

LEGAL REVIEW PACKET

Factual Product Map + Draft Agreements and Policies

PREPARED FOR	Specialist adult-entertainment counsel
PRODUCT	MyDancer · mobile-first web application
REVIEW DATE	August 21, 2026
PILOT	Arizona · city/county to be selected after local review
STATUS	Attorney review draft · not approved for publication

This packet is a product-informed drafting aid for licensed counsel. It is not legal advice, a legal opinion, or a substitute for jurisdiction-specific review.

How to use this packet

This packet combines a factual product map with draft public policies and bilateral agreements for specialist counsel. It is deliberately written from the product's actual roles, database concepts, verification gates, public/private surfaces, Club Deal attribution, NFC events, moderation workflow, and finance ledgers. Counsel should use the product map to test every promise in the operative drafts and should resolve the decision register before any document is published or accepted by users.

COUNSEL · Drafting status

This is a working draft for licensed counsel. It is not legal advice, is not a legal opinion, and is not approved for publication or user acceptance. It records current product behavior, business-approved commercial positions, and identified implementation gaps so specialist counsel can refine the operative documents. The publishing entity, governing law, dispute procedure, addresses, tax treatment, settlement schedules, retention schedule, and insurance requirements must be finalized by counsel.

PRODUCT FACT · Production providers and settlement model

The current model has no separate age-verification service. Too Much Media's NATS affiliate platform is the selected dancer-commission settlement system: MyDancer calculates an eligible commission and exports the exact U.S.-dollar amount to the dancer's verified NATS affiliate account. Clubs owe MyDancer negotiated, Club-Deal-specific referral fees and settle verified redemption statements once each week by ACH. Counsel must verify the contracting entities, account terms, geographic availability, KYC/tax allocation, privacy roles, settlement timing, fees, reserves, and operational responsibilities against the signed production contracts before publication.

Packet contents

1. Executive counsel dashboard and decision register.
2. Factual product map and end-to-end data, payment, commission, upload, verification, notification, and deletion flows.
3. Draft Terms of Service.
4. Draft Privacy Policy.
5. Draft Dancer Agreement.
6. Draft Club Agreement.
7. Draft Content and Media Consent/License.
8. Draft Acceptable Use and Prohibited Conduct Rules.
9. Draft Account Eligibility and Venue-Verification Policy.
10. Draft DMCA and Takedown Policy.
11. Draft Club Deal and NFC Redemption Terms.
12. Draft Dancer Commission and Too Much Media/NATS Settlement Terms.
13. Draft Moderation, Reporting, Suspension, and Appeals Policy.
14. Draft Data-Retention and Account-Deletion Policy.
15. Implementation checklist, acceptance matrix, and selected primary authorities.

Executive counsel dashboard

Product position

MyDancr is a mobile-first discovery and promotion platform for lawful adult-entertainment clubs and adult dancers who are legally permitted to work at those clubs. It lets users discover public dancer profiles, public club pages, venue-confirmed affiliations, current or upcoming schedules, short promotional media, directions, admission or line-access Club Deals, and MyDancr TV. It lets clubs maintain pages, teams, rosters, Club Deals, venue media, NFC tags, and referral-fee records. It lets dancers manage their public profiles, media, social links, venue affiliations, shifts, visibility, analytics, and commissions. It supports follows, favorites, “going” signals, notifications, support, reporting, DMCA notices, moderation, and account controls.

MyDancr is not a booking service for private performances, escorting, prostitution, sexual services, dating, personal messaging, alcohol sales, employment placement, payment for dancer services, or transportation. Directions and rideshare links are convenience links. Club Deals are limited to lawful admission or line-access benefits and remain subject to the club’s capacity, age, dress-code, licensing, and house rules.

HIGH RISK · Core boundary

Every public description, onboarding screen, sales or marketing script, moderation rule, and club workflow must preserve the line between lawful club promotion and arranging sexual services. The platform should not enable pricing, booking, messaging, negotiation, or payment for private or sexual services.

