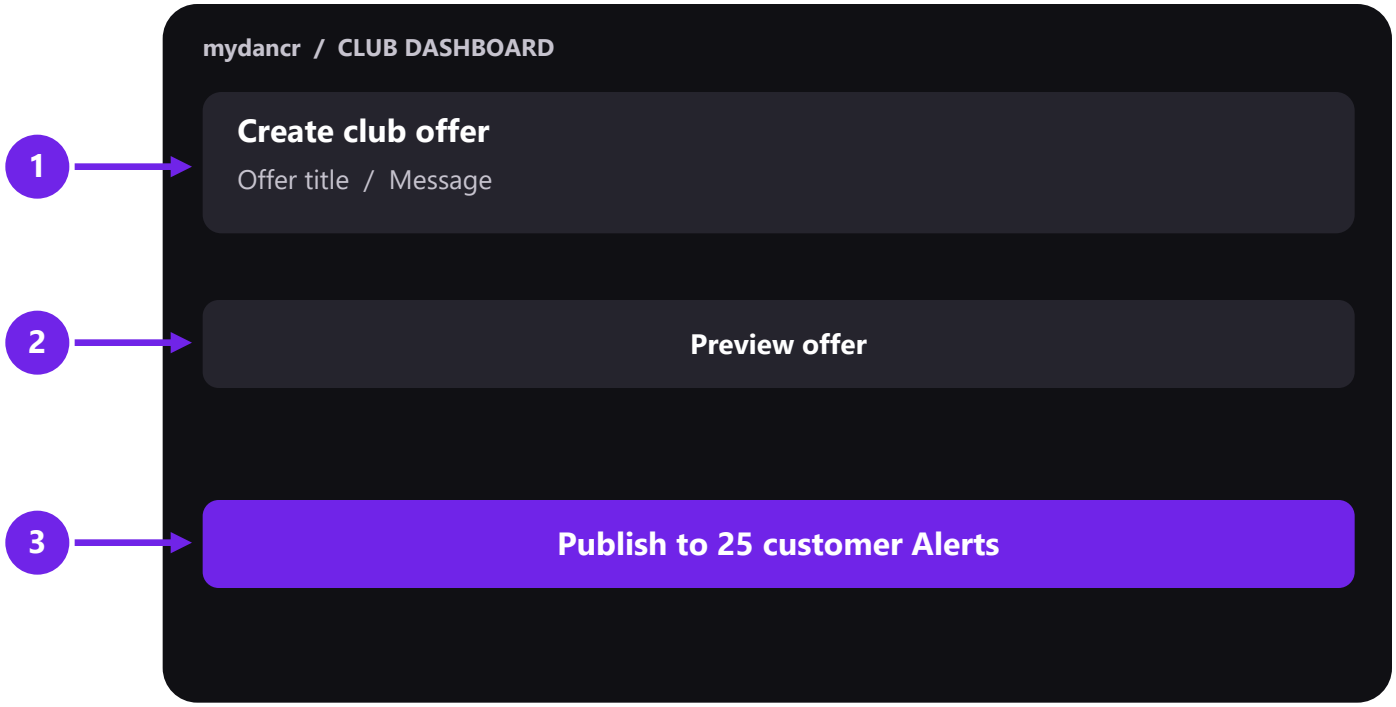

1. **Find a contact**
   Search a name or use Shared contacts, Shared followers or Guest list.
2. **Filter by permission**
   Email marketing and Text marketing show customers who opted into that channel.
3. **Open Contact & sharing details**
   Check the available contact information and current opt-in before using it.

Remember A shared email, guest-list entry or follow alone is not an email or text marketing opt-in. Use the permission shown for the channel you plan to use.

Publish a club offer update

Club > Contacts & marketing > Create club offer

Post an update to eligible customers' MyDancr Alerts.

SIMPLIFIED VIEW • Follow the numbered arrows

1. **Create the offer**
   Tap Create club offer. Enter a short Offer title and Message.

2. **Preview it**
   Tap Preview offer. Check the wording and audience count; use Edit message to make changes.

