Managers & talent

Duty manager - accurate roster, prompt responses, clear handover

Earlier app capture. Arrows match numbered steps.

1. Open Tonight. Refresh; compare Working now with the floor. Assign Table requests, Guest list, VIP and Ride requests to named people.

2. Maintain the roster. Dancers & tables > search/filter. Portrait opens profile. (...) > End check-in when someone leaves; Remove access is a separate access change.

3. Record table outcomes. (...) > Request details > Mark seen > Mark arrived > Complete. Use Didn't arrive at table or Dismiss for the actual alternative outcome.

4. Handle guests. Pass: Scan pass > verify > Admit guest & redeem pass. VIP: check availability > Confirm request / Decline. Ride: contact guest, then update Ride status.

5. Close and hand over. Results: use the same club/period for comparisons. Keep rank details with management. Hand over each open reference with status, next action and owner.

REMEMBER Seen is not arrived. A request is not a booking. Clearing a notification does not finish the task. VIP guests sign in at /vip.

IF BLOCKED For a queue error, refresh and check the existing record before repeating an action. Report club, time, reference and message.