Current drafting positions

- **Age floor:** no one under 18 may create or use an account; clubs may impose a higher age threshold, including 21, and dancers must meet every work-card, licensing, and venue requirement.
- **Dancer public gate:** a first-time dancer’s profile remains private until required profile information and media are approved and an authorized club representative confirms a venue affiliation through the approved verification flow.
- **Ongoing affiliations:** after initial approval, a dancer may seek additional or replacement club affiliations from the dancer workspace. Shifts may be posted only for clubs with an active approved affiliation.
- **Working Now:** a production Working Now state is created by a time-limited, server-validated presence event, such as an approved dressing-room NFC tap. Demo-locked data cannot generate commissions.
- **Club Deals:** only admission and line-access offers are permitted. Alcohol, drink, bottle-service, sexual-service, gambling, cash-equivalent, or unlawful offers are prohibited. Each published Club Deal must have a negotiated Deal Order stating that offer’s referral fee and commercial terms; a different offer may have a different fee.
- **Redemption:** a Club Deal becomes verified only after server confirmation tied to the correct club’s approved cashier NFC tag and the deal’s valid redemption token.
- **Dancer commission:** only an eligible Club Deal redemption whose immutable source originated from a dancer’s public profile and that is successfully confirmed by the correct authorized cashier NFC tag counts toward that dancer’s monthly tier. The dancer earns **30% on qualifying monthly redemptions 1–9, 40% on 10–24, and 50% on 25 and above**, calculated from the applicable MyDancr gross referral fee—not admission price, deal face value, club gross revenue, tips, or dancer-service compensation.
- **Separate ledgers:** the club’s obligation to MyDancr and MyDancr’s obligation to the dancer are independent. A club’s late payment does not, by itself, cancel an otherwise payable dancer reward.
- **No live agent commission program:** the current product does not promise or operate an agent commission program. A future program would require separate product work, counsel review, written terms, event attribution, tax/compliance controls, and renewed acceptance; no recruiting or downline compensation is permitted.
- **Account eligibility and club verification:** the current no-nudity model does not use a separate age-verification vendor or require routine document, selfie, biometric, or date-of-birth collection by MyDancr. Users make contractual eligibility representations; public dancer profiles still require approved media and an authorized club’s confirmation of a legitimate affiliation. Clubs remain responsible for admission-age checks, work eligibility, licensing, and venue compliance.

- **Dancer commission settlement:** eligible dancer commissions are exported through the dancer's verified NATS affiliate account on Too Much Media's platform. MyDancr stores the minimum account linkage and immutable export/reconciliation record and does not process a second direct settlement while NATS is the active settlement provider.
- **Club settlement:** each club receives itemized weekly statements for verified redemptions and pays MyDancr once each week by ACH under the applicable Deal Order. The ACH authorization or credit instructions, cutoff, holidays, returns, disputes, taxes, and suspension rules must be finalized in the club order.
- **Media:** uploads undergo technical validation and automated and/or human moderation. Nudity and actual sexually explicit conduct are prohibited. Public media must belong to the uploader, depict consenting adults, comply with platform rules, and remain within current duration/count limits.
- **No direct messaging:** the current product does not offer customer-to-dancer direct messaging. Support messaging is between an account holder and MyDancr support.

Decisions counsel must finalize

1. Identify the exact operating legal entity, state of formation, principal address, support address, privacy request address, legal-notice address, and DMCA agent.
2. Treat Las Vegas/Nevada as the existing demo market and Arizona as the planned first pilot market. Before the Arizona pilot, select the exact city/county and prepare an Arizona state-and-local addendum covering adult-entertainment and club licensing, advertising and admission offers, privacy/security, tax, worker/referral issues, ACH authorization, and any municipal entertainer/work-card requirements.
3. Confirm the contractual account-eligibility representation and whether customers must be 18+, 21+, or may browse without an age representation while clubs enforce their own lawful admission rules.
4. Approve the club-authority and dancer-affiliation workflow, including any limited evidence required for suspicious accounts, reviewer access, retention, appeals, and fallback. The current model does not include routine MyDancr age verification, identity-document collection, or selfie/biometric matching.
5. Review and approve the Too Much Media/NATS production contract and business configuration, including the exact contracting entity, dancer affiliate onboarding, KYC/tax allocation, export and payment cadence, minimums, reserves/holds, rejected or ambiguous transactions, fees, supported countries/currencies, complaints, reconciliation, and unclaimed-property handling.
6. Confirm that no agent commission program will launch under these drafts. Any later agent program requires a separate agreement, implementation, acceptance flow, and legal review before any promise or accrual.
7. Approve the Deal Order template for negotiated offer-specific referral fees and weekly ACH settlement, including offer terms, fee formula, statement period, authorization/credit method, debit or due day, holidays, returns, disputes, taxes, late fees, suspension, and collection; also confirm the nonretroactive profile-originated dancer tiers—30% for monthly events 1–9, 40% for 10–24, and 50% for 25 and above—against tax, worker-classification, referral, and gaming/sweepstakes concerns.
8. Choose governing law, venue, arbitration/class-action waiver, small-claims carveout, opt-out process, and consumer-law savings language.
9. Approve warranty disclaimers, liability caps, indemnities, insurance minimums, and special allocation for clubs, dancers, customers, and the platform.
10. Approve exact retention periods by record class, including media, moderation evidence, NFC/device logs, geolocation, finance/tax records, DMCA, support, reports, account-recovery events, and backups.
11. Confirm Nevada requirements for the existing demo market and Arizona state plus selected-city/county requirements for the pilot, including privacy/security and breach notice, consumer protection, employment/privacy, adult-entertainment licensing, and tax; evaluate other state and international regimes only before further expansion.
12. Confirm communications compliance for push, email, and any future SMS, including consent, quiet hours, marketing classification, opt-out, and recordkeeping.
13. Approve the appeal standard, response targets, emergency suspension authority, repeat-infringer rule, law-enforcement process, and preservation/legal-hold protocol.
14. Determine worker-classification, referral, tax, ACH/NACHA, and local licensing consequences without implying that MyDancr employs dancers or controls club performance work.