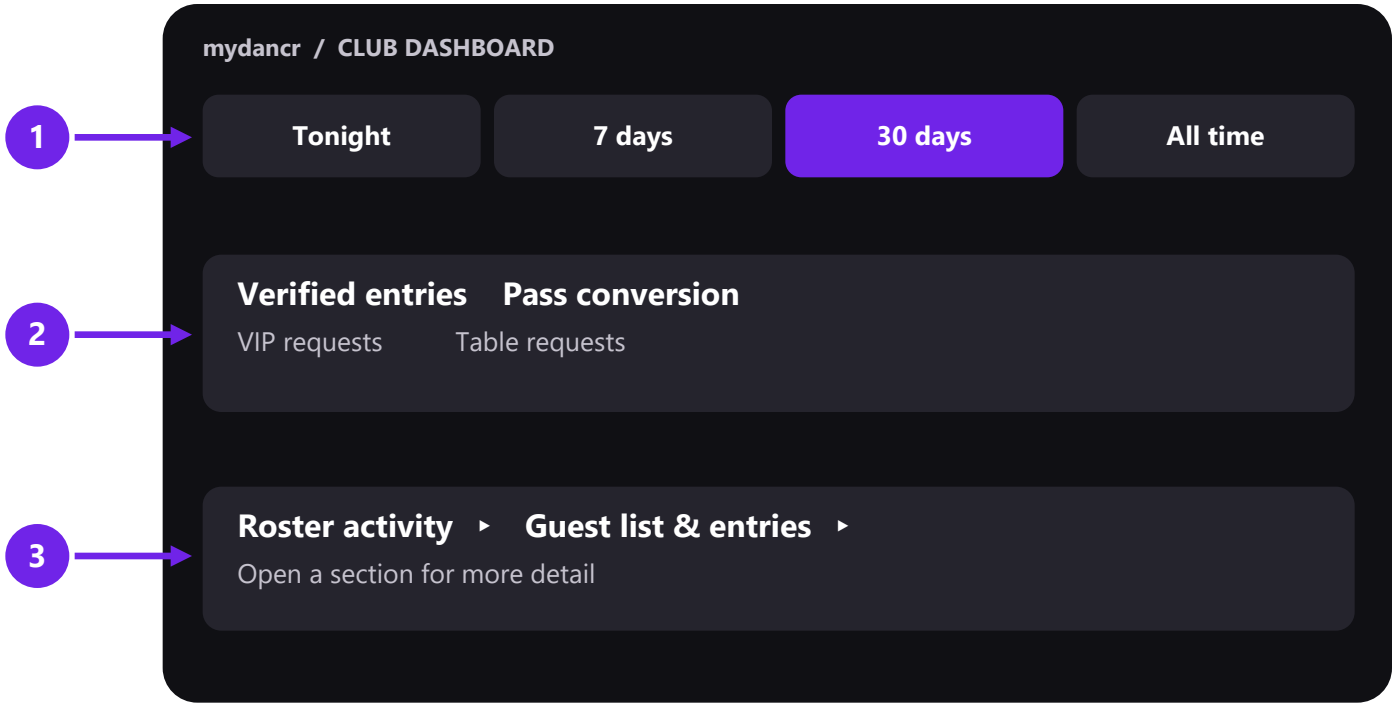

3. **Publish**
   Tap Publish to [number] customer Alerts. Recent updates lets you View message or Withdraw offer.

Remember Up to 3 offers per day. Email summaries and push follow customer preferences. The published count is not proof of email delivery or views. This does not change the public Club Deal.

Read your club results

Results

Choose a time period, then open the area you want to understand.

