MYDANCR

Club manager operations manual

Simple steps. Actual mobile screens. Arrows that show where to tap.

Start with your task

1. Run tonight's queues
2. Manage dancers and media
3. Review results
4. Manage the club and team
5. Find tools and support

22 topics, plus first-time page approval and the opened-profile preview.

Mobile screens captured 29 October 2026

QUICK FIND

Choose the job you need

Tap a topic in this PDF. Follow the numbered steps; arrows identify controls visible in the screenshot.

01 Get started

02 Start your shift

03 Find a guest

04 Handle a ride request

05 Review VIP requests

06 Manage VIP access

07 Use the dancer roster

08 Manage dancer access

09 Approve a new dancer

10 Approve or reject media

11 Handle table requests

12 Preview the table experience

13 Manage your page and deals

14 Use contacts correctly

15 Publish a club offer

16 Read club results

17 Read dancer performance

18 Manage team access

19 Set and read notifications

20 Test a check-in tag

21 Find the website grid and TV

22 Account, help and fixes

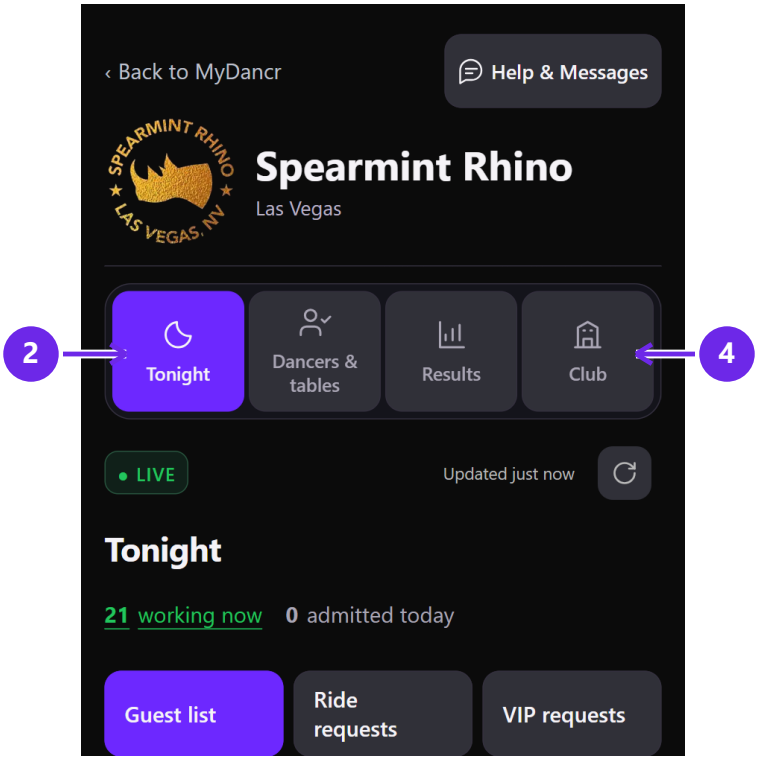

How to use the pictures

Every screen is a real mobile capture. Some are cropped to keep the controls large. Empty queues are shown as empty; actions that need a pending item are explained in the steps.

01 Get started

Sign in with your own club account, then use the four main tabs.

mydancr.com > Login / Join > Club dashboard

Your four main dashboard tabs.

1 Sign in

Use your club email and password. Open Club dashboard from the account menu. The dashboard is shown here.

2 Tonight

Find the guest list, ride requests and VIP requests.

3 Dancers & tables

Manage the roster, table requests and media approval.

4 Results and Club

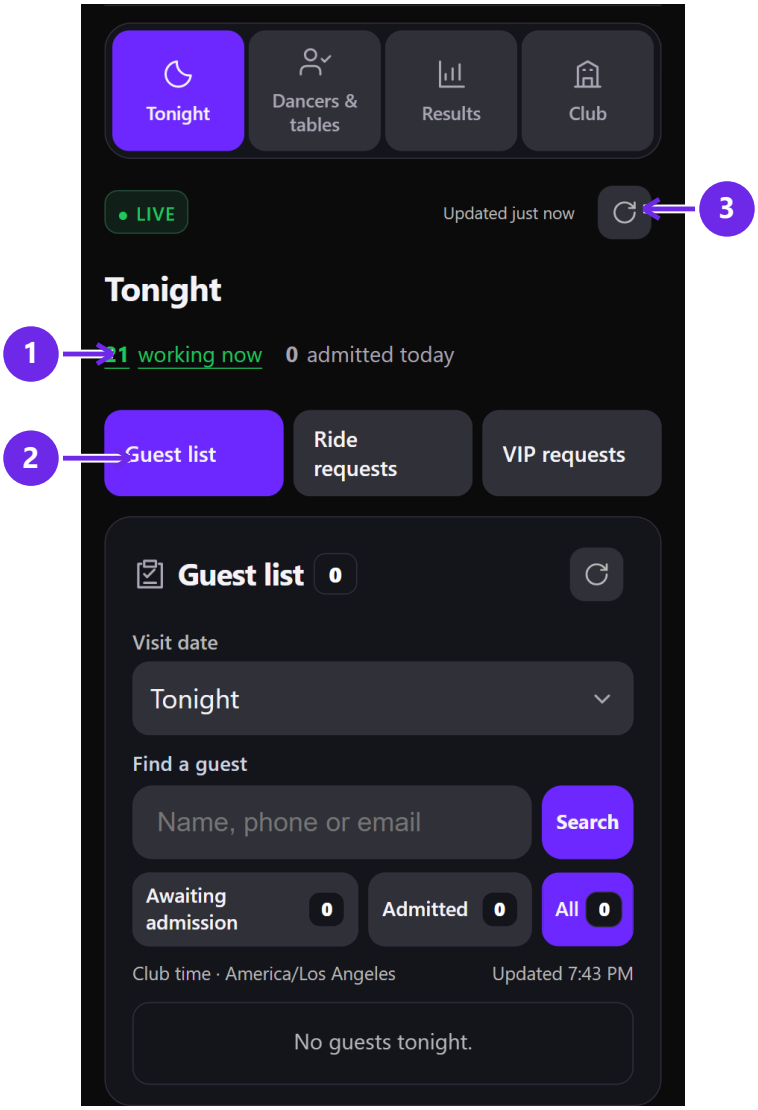

Results shows activity. Club holds your page, offers, team, account and tools.

Access depends on your role. If a control is missing, ask the club owner to check your access.

02 Start your shift

Check who is working and what needs attention before getting busy.

Club dashboard > Tonight

Tonight and the guest-list controls.

1 Check Working now

Open the count to see dancers with an active MyDancr check-in.

2 Check outstanding work

Review the guest list, rides and VIP requests. Check Table requests under Dancers & tables too.

3 Refresh and read alerts

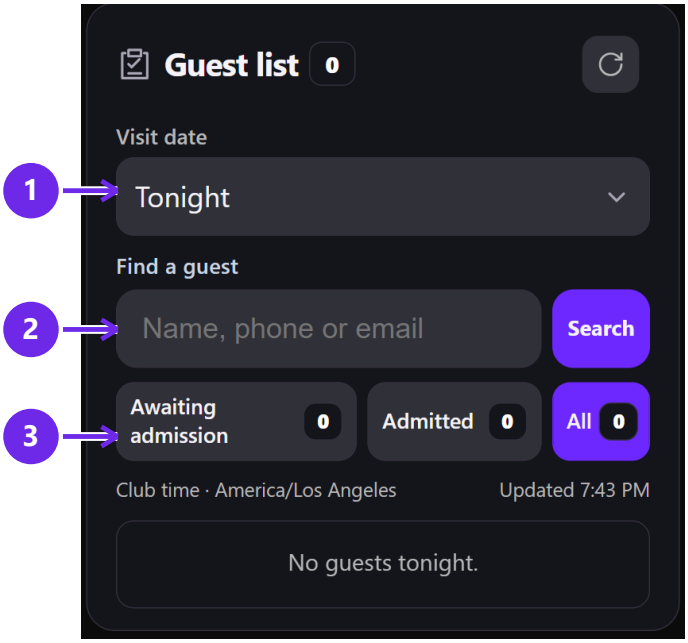

Use the refresh arrow for current information. Open Club > Account > Notifications for dashboard alerts.

