Club Admin

Owner / club administrator - keep the club ready

Earlier owner-supplied app capture. Arrows match numbered steps.

1. Check the club. Manage venue: identity, LIVE/hidden status, official information and active Club Deal. A hidden approved venue may need a deal correction.

2. Assign coverage. Tonight: name the duty manager and media reviewer. Check the live queues, working roster and shift handover.

3. Maintain access. Owner: Team & activity > email > Manager/Staff > Invite team member. Revoke unused invitations and remove departing staff.

4. Publish the package. Review facts/terms > Preview customer experience > Approve & make live. Need changes? Write the correction > Request changes.

5. Check guest-facing links. MyDancr admin creates the QR codes. Send table numbers through Support; receive, check and place the supplied signs. Request NFC stickers through Support. Manage venue > Website grid: Preview website grid, then Copy embed code for that location.

REMEMBER Club Admin means the venue team, not MyDancr admin. Owner manages team access; managers handle operations and media reviews. Staff cannot approve media.

IF BLOCKED Wrong access or hidden venue? Check membership, account, active deal and publication state; then use Support.