SIMPLIFIED VIEW • Follow the numbered arrows

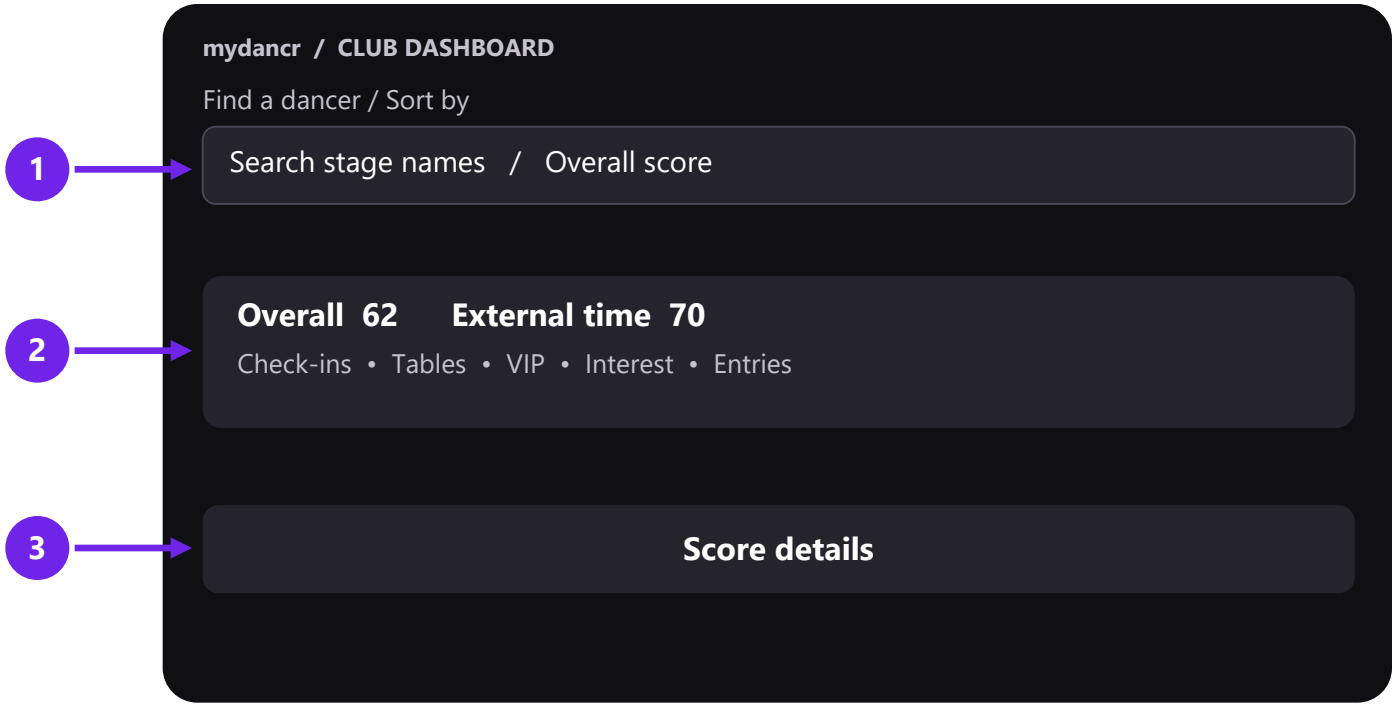

1. **Choose the period**
   Tonight, 7 days, 30 days or All time. Check the club time and date range shown.
2. **Read the top results**
   Start with Verified entries, Pass conversion, VIP requests and Table requests.
3. **Open the detail sections**
   Explore roster activity, guest list and entries, VIP demand, tables, customer interest, transportation and dancer contribution.

Remember Customer interest also contains Customer actions and MyDancr TV detail. Use How counting works for definitions. A click, request or I'm Going signal is not a verified entry.

Read dancer performance

Results > Dancer contribution

Scores describe recorded activity at this club for the selected period.

SIMPLIFIED VIEW • Follow the numbered arrows

1 **Find or sort dancers**

Search a stage name or choose a score in Sort by.

2 **Read the categories**

Overall combines activity. The categories are External time, Check-ins, Tables, VIP, Interest and Entries.