Working now shows MyDancr check-ins. Other dancers may also be working at the club.

03 Find a guest

Search for a guest and check the status of their admission pass.

Tonight > Guest list

An empty guest list is shown.

1 Choose a date

Use Tonight, Choose a date or All active passes. Dates follow the club time shown.

2 Search

Enter the guest name, phone number or email, then tap Search.

3 Check the status

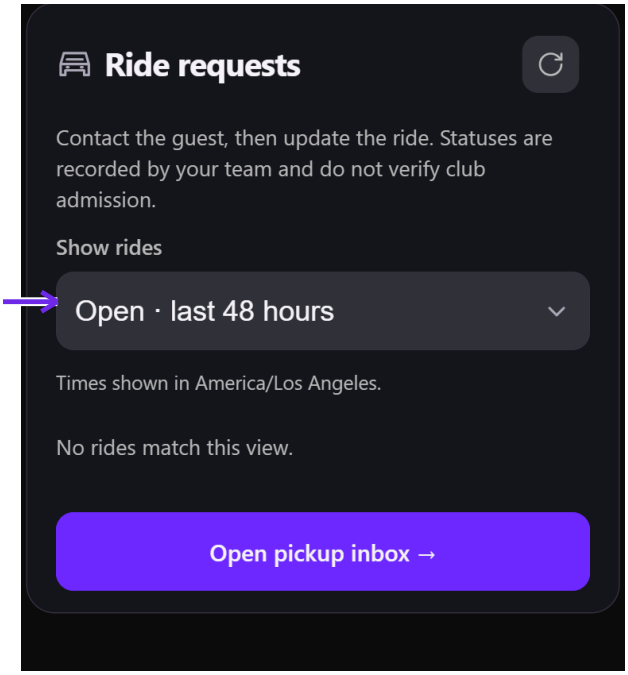

Use Awaiting admission, Admitted or All. Open the matching guest and check the pass details.

Guest list is a lookup screen. Admission is recorded through the normal guest-pass scan at the door.

04 Handle a ride request

Contact the guest, arrange the pickup and keep the status current.

Tonight > Ride requests

Use Show rides or Open pickup inbox.

1 Find and open the request

Use Show rides to find it. Open the request and check the pickup location, passengers, requested time and guest notes.

2 Contact the guest

Use Call guest and arrange the ride with your team.

3 Update the status

Choose Received, Contacted, Arranged, Completed or Cancelled as the ride progresses.

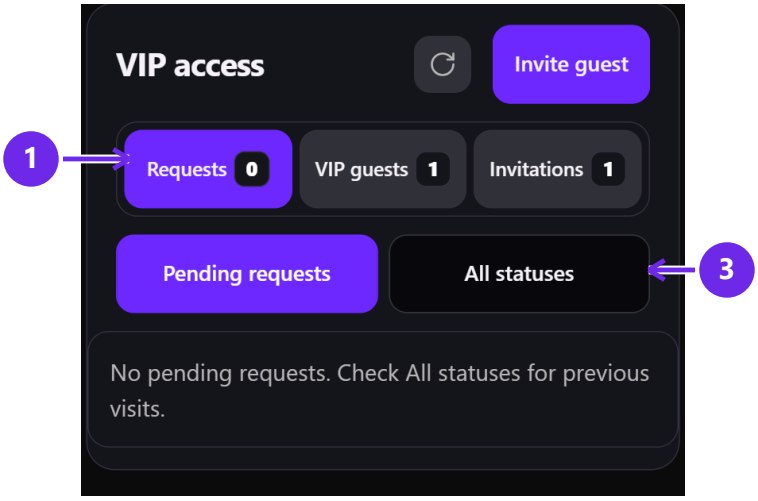

Shown: an empty ride queue. Request details and status controls appear when a ride is present.

A completed ride is not proof of club admission. Use the request filters or ride history to find earlier rides.

05 Review VIP requests

Review the requested visit and selected dancers before replying.

Tonight > VIP requests > Requests

Requests, VIP guests and Invitations.

1 Open a pending visit

Check the date, time, dancer selections and guest message.

2 Confirm or decline

Choose Confirm request or Decline. Use Add message if you need to explain the arrangements.

3 Review earlier requests

Change the filter to All statuses. A confirmed visit can be cancelled if plans change.

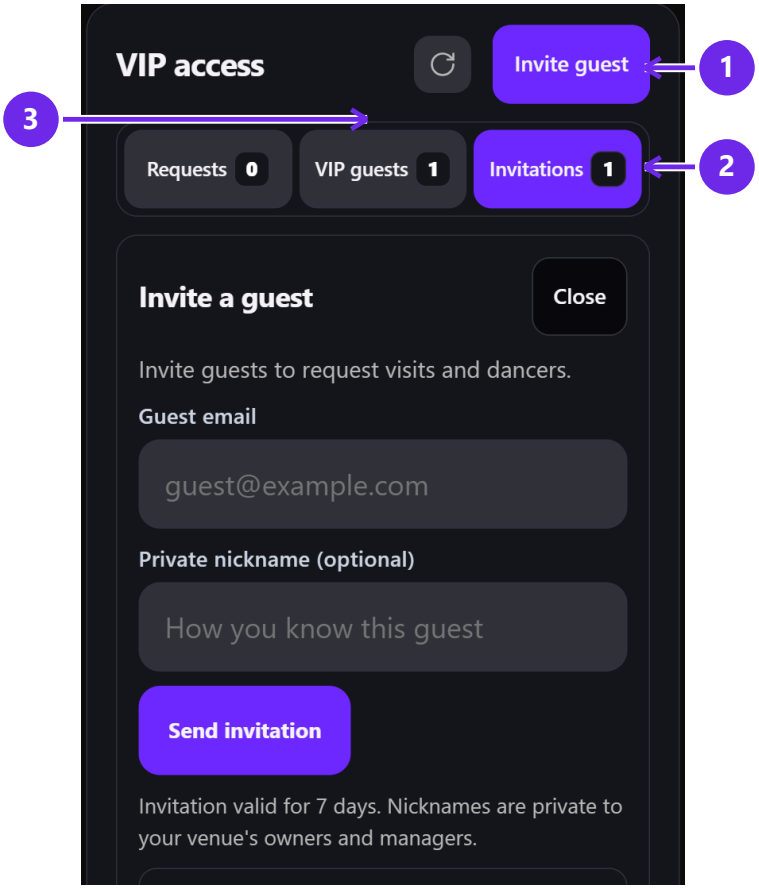

Shown: no pending VIP requests. Confirm and Decline appear inside a request.

VIP access and a confirmed request do not guarantee dancer availability or prove the guest has arrived.

06 Manage VIP access

Invite guests and maintain their private VIP access.

Tonight > VIP requests

Blank invitation form; guest email records are outside this crop.

1 Invite a guest

Tap Invite guest. Enter their email and an optional private nickname, then Send invitation.

2 Manage invitations

Open Invitations to resend the email, create a New share link or revoke an unused invitation.

3 Manage active guests

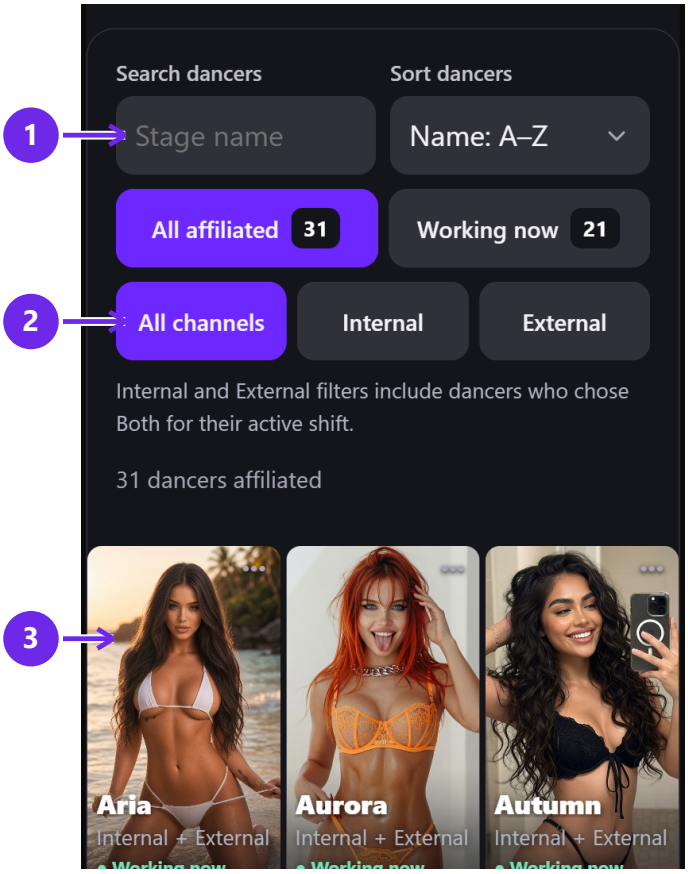

Open VIP guests. Search by nickname, then use the three-dot menu to change it or Remove VIP access.