COUNSEL · Counsel direction on content and verification

At counsel's direction, this packet does not propose §2257/§2257A producer-recordkeeping, labeling, custodian, or inspection obligations and does not assume a separate age-verification service because nudity and actual sexually explicit conduct are prohibited. MyDancr continues to require truthful eligibility representations, consenting-adult content, ownership, moderation, venue-confirmed dancer affiliations, and prompt safety escalation. Counsel should revisit this conclusion if accepted content categories, applicable law, or MyDancr's production role materially changes.

COUNSEL · Arizona pilot

The planned first pilot outside the Las Vegas demo market is Arizona. The operative documents should identify the selected Arizona launch city/county only after the club pipeline and local licensing review are confirmed.

Part I — Factual Product Map

1. Product purpose and lawful boundaries

MyDancer's customer-facing purpose is to answer: who is publicly approved, who is currently working at a confirmed club, who has an upcoming posted shift, where the club is, what lawful admission or line-access benefit is available, and what promotional media the dancer or club has published. Its club-facing purpose is to maintain accurate public venue information, verify affiliations, manage authorized staff, publish allowed offers, operate approved NFC touchpoints, and review referral activity. Its dancer-facing purpose is to establish a public professional profile, publish compliant promotional media and social links, obtain club-confirmed affiliations, post eligible shifts, control visibility, and view attributable reach and rewards.

The product should never be described as guaranteeing that a dancer is physically present, available to a particular patron, employed by a particular club, willing to interact, or offering any private service. A current status is a time-limited signal derived from approved data. Club admission and access always remain within club control.

2. Account and actor map

Customer

A customer may browse qualifying public pages without an account, subject to session-based analytics and fraud controls. A registered customer uses email/password authentication and a private customer profile that can include city and notification preferences. Customer features include following dancers and clubs, saving or favoriting content and deals, using "going" signals, receiving notifications, viewing directions, and participating in Club Deal redemption. The service does not expose a customer's identity or contact details to dancers as a communication channel.

Dancer

A dancer creates an email/password account, selects a city, and enters a private onboarding workspace. Private data may include legal identity or verification readiness; public data may include stage name, city, avatar, profile photos, short videos, bio, official social links, approved club affiliations, schedule status, and engagement counts. The dancer controls public visibility subject to approval, moderation, affiliation, account-state, and safety rules.

Club

A club account is created through an administrator-issued single-use access code or authorized team invitation. Club accounts are associated with a venue record. Team access is segmented into owner, manager, or staff permissions. Club features include public profile management, cover media, roster/affiliation review, allowed Club Deals, club video, NFC tag support, team invitations, billing/finance visibility appropriate to role, and activity logs.

Administrator and support

Administrators review profiles, photos, videos, social links, clubs, claims, affiliations, Club Deals, reports, support escalations, DMCA cases, NFC lifecycle, finance events, and operational health. Elevated actions should be role-restricted and audited. Support agents can respond within the authorized support scope and must not request passwords, reset codes, unnecessary government identification, NATS credentials, or bank/ACH credentials by ordinary email.

No current agent account or commission role

The audited product does not operate an agent account or agent commission program. A club team member, referral source, recruiter, or person who assists with onboarding is not entitled to compensation through MyDancer. Any later agent role would require a separate product map, agreement, acceptance flow, attribution ledger, tax/compliance process, privacy disclosure, and counsel review before launch.

3. Authentication and account lifecycle

Authentication uses email and password with email confirmation and password-reset flows. Role is assigned on approved signup paths. Venue registration requires a valid code or invitation. Administrative signup is separately protected. Account settings support email and password changes, disabling, and deletion. Password changes should invalidate other sessions and trigger a security notice.

Account recovery is a support workflow for signed-out users who no longer control the registered email. It accepts an account description, city, reachable email, and details; creates an auditable support/report record; and sends a reference. The workflow must not disclose whether a particular email is registered and must not invite sensitive credentials over email.

4. Dancer onboarding and public eligibility

The first-time dancer flow is staged: create the account; make the required eligibility and truthful-account representations; save stage name and city; upload and approve an avatar; upload the required profile photos; optionally add social links and videos; preview the complete customer-facing profile; submit; and complete first venue verification through an approved club touchpoint. The public preview should use the same rendering and approved content that a live profile will use, while clearly identifying its private preview state.

Public eligibility is the conjunction of several conditions, not a single status flag: active account, accepted eligibility representations, approved dancer status, public visibility enabled, no disablement, required approved media, and the required approved venue affiliation. MyDancr does not require routine age-document, selfie, biometric, or date-of-birth verification in the current no-nudity model. Media still pending or rejected does not count toward approval. Deleting media must remove the active database record and associated public/storage reference, subject only to backup, legal-hold, and audit retention described later.

After first approval, the dancer can request or establish additional affiliations through the controlled club verification flow. The dancer can post a shift only for an active club affiliation. This avoids self-assigning a club relationship.

5. Venue affiliation, NFC presence, and geolocation

The dressing-room NFC flow uses an approved venue tag with an unguessable token or digest, lifecycle state, club association, and audit data. A valid tap can activate or update a venue affiliation, complete the initial club gate, or begin a time-limited Working Now session. The server checks account eligibility, tag status, club relationship, event timing, and duplicate/cooldown rules. It records the tap and associated device/IP audit data.