3 **Open Score details**

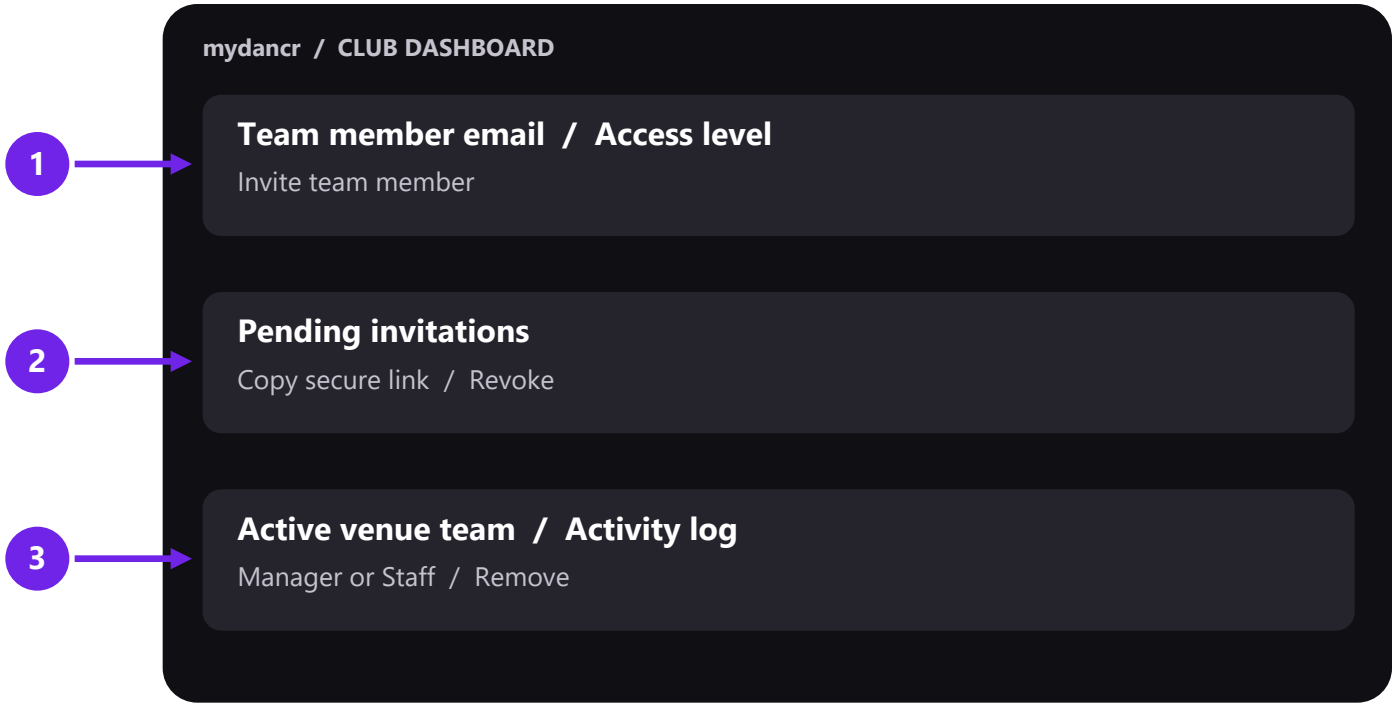

See the inputs behind a score. How scores are calculated explains the method; Additional dancer insights offers more detail.

Remember Scores are out of 100. Early means limited data; a dash means not enough data. Unranked is not a poor rating. Requests and clicks do not prove attendance or revenue.

Manage the club team

Club > Team & activity

Give each person their own login. Owners control invitations and roles.