Invitations last 7 days. Nicknames are private to club owners and managers. A new invitation link replaces the old link.

07 Use the dancer roster

Find dancers and see which check-in channel they are using.

Dancers & tables > Roster

Search, channel filters and dancer cards.

1 Choose who to show

Use All affiliated or Working now. Search a stage name and change the name sort if needed.

2 Choose the channel

Use All channels, Internal or External. A dancer using both appears in either channel filter.

3 Open the dancer

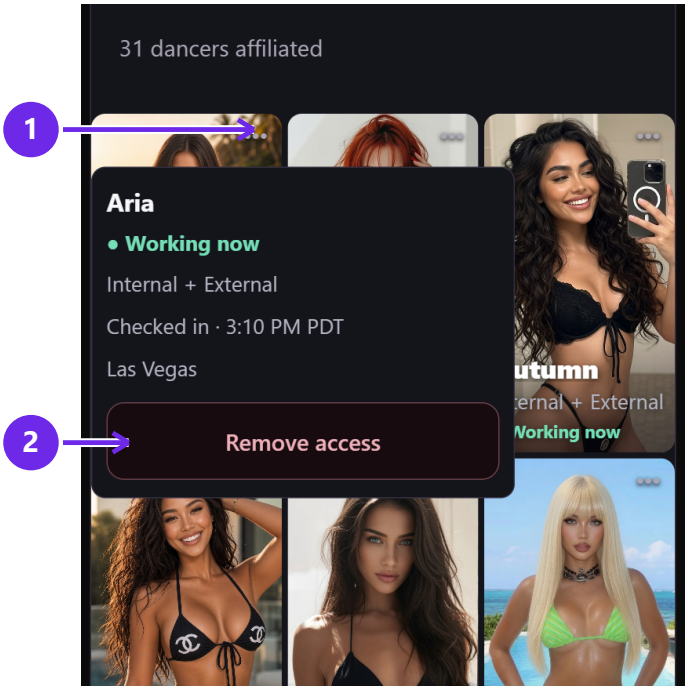

Tap their picture for the profile. Use the three-dot menu for check-in and affiliation details.

Internal is for the club experience, including tables and VIP. External is public. Dancers choose visibility when checking in.

08 Manage dancer access

Remove club access when needed, or allow a dancer to apply again.

Dancers & tables > Roster

The three-dot menu exposes Remove access.

1 Open the three-dot menu

Find the dancer in the roster and check their affiliation details.

2 Remove access

Use Remove access only when the dancer should no longer be affiliated with this club. Read the confirmation.

3 Allow a new application

Open Removed dancers and select Allow new tap. The dancer must tap the club tag and go through review again.

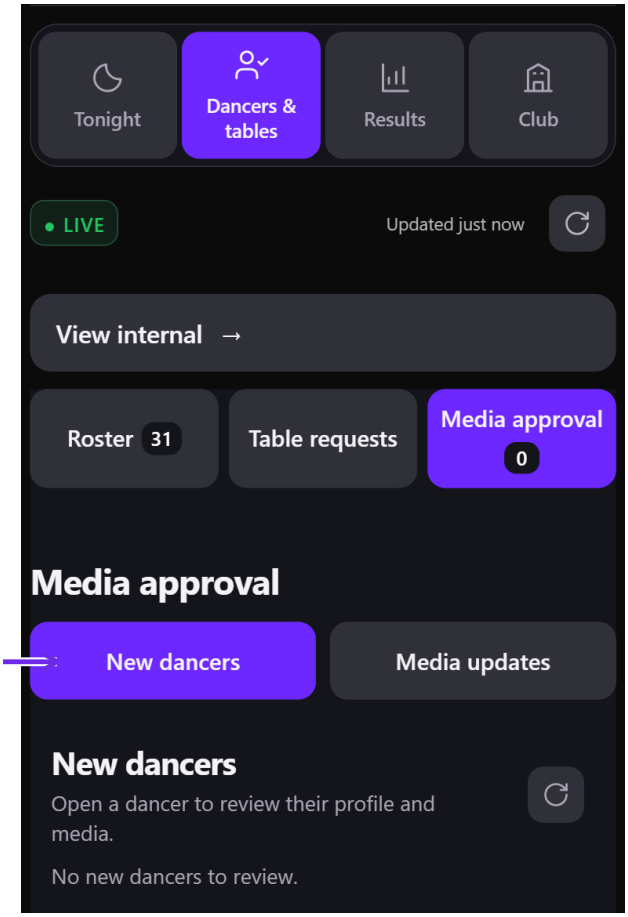

Only open the menu to inspect access. Removing access changes the dancer's affiliation.

Removal keeps the dancer account and media. For an ordinary end of shift, the dancer uses End Working Now in their own dashboard.

09 Approve a new dancer

Complete the media review, then decide the dancer profile.

Dancers & tables > Media approval > New dancers

Actual New dancers entry screen.

1 Open the dancer

Select a pending dancer under New dancers to see their profile and submitted media.

2 Review all media

Inspect each photo and play each video. Choose Approve or Reject for every item, then Submit review. See topic 10.

3 Decide the profile

After the media review is complete, choose Approve [name]'s profile to add the club affiliation, or Decline [name].

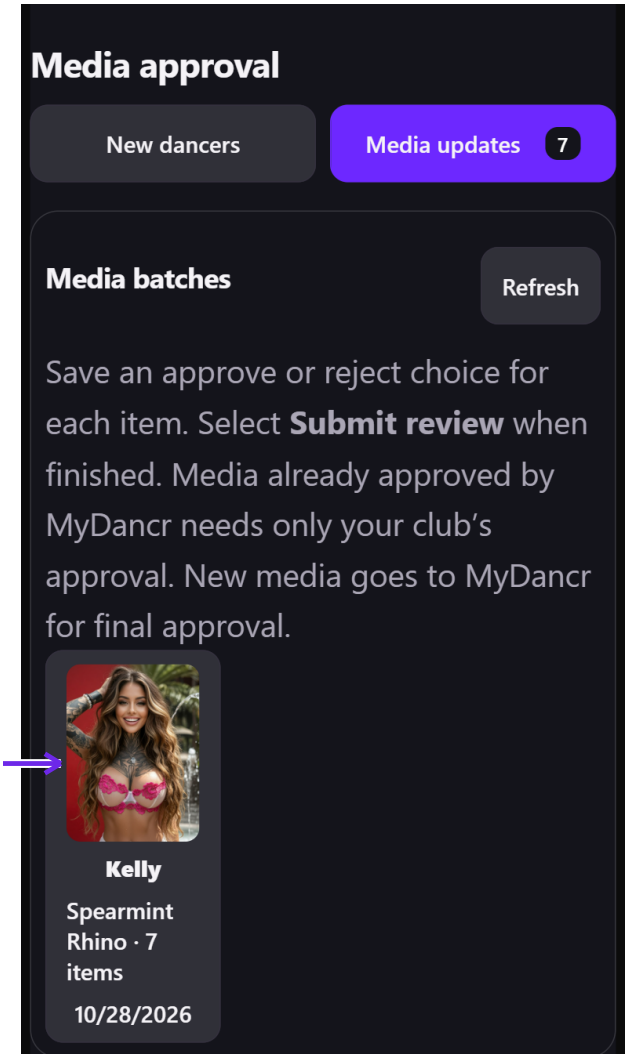

Shown: the real New dancers queue was empty at capture. Open a pending dancer when one appears.