The current product model uses a six-hour Working Now window followed by a six-hour cooldown for the NFC lifecycle. A session should end at the earlier of its server expiry, a valid checkout/end event, administrative action, or account/affiliation invalidation. A new tap must not silently extend a prohibited session. Historical records can retain start/end and summary fields even after the public status ends.

Where geolocation verification is used, the product collects client latitude, longitude, stated accuracy, and reading time for the narrow purpose of confirming proximity to the club. Current implementation controls include a 300-foot maximum distance, accuracy no worse than 75 meters, and a location reading no older than 30 seconds. Raw location should not be exposed publicly or to other users.

Demo-locked Working Now records are fictional demonstration data. They must not impersonate a real NFC tap, create a real affiliation, or generate commission.

6. Shifts and public discovery

A dancer shift has a club, date, start/end time, state, and source. Exact internal times may be used for eligibility and lifecycle controls even when the public interface presents a simpler date/status. Creation and edits must validate dates, durations, affiliation, ownership, and state transitions. Deleting or canceling a shift should not cause uncontrolled screen movement, and historical financial/audit records must not be destroyed if they reference the shift.

Public discovery filters by city and product status. It can show Working Now, Upcoming, and No Schedule Posted groupings, public club pages, trending rankings, and MyDancr TV. Rankings may use profile views, schedule views, follows, favorites, going signals, directions, notification engagement, and social clicks. Rankings are dynamic engagement signals, not endorsements, guarantees of availability, employment rankings, or measures of personal worth.

7. Media, profiles, and MyDancr TV

Profile images and videos are uploaded to controlled storage. The server should validate claimed file type against signature, dimensions, duration, count, size, and ownership; normalize or transcode when needed; strip risky metadata; create display variants; apply branding/watermarks where disclosed; and keep nonpublic review assets out of public buckets. Current video policy allows short uploads of up to 30 seconds and limits the number of profile videos. A video may be published to the profile and feed or, where the workflow supports it, to the feed only.

Moderation uses automated and/or human review. Automated decisions are aids, not guarantees. Review records should identify the asset, version, model or reviewer, decision, reason code, timestamps, and administrative overrides. Media involving minors, nonconsensual imagery, apparent exploitation, actual sexual services, illegal activity, extreme violence, or infringing content must be rejected and escalated as applicable.

Social links are dancer-supplied public links to supported platforms. MyDancr should validate protocol and platform/username format, make clear that third-party sites have their own terms and privacy practices, and remove links used to facilitate prohibited conduct.

MyDancr TV presents approved short video cards with dancer identity, city, eligible schedule/club information, and user controls such as applause/favorite, share, follow, report, mute, and full screen. Feed events may include view, profile visit, club visit, social click, applause, share, and report. Autoplay should be muted by default where browser rules or user expectations require it.

8. Club profiles, teams, and claims

Club records include public name, city/state, address, directions data, website/phone where approved, hours, public media, current roster, schedules, and offers. Clubs control only records within their authorized team scope. Team invitations expire and should bind to a role and venue. Sensitive owner, manager, staff, invitation, billing, and audit data is not public.

Legacy or exceptional venue-claim workflows must verify authority before transferring control. A club's verification of a dancer means only that the club confirms the affiliation represented by the product; it does not mean MyDancr independently guarantees employment status, licensure, hours, conduct, or safety.

9. Club Deals and cashier NFC redemption

Club Deals are club-authored, platform-approved admission or line-access benefits. The permitted types are half-off admission and skip-the-line unless counsel and product formally approve another lawful category. Deals may not cover alcoholic drinks, bottle service, controlled substances, gambling, cash, sexual services, or any unlawful or misleading benefit. Deal terms must state eligibility, exclusions, redemption limits, published hours, capacity, age, dress code, and house-rule conditions.

A customer may select a deal from a club page or from an eligible dancer-attributed context. The server creates a redemption token and locks source, club, deal, and any qualifying dancer/shift attribution. At the club, an authorized cashier NFC tag opens or confirms the redemption. The server validates token status, expiry, club and deal match, tag state, duplication rules, and account/session limits. A user interface alone does not verify redemption.

Current fraud controls include a duplicate-use window of 24 hours per customer or anonymous session. NFC tags can be active, disabled, or revoked, and administrators can provision or rotate them. Redemptions and NFC taps retain device/IP or session audit information proportionate to fraud and security needs.

10. Referral fees, commissions, club receivables, and settlement

MyDancr maintains two independent finance relationships. First, the club owes MyDancr the referral fee stated in the accepted Deal Order for the specific Club Deal that produced each eligible verified redemption. Second, MyDancr owes a dancer a reward for an eligible **Profile-Originated Verified Redemption**. A Profile-Originated Verified Redemption is a nonexpired, nonduplicate, nonfraudulent Club Deal redemption successfully confirmed by the correct club's authorized cashier NFC tag where the immutable server attribution captured before token issuance identifies that dancer's public profile—including an eligible shift or deal surface presented within that profile—as the originating source. The dancer reward is MyDancr-funded and is not legally conditioned on MyDancr first collecting the club's weekly ACH settlement, subject to fraud, reversal, legal hold, or other expressly stated settlement conditions.