SIMPLIFIED VIEW • Follow the numbered arrows

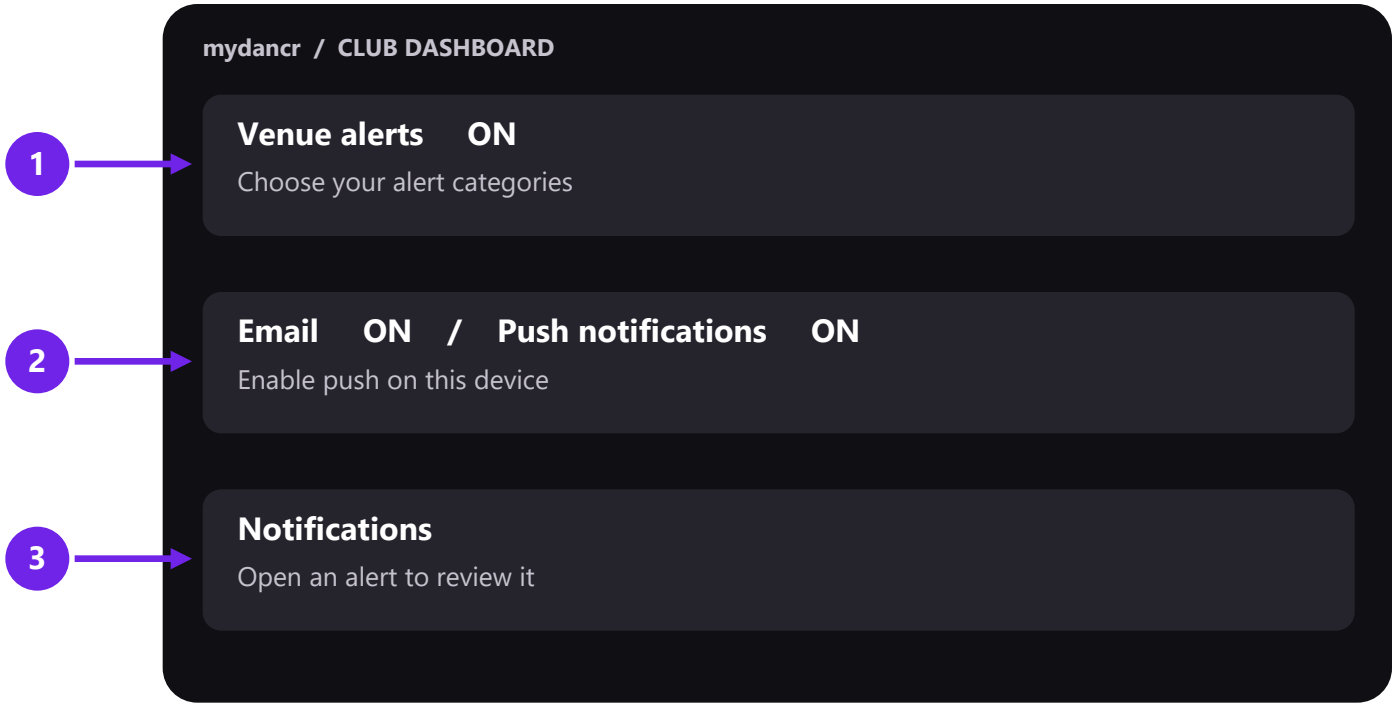

1. **Invite a team member**
   The owner enters their email, chooses Manager or Staff, then taps Invite team member.
2. **Check the invitation**
   Share the secure link if needed. Revoke unused invitations from Pending invitations.
3. **Maintain access**
   The owner can change a role or Remove a member. Owners and managers can review the activity log.

Remember Manager includes dancer review, deal-change requests and team activity. Staff has a more limited view. Owner access cannot be granted by invitation. Use an email not already registered as a guest or dancer.

Set your alerts

Club > Account > Notification preferences

These settings apply to your own account.