A live profile needs 3 approved photos (including the main photo), 1 approved video and the other required checks. A rejected extra item does not block a profile that meets them.

10 Approve or reject media

Make one decision for each item, then submit the finished review.

Dancers & tables > Media approval > Media updates

Open the dancer card to review the batch.

1 Open the dancer's batch

Tap a dancer under Media updates. Inspect every photo and play every video before deciding.

2 Choose Approve or Reject

Make one decision for each item. Check it saved, then use Next to continue through the batch.

3 Tap Submit review

Submit after every item has a decision. Wait for confirmation. If the batch will not load, refresh or contact support before reviewing.

Capture note: Kelly's batch returned "Unable to load media batches." Approve, Reject and Submit review are explained here; the buttons are not pictured.

New media goes to MyDancr for final approval. Media already approved by MyDancr needs only your club approval. Decisions apply to this club.

11 Handle table requests

Keep the queue in sync with what actually happens at the table.

Dancers & tables > Table requests

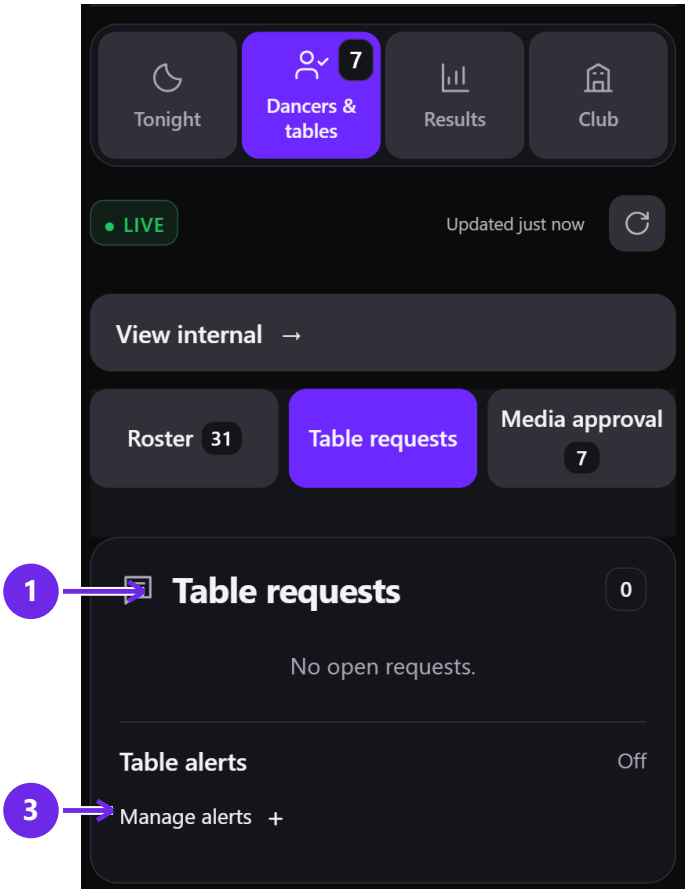

Table requests and Manage alerts.

1 Read the request

Check the table and requested dancer. Tap Mark seen so the request is acknowledged.

2 Record the outcome

Use Mark arrived when they arrive, then Complete when finished. Use Didn't arrive at table or Dismiss when appropriate.

3 Set table alerts

Open Manage alerts and choose Enable table alerts on the device you use during the shift.

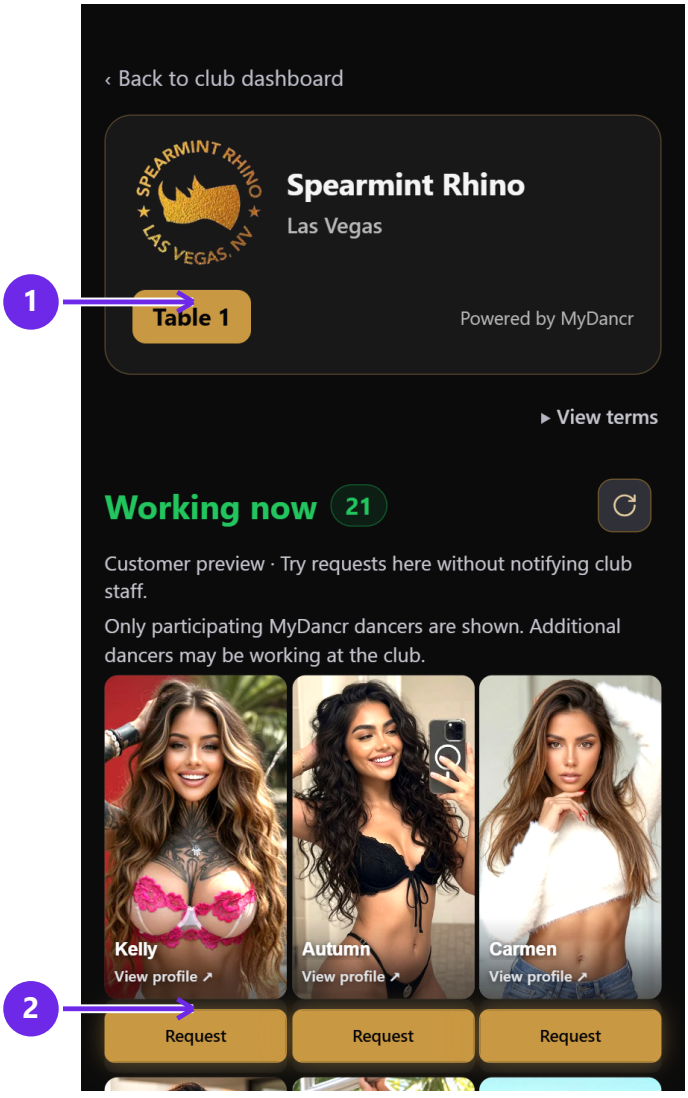

Shown: an empty table queue. Action buttons appear on incoming requests.

A customer request is not a booking guarantee. Club staff coordinate the request and record the actual outcome.

12 Preview the table experience

See the customer layout and try the request journey in preview mode.

Dancers & tables > View internal

Real customer preview, opened from the club dashboard.

1 Open View internal

From Dancers & tables, open the customer preview. Check the club header and table number.

2 Try the dancer card

The grid shows a branded Request button. Tap the dancer picture to open the full profile.

3 Check the profile button

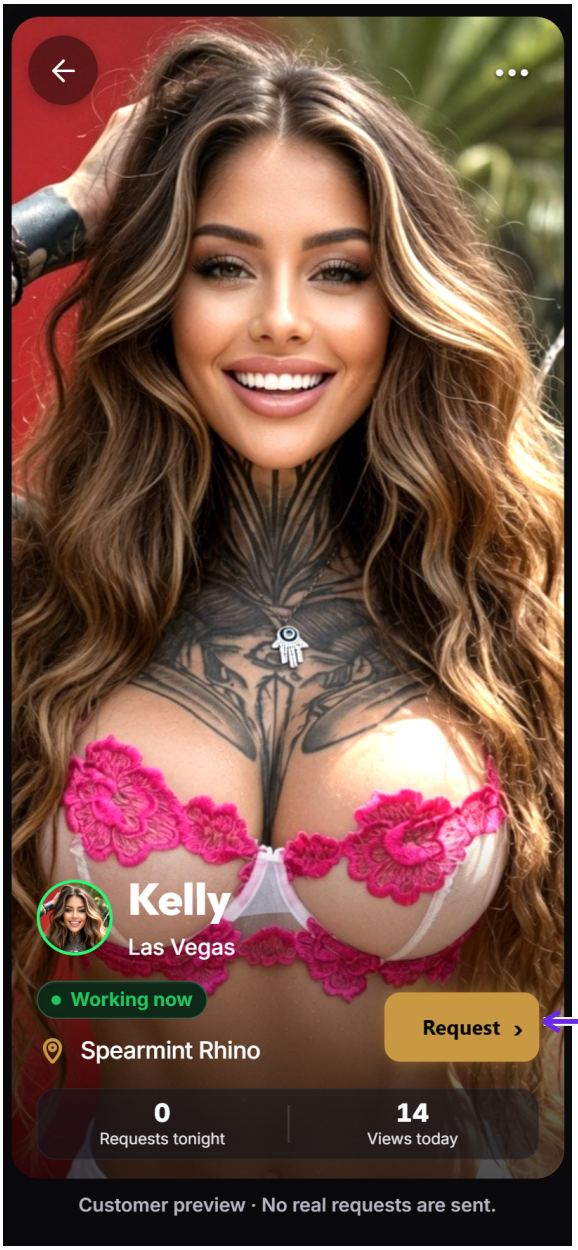

The opened profile also has a branded Request button. Return to the grid when finished.