The dancer's share is determined by that event's ordinal among the dancer's qualifying Profile-Originated Verified Redemptions for the commission month: **events 1–9 earn 30%; events 10–24 earn 40%; and events 25 and above earn 50% of the applicable MyDancr gross referral fee**. The commission month is the calendar month determined in the verified club's configured local timezone. Tiers are incremental and nonretroactive: reaching a higher tier does not reprice earlier events. The applicable gross referral fee is the negotiated fee for that specific Club Deal—not admission price, deal value, club revenue, tips, or compensation for dancer services. Each event snapshots its monthly ordinal, policy version, applicable gross fee, 3,000-, 4,000-, or 5,000-basis-point dancer share, currency, source profile, Deal Order/deal, club, dancer, shift/context, token, cashier confirmation, and audit data. A club-page-only redemption without dancer-profile attribution creates no dancer reward.

Each Club Deal requires a mutually accepted written or electronic Deal Order stating the exact offer, eligibility, dates/hours, restrictions, per-redemption referral fee or other approved fee formula, currency, weekly settlement terms, and effective dates. A club may negotiate different economics for different deals. A proposed change does not affect an issued or verified redemption unless MyDancr and the club prospectively accept an amended Deal Order. Weekly statements aggregate verified receivables by deal and preserve item-level redemption support. The club pays MyDancr once each week by ACH under the accepted Deal Order.

Too Much Media's NATS affiliate platform is the selected dancer-commission settlement system. An eligible dancer must provide and maintain a verified NATS affiliate account. MyDancr exports the exact eligible U.S.-dollar commission amount to that account and stores the minimum linkage, immutable export ledger, state, attempt, error, reconciliation, reversal, and provider reference needed to prevent duplicate settlement and resolve ambiguous outcomes. Too Much Media/NATS may separately collect identity, address, tax, sanctions, payment-account, device, and transaction data under its own terms. MyDancr should not copy full external payment credentials into its ordinary database. No live agent commission program is included in this packet.

IMPLEMENTATION • Finance-model gap

Production code already supports NATS affiliate-account linkage and a durable commission-export ledger, but the club side still models a venue-level referral-fee term and monthly Stripe-oriented invoicing. Before the revised commercial terms are accepted, engineering must implement Deal-Order-specific fee snapshots, weekly itemized statements, the selected ACH debit or credit workflow, returns/retries and reconciliation, and matching tests. The legal drafts below describe the business-approved target model; this callout prevents that target from being mistaken for completed production behavior.

11. No agent referral program

No agent program, commission, or payment should be inferred from a club team role, customer referral, introduction, demo, or onboarding assistance. Any future agent model is outside this packet and must not launch without separate counsel-approved terms and completed product, attribution, tax, privacy, and settlement controls. Recruiting another agent or building a downline is prohibited.

12. Notifications and communications

In-app notifications cover shift postings/updates/cancellations, ranking milestones, approval state, weekly summaries, support messages, video moderation, DMCA, affiliation state, and club-claim state. Optional push is delivered through OneSignal; transactional email is delivered through Resend or Postmark; Supabase may deliver authentication email. Customer preferences include followed dancers/clubs, working tonight, new shifts, schedules, club changes, and cancellations.

Marketing and transactional messages must be classified separately. Marketing email needs compliant sender identity, postal address, and opt-out. Push and any future SMS require appropriate consent, preferences, revocation, and records. Security, account, legal, commission-settlement, ACH, and support messages may be sent despite marketing opt-out when necessary for the service relationship.

13. Reporting, support, moderation, and DMCA

Users can report profiles, clubs, videos, offers, and other supported targets. A report record includes reporter/account or contact context, category, description, target, state, timestamps, and administrative actions. Support uses threads and messages, may use AI-assisted drafting or triage, and escalates to administrators. AI support should not make legal, safety, financial-settlement, or approval decisions without authorized review.

DMCA intake collects claimant identity/contact, copyrighted work, location of material, good-faith statement, accuracy/perjury statement, and signature. Counter-notice collects the required statements, consent to jurisdiction, service-of-process acceptance, and signature. Administrative actions include restriction/removal, forwarding, restoration, strikes, and repeat-infringer enforcement. A public designated-agent page is maintained and must match the Copyright Office registration.

14. Account deletion, cleanup, and legal retention

An authenticated deletion request marks the account deleted and removes the authentication user. Related profile and ordinary content records may cascade or be cleaned up. Public access should cease promptly. Storage objects must be included in deletion jobs rather than relying only on database cascade. Backups expire on their normal cycle.

Some records cannot be deleted immediately: verified redemptions; Deal Orders; weekly statements and ACH records; commission, NATS export, and tax records; security/fraud events; moderation and consent evidence; DMCA notices/counters/strikes; support and legal correspondence; club agreements; and records subject to a legal hold. These retained records should be minimized, access-restricted, and used only for the applicable legal, accounting, security, or dispute purpose.