SIMPLIFIED VIEW • Follow the numbered arrows

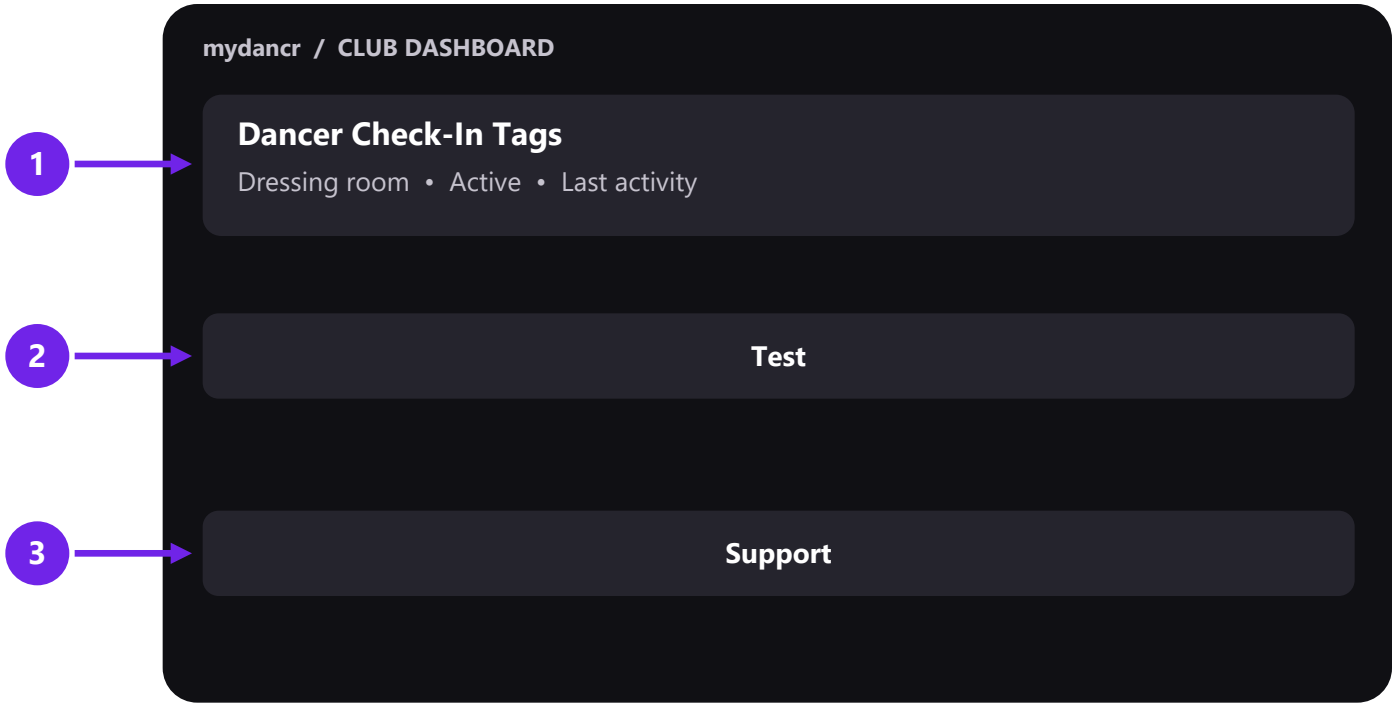

1. **Choose the alerts**
   Keep Venue alerts on, then select the types you need for your role.
2. **Choose delivery**
   Set Email and Push notifications. Tap Enable push on this device and allow the browser prompt if you want device alerts.
3. **Read your dashboard inbox**
   Open Notifications in Account and follow the relevant item. Mark all read removes unread badges; Clear all clears the inbox.

Remember Types include VIP, tables, dancer activity, roster changes, deals, pickups, guest list, team, page/media, support and performance. The weekly performance email is scheduled Mondays at 9 a.m. in club time.

Test a dancer tag

Club > Tools & help > Dancer Check-In Tags

Test an assigned tag or report a problem with it.

SIMPLIFIED VIEW • Follow the numbered arrows

1. **Find the tag**
   Check its label, status and last activity. Keep dancer check-in tags separate from customer table tags.

2. **Tap Test**
   Unlock the phone and tap the physical tag while the test is listening.

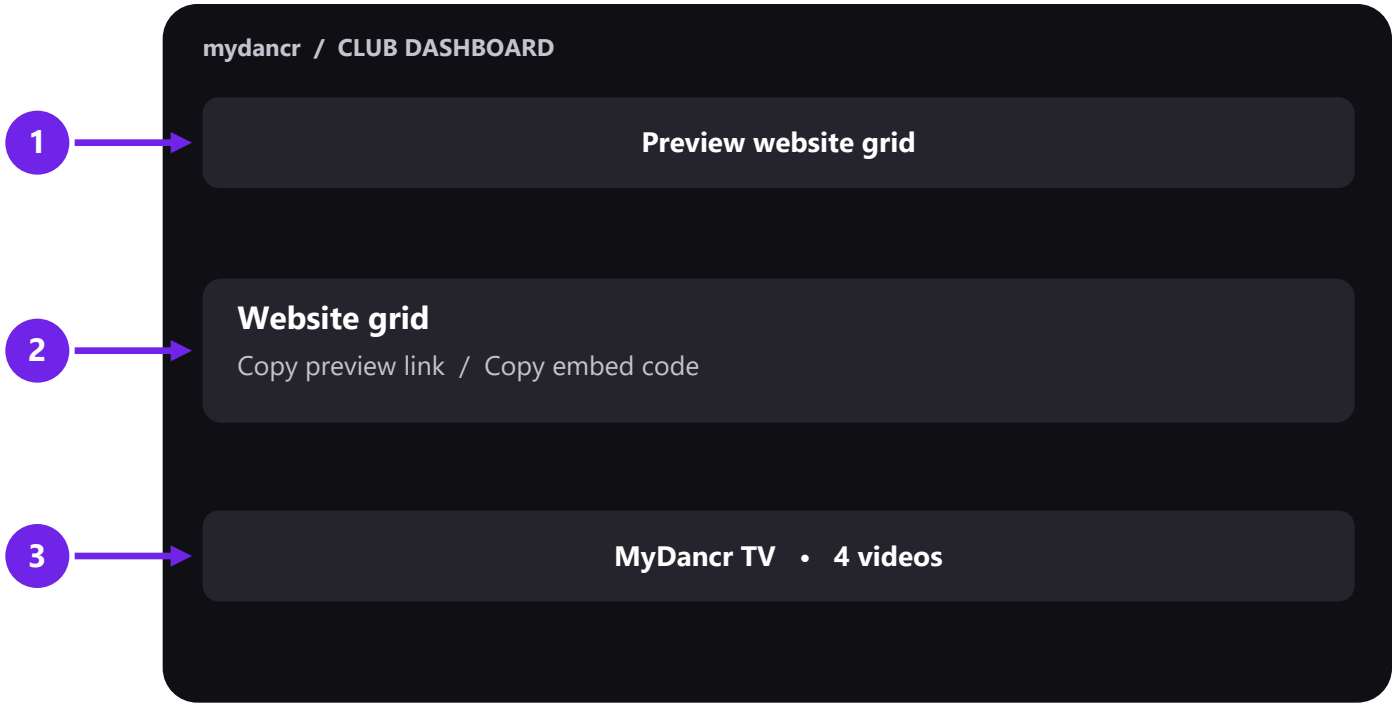

3. **Request Support**
   Choose the issue, add the tag location and details, then Send request.