The dashboard preview does not send real requests or notify club staff. Look for the Customer preview message.

12A The opened dancer profile

The Request button is also available inside the dancer profile.

View internal > tap a dancer picture

1 Find Request

The club-branded Request button sits beside the dancer's working status and club name.

2 Remember preview mode

The Customer preview message confirms that no real requests are sent from this dashboard preview.

3 Return to the grid

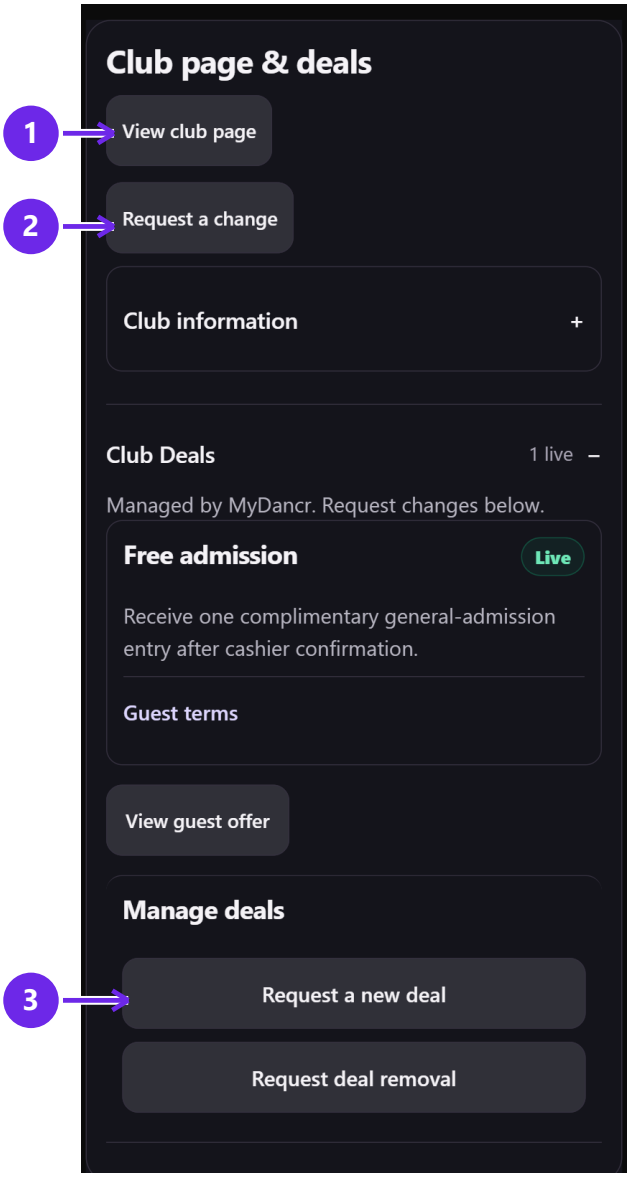

Use the back arrow at the top-left of the profile.

This screenshot was taken from the actual club-dashboard customer preview.

13 Manage your page and deals

Check the published information and request updates from MyDancr.

Club > Club page & deals

Club page controls and deal-change requests.

1 Check the club page

Open View club page. Review the logo, address, phone, website and hours under Club information.

2 Request a page change

Use Request a change and explain exactly what should be updated.

3 Review Club Deals

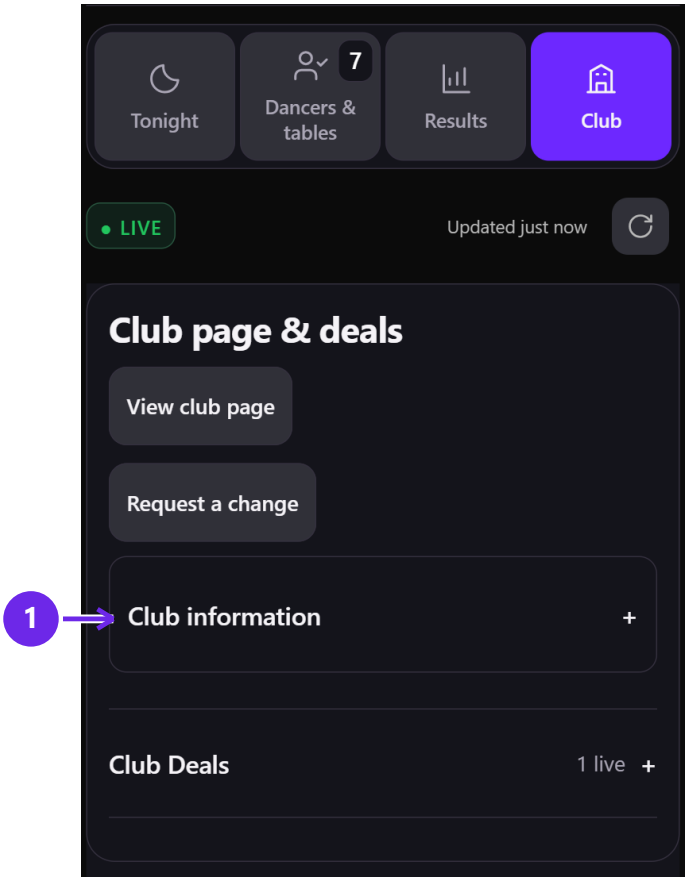

Open the live offer and guest terms. Use Request a new deal or Request deal removal for changes.

Club Deals are managed by MyDancr. A club offer sent to customer Alerts is separate from a public Club Deal. First publication is on the next page.

13A Approve your first club page

Use this page when MyDancr sends your club page for its first review.

Club > Club page & deals > Page review

Rhino's current live Club page & deals section.

1 Check the information

Review the logo, club details, hours and proposed Club Deals.

2 Preview the page

Tap Preview customer experience to see how the page will look to customers.

3 Choose the next action

If something is wrong, use Request changes and describe the correction. When everything is right, tap Approve & make live.

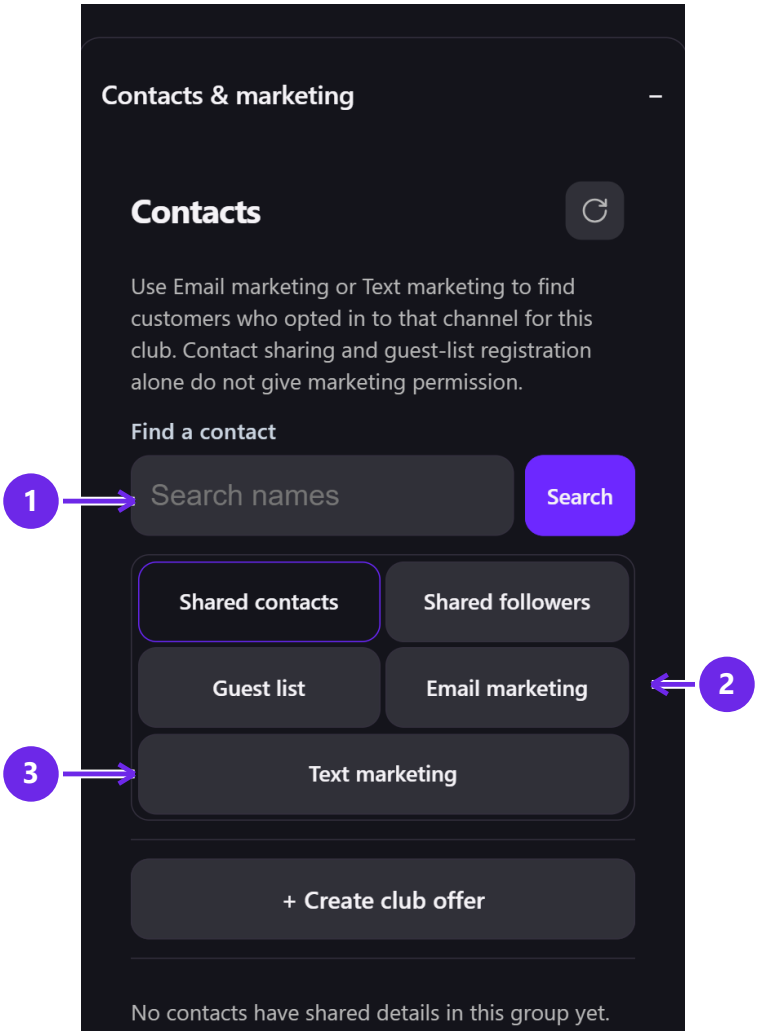

Shown: Rhino is already live. The first-review controls appear only when your club is awaiting its first publication.

