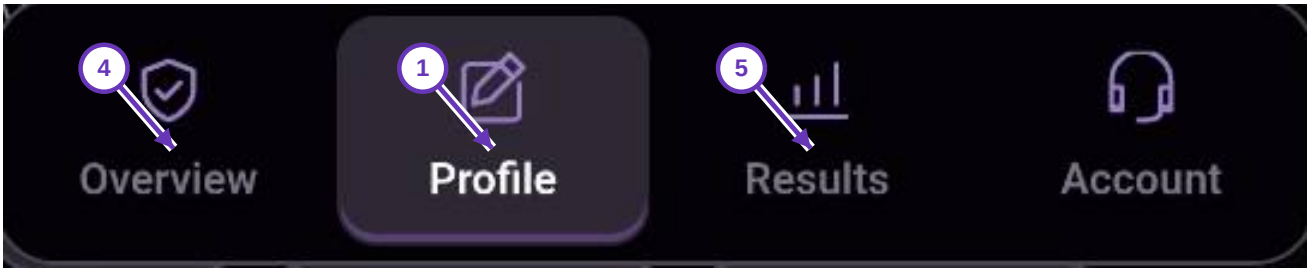
Dancers

Your profile, your uploads and your working status



App navigation reference; arrows match the numbered tasks below. Earlier screenshot layout.

1. Build your profile. Profile > stage name + city > wait for Saved. Add at least 3 profile photos in total, including a main photo. The avatar is created from the main photo.

2. Add photos and videos. Photos: Gallery / Camera; JPEG, PNG, WebP, HEIC or HEIF, up to 25 MB. Video: both permissions > Choose video / Record video; MP4, WebM or MOV, vertical/square, 1-30 seconds, up to 25 MB.

3. Finish onboarding. Accept the agreement and complete Verify 18+ if required. Tap the club's dressing-room sticker. Your club reviews pending media after this connection.

4. Choose and manage the shift. Internal only, External only or Both. Check Overview > Working Now. When leaving: End Working Now > Yes, end now. A check-in lasts up to 6 hours, then a 6-hour cooldown; retapping does not extend it.

5. Check results and visibility. Results shows your activity. Profile > Visibility & sharing controls Incognito and Copy link. Public visibility is separate from club check-in.

Remember: Only you in the upload; follow coverage rules; no logos, watermarks or contact details. Pending content is private until human approval.

Need help? Rejected? Read the reason and correct it. Wrong-account warning? Recover the original account. Never share passwords or ID files with club staff.