Remember Use Support for damaged, lost, moved or replacement tags. Dancers tap at each new shift. A check-in lasts 6 hours, followed by a 6-hour cooldown at that club; retapping does not extend it.

Use the website grid and TV

Club > Tools & help

Show the club's dancer profiles on its website and open its video feed.

SIMPLIFIED VIEW • Follow the numbered arrows

1. **Preview Website grid**
   Tap Preview website grid to check the branded grid and opened profiles.

2. **Copy what your website team needs**
   Use Copy preview link to share the view, or Copy embed code for your website's HTML embed area.

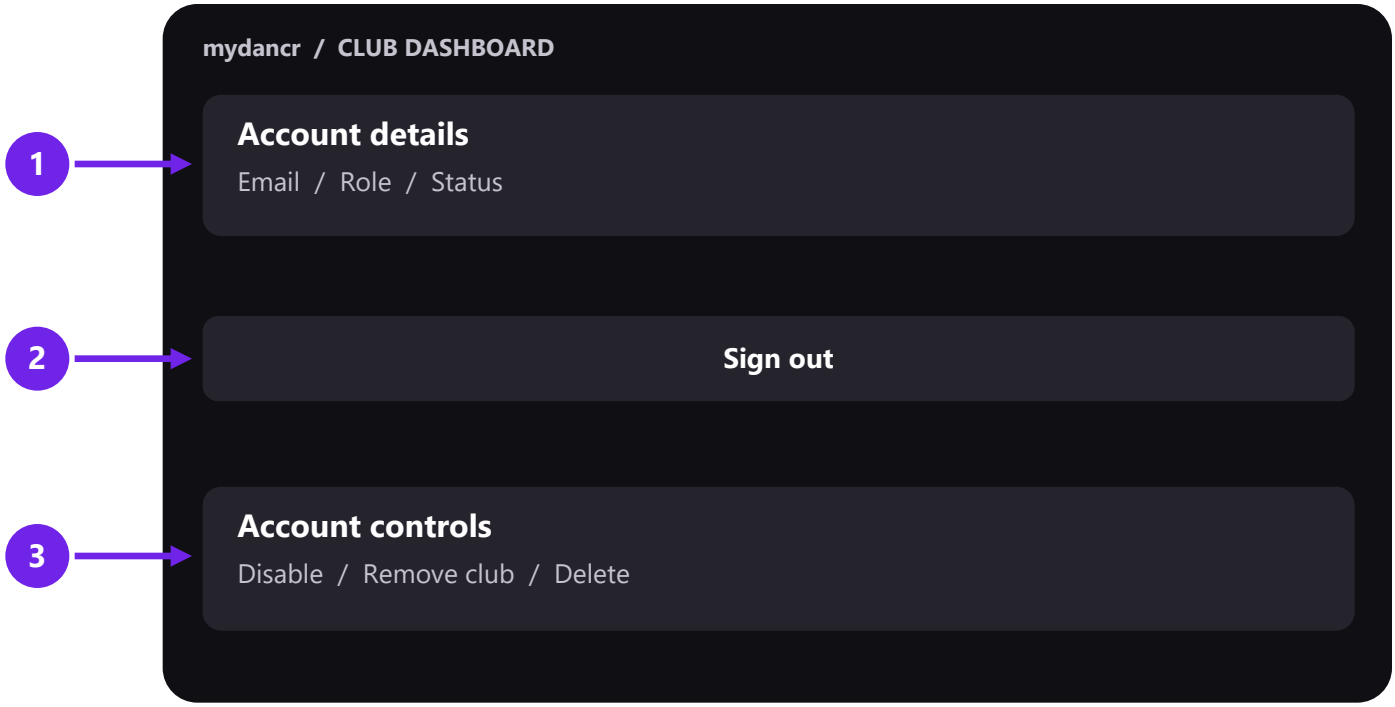

3. **Open MyDancr TV**
   Tap MyDancr TV to view the club's available videos. The launcher shows the video count.

Remember Website grid appears when the club is live. If it or the video list is unavailable, refresh and check the club's publication and media status.

Manage your account

Club > Account

Read the account details and choose the action that matches your intent.