Approve & make live publishes the club page. These first-review controls are not shown once the club is already live.

14 Use contacts correctly

Find shared contacts and check the channel they have opted into.

Club > Contacts & marketing

Separate email and text marketing filters.

1 Find the contact

Search for the customer. Shared contacts, Shared followers and Guest list help you locate them.

2 Check email permission

Use Email marketing to find contacts who opted into club marketing by email.

3 Check text permission

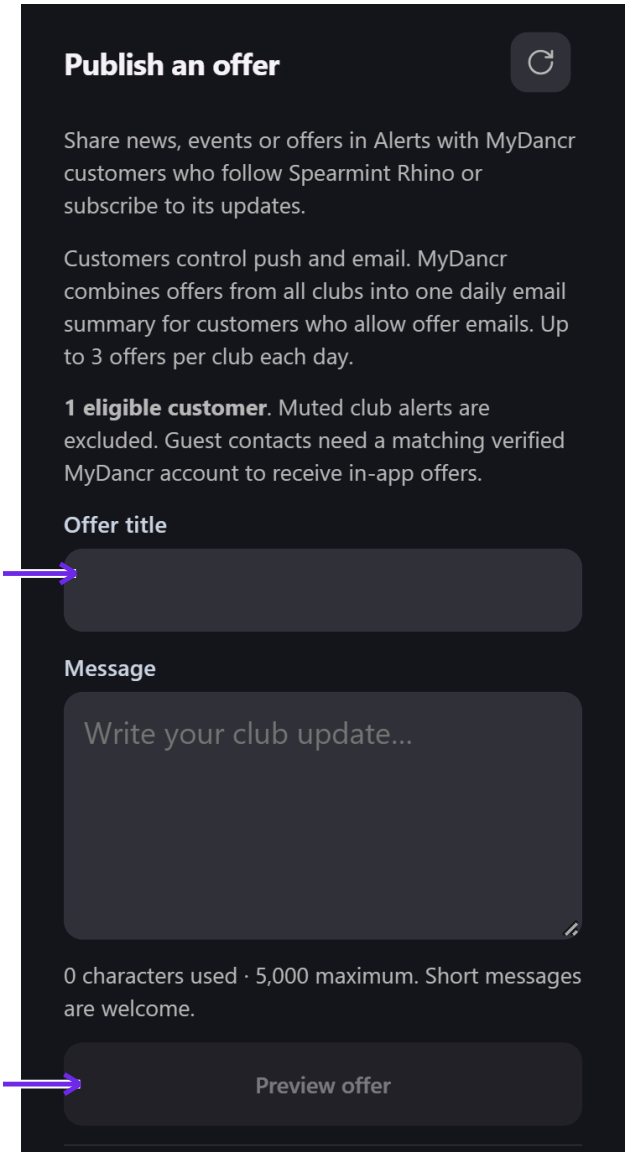

Use Text marketing for text opt-ins. Use only the channel the customer has chosen.

A shared email, follow or guest-list entry is not automatically permission to send marketing emails or texts.

15 Publish a club offer

Share news, events or offers with eligible customers in their Alerts.

Club > Contacts & marketing > Create club offer

The actual offer form before text is entered.

1 Write the offer

Tap Create club offer. Enter a short Offer title and a clear Message.

2 Preview it

Choose Preview offer. Check the message and audience count. Use Edit message if it needs changes.

3 Publish

Tap Publish to [number] customer Alerts. Find earlier offers under Recent updates to View message or Withdraw offer.

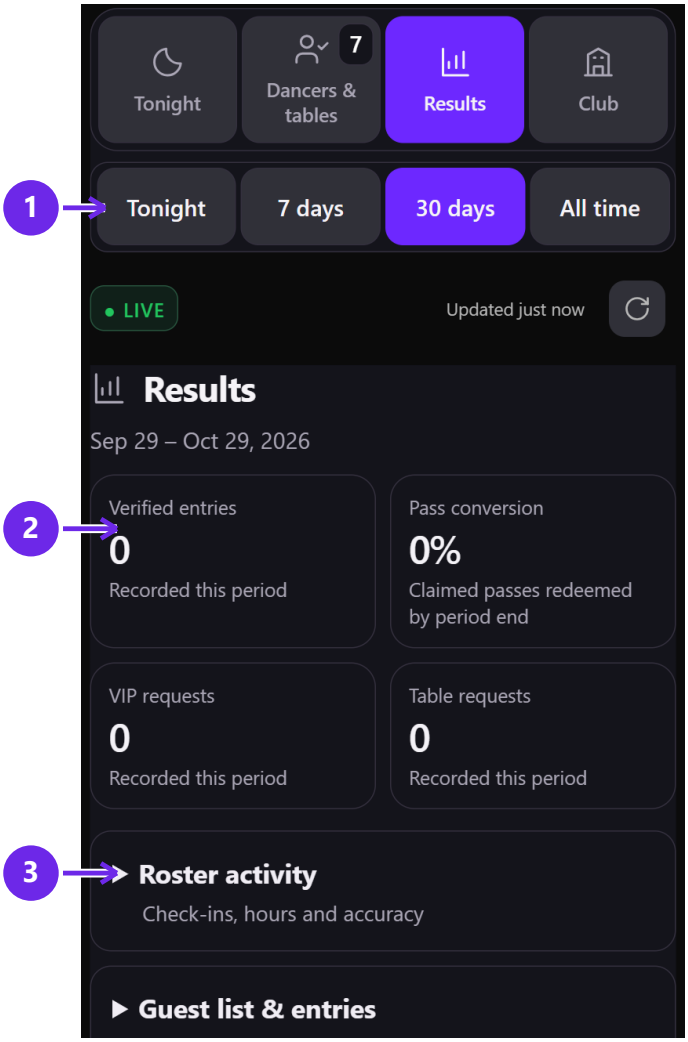

The blank composer is shown. Preview and publish become available after you enter the offer.

Up to 3 offers per day. Customer preferences control email and push delivery. Publishing does not change a public Club Deal.

16 Read club results

Start with a time period, then open the area you want to understand.

Club dashboard > Results

Choose the time period, then expand a results section.

1 Choose the period

Select Tonight, 7 days, 30 days or All time. Check the dates and club time shown.

2 Read the top figures

Review Verified entries, Pass conversion, VIP requests and Table requests.

