Content approval

Assigned club owner or manager - review before release

Earlier app capture. Arrows match numbered steps.

1. Open the correct queue. Owner/manager account > Dancers & tables > Media approvals > Refresh. Confirm club, dancer and asset. New dancers join after their NFC tap.

2. Inspect the whole file. Photo: full frame and crop. Video: every scene and all audio. Check people, coverage, logos/contacts, prohibited conduct, rights and AI findings.

3. APPROVE. Complete preview reviewed, no unresolved policy or rights issue, technical checks complete. Press Approve when enabled; wait for confirmation.

4. REJECT. Clear correction: specific Review note > Reject. Example: "Another person is visible in the mirror. Replace with a photo showing only you."

5. ESCALATE. Missing preview, processing, changed file, or uncertainty about age, identity, consent or rights: leave private and contact the club lead/platform team. There is no Escalate button.

6. Verify and continue. Uncertain save? Refresh first. Check eligible publication after approval. Previous / Next covers the full queue. Review replacements anew.

REMEMBER AI passing is not approval. One approval can release media across eligible surfaces. Text/venue-branding edits need the separate release checklist.

IF BLOCKED Keep uncertain content private. Send club, dancer, upload reference and exact issue to the platform team; do not circulate sensitive source material.