SIMPLIFIED VIEW • Follow the numbered arrows

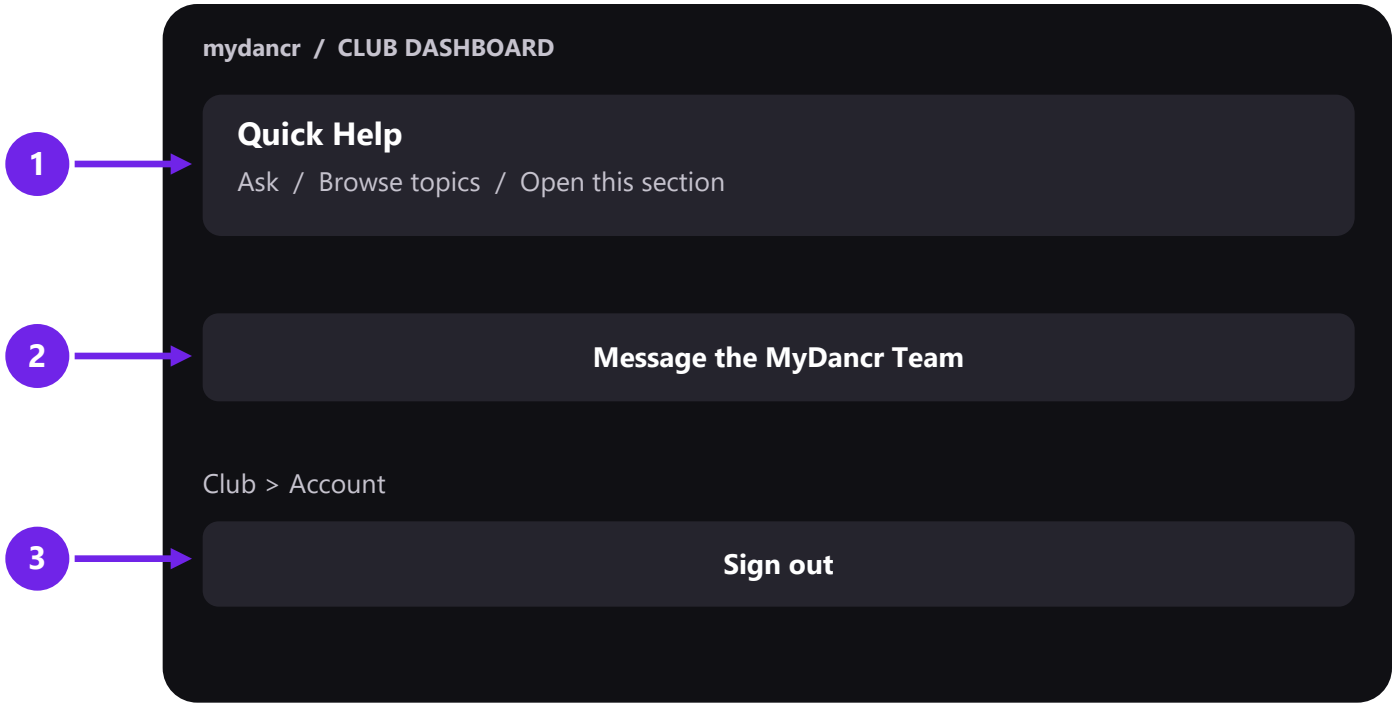

1. **Check Account details**
   Confirm the email and role. Use Help & Messages if these need correcting.
2. **Sign out after using a shared device**
   Sign out ends this device's session. Disable pauses access; Reactivate restores it.
3. **Read owner controls carefully**
   Remove club from MyDancr ends club participation. Delete permanently removes the relevant login. Follow the confirmation shown only if intended.

Remember Owner Disable makes the club private and pauses the whole team; a team member's Disable affects their own login. Club removal ends affiliations, check-ins and tags, while dancers keep their accounts and media.

Get help and finish your shift

Help & Messages

Use Quick Help for instructions and Messages for help from MyDancr.

SIMPLIFIED VIEW • Follow the numbered arrows

1. **Ask Quick Help**
   Type the question and tap Ask, or Browse topics. Open this section takes you to a relevant dashboard area.

2. **Message the MyDancr Team**
   Explain the club, screen, time and what happened. Read replies under Messages.

3. **Leave the next shift a clear queue**
   Update rides, VIPs and table requests. Tell the next manager what remains, then sign out on shared devices.

Remember For missing data, check filters and refresh first. For an unavailable section, check your role and club setup. Tools & help also includes Team guides and Ride request history.