3 Open more detail

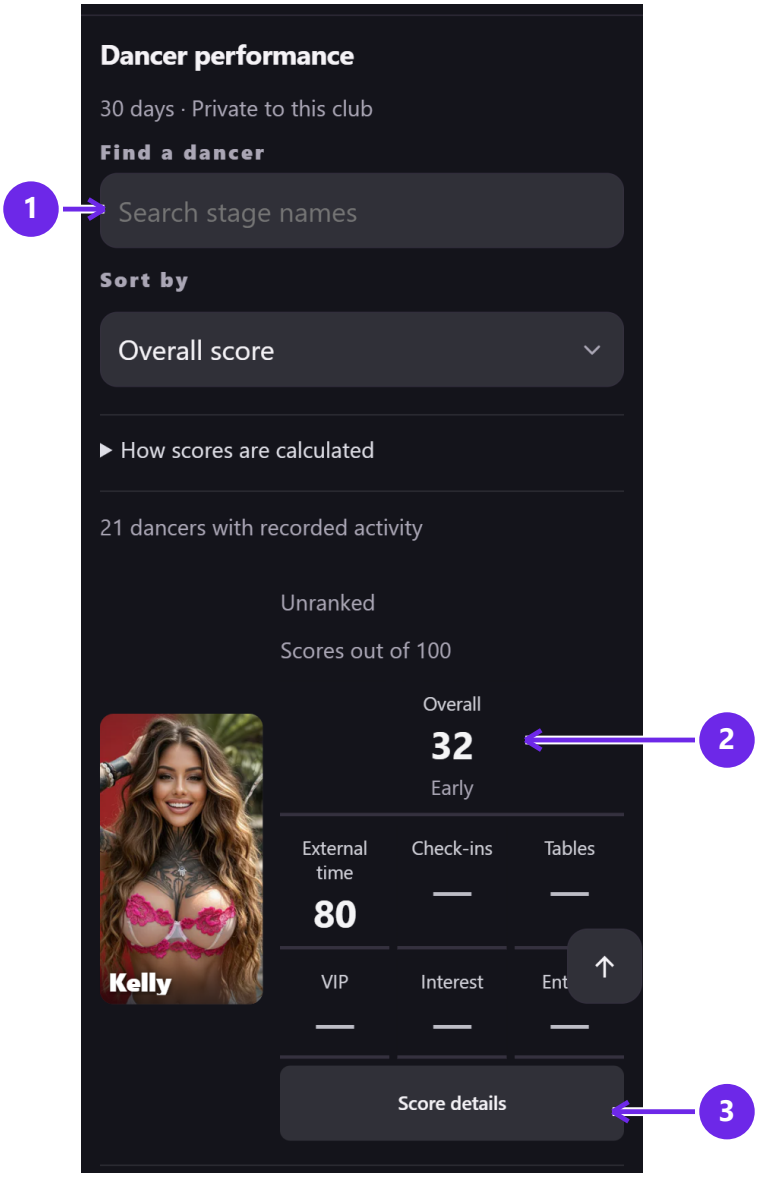

Expand roster activity, guest list and entries, VIP demand, tables, customer interest, transportation or dancer contribution.

Customer interest also contains Customer actions and MyDancr TV. Clicks, requests and Going signals are not verified entries or revenue.

17 Read dancer performance

Use the scores as a view of recorded club activity for the chosen period.

Results > Dancer contribution

A real performance card with Score details.

1 Find a dancer

Search the stage name or change Sort by. The selected Results period applies here too.

2 Read the categories

Overall combines activity. Categories include External time, Check-ins, Tables, VIP, Interest and Entries.

3 Open Score details

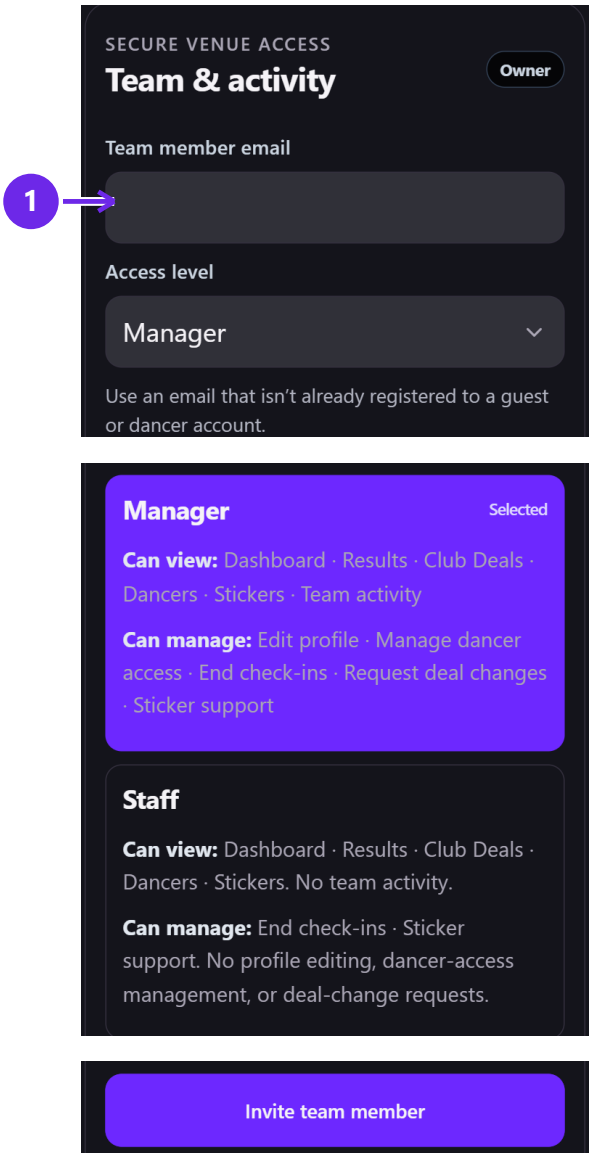

Check the inputs. Open How scores are calculated or Additional dancer insights for more explanation.

Scores are out of 100. Early means limited data; a dash means not enough data. Unranked is not a poor rating.

18 Manage team access

Give each team member their own account and the right level of access.

Club > Team & activity

Actual form, access-level descriptions and Invite button.

1 Invite a team member

The owner enters their email, chooses Manager or Staff, then taps Invite team member.

2 Maintain access

The owner can change a role, remove a member or revoke a pending invitation. Do not share the owner login.

3 Review recent activity

Owners and managers can see the club activity history, including media decisions and page changes.

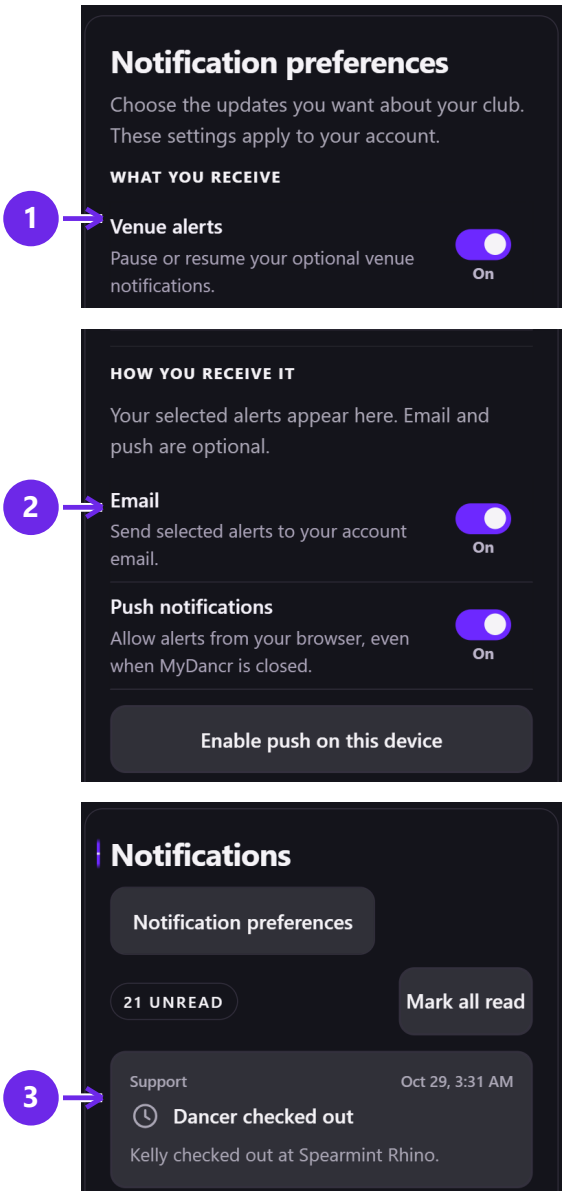

Owner controls shown. Use an email not already registered as a customer or dancer.

Managers have broader review and management controls; staff have a limited view. Owner access cannot be granted by invitation.

19 Set and read notifications

Choose your alerts and read the dashboard inbox during each shift.

Club > Account > Notification preferences

1 Choose the alert types

Keep Venue alerts on. Select the categories you need, including Venue page & media for approvals.

2 Choose delivery

Set Email and Push. For device alerts, tap Enable push on this device and accept the browser prompt.

3 Check Notifications

Read dashboard alerts under Account. Mark all read clears unread badges; Clear all clears the inbox.