15. Primary systems and external providers

- **Vercel:** application hosting, request and deployment logs.
- **Supabase:** PostgreSQL database, authentication, storage, session and operational services.
- **OpenAI moderation service:** content signals for eligible uploads; human/administrator override remains possible.
- **OneSignal:** optional push notification identifiers, preferences, and delivery events.
- **Resend or Postmark:** transactional email address, message metadata, delivery state, and limited content.
- **Google Maps/directions services:** map or destination requests; direct links may expose data to Google under its terms.
- **Rideshare deep links:** destination and device/browser context sent when the user chooses the link; no implied partnership.
- **Account eligibility:** contractual eligibility and truthful-account representations stored with the accepted agreement version. The current model has no separate age-verification integration and no routine MyDancr collection of date of birth, exact age, identity-document images, selfies, or biometric media.
- **ACH processor and banking partners for club settlement:** club legal/account identifiers, authorization or payment instructions, weekly statement amount, status, return code, trace/reference, and reconciliation data. The actual processor and allocation of authorization, notices, retries, fees, and security duties must match the signed production setup.
- **Too Much Media/NATS:** dancer affiliate-account linkage, account status, exact commission export, provider transaction/reference, processing status, failure or reconciliation state, and any KYC/tax/payment data processed independently under Too Much Media/NATS terms. The contracted entity and production configuration must match the signed agreement.

IMPLEMENTATION · Launch synchronization

Before publication, product and counsel must compare this map against production environment variables, processor contracts, database migrations, storage buckets, notification templates, analytics events, and all live pages. No retired or unapproved provider may appear in public copy, acceptance records, provider disclosures, configuration, or live flows. The selected ACH processor/bank setup and Too Much Media/NATS must not be presented as active beyond the contract and production configuration actually in force.

End-to-end data and money flow matrix

The matrix separates user input, server decisioning, recipient/output, and durable evidence for each material flow.

FLOW	INPUTS	PROCESSING / DECISION	OUTPUT / RECIPIENT	RECORD / CONTROL
Customer signs up	Email, city, auth metadata	Supabase Auth + customer role	Customer dashboard	Confirmation, rate limit, RLS
Dancer signs up	Email, city, eligibility/profile fields	Auth + contractual eligibility + staged media/affiliation onboarding	Private dancer workspace	Acceptance version + account state + audit
Dancer uploads media	Image/video + technical metadata	Validation, transform/watermark, automated/human moderation	Approved public media or private review	Storage + moderation decision
Dancer submits	Profile + approved media	Eligibility checks; first club verification remains required	Pending/approved state	Approval audit + notice
Dressing-room NFC	Tag, dancer, club, device/IP	Secure tag + affiliation/presence validation	Affiliation + time-limited Working Now	Tap, expiry, cooldown, audit
Dancer posts shift	Approved affiliated club + date/time	Venue restricted to active affiliation	Public upcoming schedule	Shift + notification + analytics
Customer discovers	City/filter + session context	Public eligibility + ranking queries	Dancer/club/TV results	View/ranking events

FLOW	INPUTS	PROCESSING / DECISION	OUTPUT / RECIPIENT	RECORD / CONTROL
Club publishes deal	Allowed offer + accepted offer-specific Deal Order	Authorization, policy, fee and active-deal checks	Public Club Deal	Deal Order + fee snapshot + audit
Customer selects deal	Deal + source + dancer/shift when eligible	Signed token; immutable source locked	Cashier redemption screen	Redemption + attribution
Cashier NFC	Cashier tag + token + session/device	Club/deal/expiry/duplicate checks	Verified redemption	NFC + redemption + fraud audit
Commission accrues	Profile-originated redemption + negotiated deal fee	Monthly 1–9: 30%; 10–24: 40%; 25+: 50%	Dancer commission eligible for export	Deal Order + ordinal + policy snapshot
Commission exported	Verified NATS affiliate ID + exact USD amount	Durable outbox; ambiguous response requires reconciliation	Too Much Media/NATS	Status + provider reference + reversal
Club settles weekly	Itemized statement + ACH authorization/instructions	ACH debit/credit + return and reconciliation	MyDancr receivable settled	Statement/item + ACH trace/status
Notification	Recipient + event + channel preference	In-app plus optional push/email	Account holder	Delivery state + opt-out
Report/support	Target + category + description	Triage, moderation, escalation, response	Admin/support queue	Case + messages + actions
Account deletion	Authenticated request	Public removal + storage/provider cleanup subject to holds	Access disabled	Minimal finance, fraud, DMCA, tax/legal records

Part II — Draft Terms of Service

1. Scope and acceptance

These Terms of Service govern access to MyDancr's websites, mobile web experience, accounts, public pages, profiles, media feeds, Club Deals, NFC functions, notifications, support, and related services (collectively, the **Service**). "Company," "MyDancr," "we," "us," or "our" means the legal entity identified in the published version and acceptance record. "User" means any visitor or account holder. Separate Dancer, Club, Media, Deal, Verification, Commission Settlement, Deal Order, ACH, and other terms apply when a User uses those features. If separate terms conflict with these Terms, the more specific terms govern that feature.

By creating an account, clicking acceptance, uploading content, activating an NFC function, selecting or redeeming a Club Deal, or otherwise using the Service, the User accepts the version presented at that time. Material updates will be presented through reasonable notice and, where required, renewed acceptance.