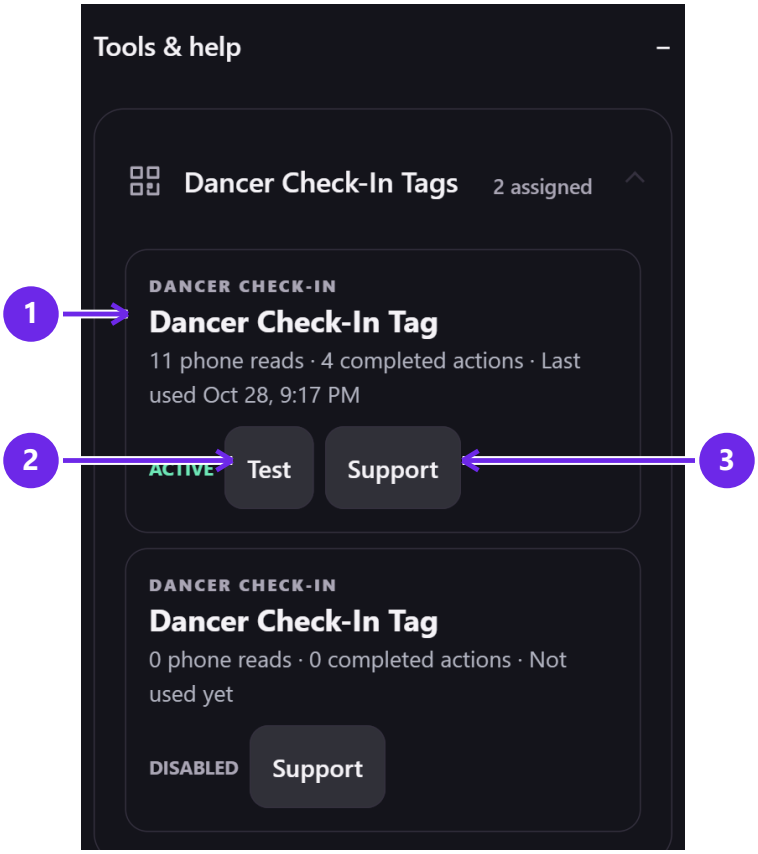

Three actual screen crops: alert categories, delivery settings and the dashboard inbox.

Performance updates include the weekly summary on Mondays at 9 a.m. in club time. Phone and email-app notification settings also affect alerts.

20 Test a check-in tag

Check a tag is active, test a phone tap or request help with the tag.

Club > Tools & help > Dancer Check-In Tags

One active and one disabled tag are shown.

1 Find the tag

Check its label, status and recent activity. Dancer check-in tags are separate from customer table tags.

2 Run a tap test

Tap Test on an active tag. Hold an unlocked phone near the physical tag within 60 seconds. Look for confirmation.

3 Request support

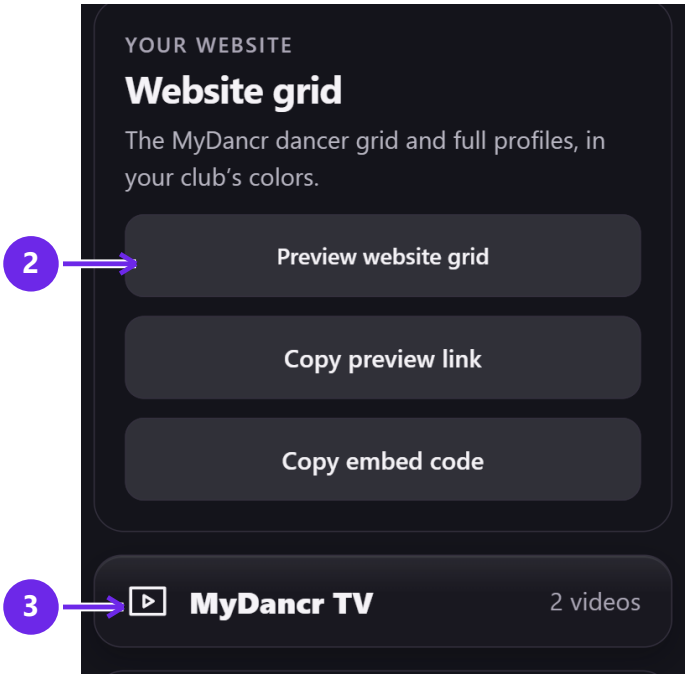

Tap Support, select the issue, describe the problem and location, then Send request.

Use Support for damaged, lost, moved or replacement tags. Only active tags show Test. A test checks the tag read, not a dancer approval.

21 Find the website grid and TV

Open the website-grid preview from here to see the embedded club site.

Club > Tools & help

Preview website grid is above the copy buttons.

1 Open Tools & help

Choose Club, then expand Tools & help and find Website grid.

2 Open the embedded-site preview

Tap Preview website grid. Copy preview link shares that view; Copy embed code gives your website team the code to install it.

3 Open the video feed

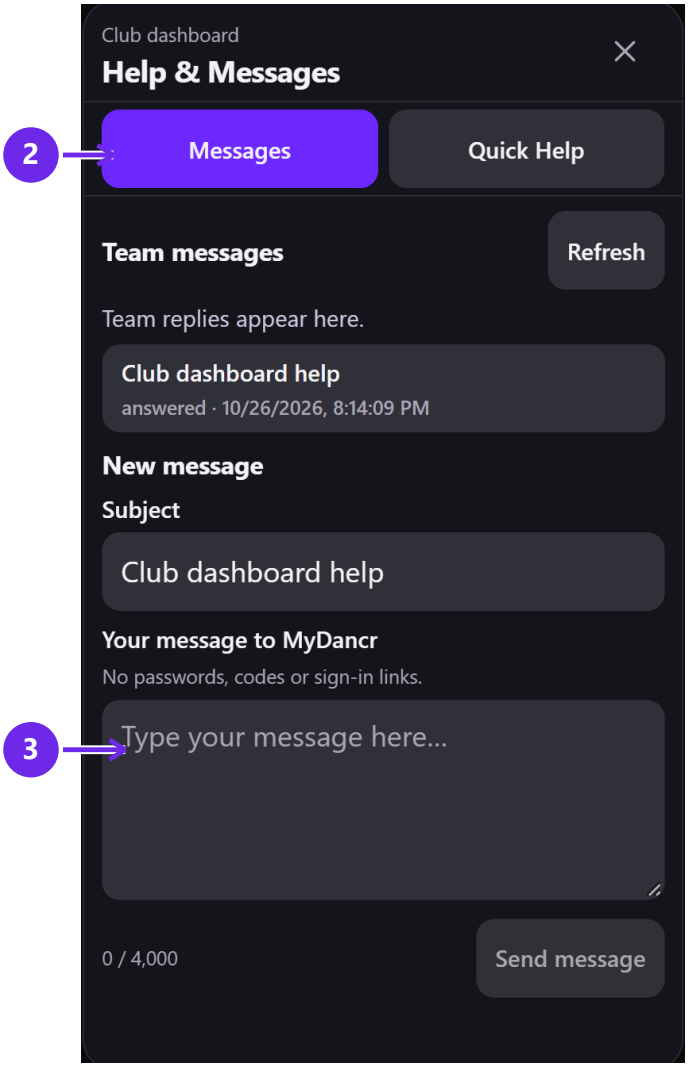

Tap MyDancr TV below Website grid to view the club feed. Its launcher shows the available video count.

Website grid is available when the club is live. The screenshot shows the exact Preview website grid button to open the embedded site.

22 Account, help and fixes

Check account details, get help and sign out when you finish.

Club > Account | Help & Messages

The real Help & Messages panel.

1 Check your account

Open Account for your email and account status. Contact MyDancr if a detail needs correcting.

2 Get help

Open Help & Messages. Use Quick Help for instructions or Messages to contact the MyDancr Team and read replies.

3 Fix a loading problem

Refresh the section. If your sign-in expired, sign in again. Send the screen name and error in Messages if it continues.

4 Sign out safely

Use Sign out on a shared device. Disable, Remove club and Delete are separate account actions; read their confirmation before using them.

Owner Disable pauses the club and team. Remove club ends participation and check-ins; dancer accounts and media remain. These are not routine end-of-shift actions.