2. Eligibility

A User must be at least 18 years old and legally capable of entering a contract. A club may require a higher age for entry, and nothing in the Service overrides alcohol, gaming, adult-entertainment, employment, work-card, or local licensing laws. Dancers and club representatives must satisfy the additional verification and authority requirements in their agreements. The Service is unavailable to suspended users, sanctioned persons, or anyone barred by law.

The User represents that signup and account information is accurate, current, and not misleading. Accounts may not be sold, rented, shared outside an authorized club team, or used to impersonate another person or business.

3. Account security

The User is responsible for the confidentiality of credentials and for activity under the account, except to the extent caused by Company's breach of an applicable duty. The User must promptly report unauthorized access. MyDancr may require email confirmation, password reset, reauthentication, identity or authority review, session termination, and other reasonable security measures.

Club owners and managers are responsible for assigning least-privilege team roles, removing former staff, and protecting access codes, invitations, and NFC tags. A dancer must not let another person use the dancer account or verification token.

4. What MyDancr provides

MyDancr provides technology for lawful public discovery, promotional profiles and media, club information, venue-confirmed affiliations, schedules, directions, allowed Club Deals, NFC verification, engagement analytics, reporting, and referral attribution. Content and availability can change without notice. A profile, badge, status, ranking, club affiliation, or verification signal is limited to the specific checks described in the Service and is not a guarantee of identity, employment, licensing, conduct, availability, safety, quality, or willingness to interact.

MyDancr is not a party to club admission decisions, dancer-club employment or independent-contractor arrangements, interactions inside a club, transportation, third-party social media, or any prohibited off-platform transaction. MyDancr does not arrange or process payment for private dances, sexual services, escorting, prostitution, companionship, or other personal services.

5. Public content and user content

Public pages may display stage names, city, approved media, social links, club affiliations, schedule status, engagement signals, and deal information. Users retain ownership of content they submit but grant the license in the Content and Media Consent/License. Users may submit only content they have the right and documented consent to use.

MyDancr may transform, crop, transcode, resize, watermark, moderate, classify, remove, restrict, preserve, or decline content as described in the policies. Approval is not an endorsement and does not waive future enforcement.

6. Club Deals, NFC, and attribution

Club Deals are conditional club offers, not cash, stored value, reservations, tickets, or guaranteed admission. The club controls admission and must honor a valid deal subject to disclosed limits, capacity, age, dress code, safety, hours, and law. A deal is verified only through the authorized server and cashier NFC flow. Screenshots, copied tokens, expired links, or unconfirmed selections are invalid.

Attribution may record the club page, dancer profile, shift, deal, session, and NFC confirmation that led to a verified redemption. MyDancr may use this attribution to create weekly club statements, reconcile ACH, and calculate dancer commissions. Users may not manipulate source attribution, create duplicate redemptions, simulate taps, or interfere with tags.

7. Club payments and dancer commission settlement

Customer use of a Club Deal does not authorize MyDancr to charge the customer unless a separate purchase flow clearly states a charge. A club owes the negotiated referral fee for each eligible verified redemption under the Deal Order governing that specific Club Deal and pays MyDancr once each week by ACH. Under the Dancer Commission Terms, a Profile-Originated Verified Redemption earns the attributed dancer 30%, 40%, or 50% of that deal's applicable MyDancr gross referral fee according to whether it is the dancer's 1st–9th, 10th–24th, or 25th-and-later qualifying event in the commission month. Eligible dancer commissions are exported to the dancer's verified NATS affiliate account through Too Much Media's platform. The detailed attribution, exclusions, correction, settlement, and third-party-account rules control. No live agent commission program is promised by these Terms.

MyDancr may delay or hold a commission export during a reasonable investigation of fraud, sanctions, duplicate attribution, legal process, provider review, ACH return, mistake, or policy violation. MyDancr will not hold an undisputed earned amount solely because a club is late on its independent weekly ACH obligation where the applicable commission terms state the reward is Company-funded.

8. Acceptable use

The Acceptable Use and Prohibited Conduct Rules are incorporated. Without limitation, Users may not use the Service for minors, trafficking, prostitution, sexual-service solicitation, nonconsensual intimate imagery, unlawful discrimination, violence, drugs, weapons, alcohol offers, fraud, harassment, stalking, doxxing, infringement, malicious code, scraping, credential abuse, or interference with security, NFC, ranking, moderation, or finance systems.

9. Third-party services

Links and integrations may lead to clubs, social networks, maps, rideshare providers, authentication/email/push providers, Too Much Media/NATS, and the ACH processor or banking partners used for club settlement. Third parties control their own services, terms, availability, and data practices. A link or technical integration does not imply endorsement or partnership. The User is responsible for reviewing applicable third-party terms.

10. Changes and availability

MyDancer may modify, suspend, or discontinue a feature for security, legal, provider, operational, or product reasons. MyDancer will give notice when required and will not retroactively eliminate an earned, undisputed commission except as allowed by the applicable commission terms. Maintenance, networks, devices, browsers, clubs, providers, and events beyond MyDancer's control may affect availability.

11. Reports, enforcement, and appeals

MyDancer may investigate reports, preserve evidence, restrict content, disable features, suspend accounts, terminate access, revoke tags, void fraudulent redemptions, and notify affected parties or authorities as permitted or required. The Moderation, Reporting, Suspension, and Appeals Policy describes ordinary review. Immediate action may occur for safety, minors, trafficking, credible threats, fraud, sanctions, legal process, or system integrity.

12. Intellectual property and DMCA

MyDancer's software, design, marks, graphics, rankings, documentation, and non-user content are owned by Company or its licensors. No rights are granted except the limited right to use the Service under these Terms. Copyright complaints and counter-notices follow the DMCA and Takedown Policy. Repeat infringers may be terminated in appropriate circumstances.

13. Privacy

The Privacy Policy explains collection, use, disclosure, retention, rights, and choices. Users must not collect, export, or misuse another person's data from the Service. Clubs that separately determine a purpose for personal information are responsible for their own privacy compliance.

14. Disclaimers

To the maximum extent permitted by law, the Service is provided "as is" and "as available." MyDancer does not warrant uninterrupted operation; particular rankings, earnings, attendance, admissions, availability, reach, or business outcomes; the accuracy of user- or club-supplied information; or conduct of a User or third party. MyDancer does not provide legal, tax, employment, licensing, safety, transportation, or financial advice.

Nothing in these Terms excludes a warranty or remedy that cannot lawfully be excluded. Users should contact emergency services, the club, or appropriate authorities—not app support—for emergencies.

15. Limitation of liability

The published version should contain counsel-approved exclusions and a liability cap appropriate to consumer law and the separate commercial agreements. It should distinguish direct platform claims from interactions at clubs, user content, transportation, third-party services, lost profits, and unauthorized conduct. Any cap should preserve nonwaivable rights and address whether club agreements use a different negotiated cap.

COUNSEL · Liability clause required

Insert the final dollar or fee-based cap, exclusions, exceptions, and state-specific savings language only after insurance, entity, and launch-jurisdiction review. Do not publish a generic copied cap.

16. Indemnity

Dancers and clubs should indemnify Company for third-party claims arising from their content, authority, agreements, unlawful conduct, licensing failures, offers, marketing statements, tax obligations, or breach, subject to counsel-approved procedure and applicable law. Consumer indemnity should be narrowed to lawful scope and should not shift Company's own negligence or statutory obligations.

17. Termination

The User may stop using the Service and may disable or request deletion of an account. MyDancr may suspend or terminate for breach, risk, legal process, nonpayment, provider restrictions, or discontinued service. Clauses that by nature should survive—including accrued payment duties, licenses necessary for retained legal records, disclaimers, limitations, dispute terms, and enforcement records—survive.

18. Governing law and disputes

The final Terms must identify governing law, judicial venue or arbitration administrator/rules, class and jury waivers if used, small-claims rights, consumer-law savings, notice address, and any opt-out period. Commercial Club Agreements may use different negotiated dispute terms.

DECISION · Do not publish yet

Dispute provisions materially affect user rights and enforceability. Counsel must draft them for MyDancr's entity, states served, acceptance UI, and consumer/commercial segmentation.

19. General

The published Terms should include assignment, force majeure, waiver, severability, electronic communications, notices, entire agreement, order of precedence, interpretation, and contact provisions. MyDancr may assign to an affiliate or successor as permitted by law; Users may not assign without consent. Failure to enforce is not a waiver.

Part III — Draft Privacy Policy

1. Scope

This Privacy Policy applies to personal information processed by MyDancer through the Service. MyDancer does not use a separate age-verification provider in the current model. Too Much Media/NATS processes dancer affiliate and commission-settlement data, and the selected ACH processor or banking partners process club payment data under the applicable contracts, notices, and independent terms. This policy does not govern independent club practices, third-party social sites, maps, rideshare providers, or a provider acting independently. The published version must identify the MyDancer controller/business legal entity, contact methods, actual production providers, and each provider's privacy role.

2. Information collected

Account and contact data

Email address, authentication identifiers, role, display name, account state, city, confirmation and recovery status, security events, and communications. Passwords are processed by the authentication service and should not be available to Company personnel in plain text.

Dancer profile and verification data

Stage name, city, bio, avatar, profile photos, videos, social links, public slug, visibility, status, club affiliations, verification events, work-card or license information if required, and consent/acceptance records. MyDancer does not routinely collect age or identity documents, selfies, biometric media, or date of birth in the current no-nudity model. Any limited evidence later required for fraud, club authority, account recovery, or law must remain private and be collected only under an approved workflow.

Club and team data

Club name, address, location coordinates, contact information, hours, website, public media, offers, team members, owner/manager/staff role, access code/invitation/claim data, authority evidence, NFC tag assignments, Deal Orders, offer-specific fee terms, weekly statements, ACH authorization/payment status and references, and activity logs.

Customer preferences and activity

City, followed dancers and clubs, favorites, going signals, saved deals, notification settings, profile/schedule/club/video views, directions, social clicks, shares, applause, and deal activity. Some actions may use a pseudonymous browser/session token when the user is not signed in.

Media and moderation data

Original uploads, transformed versions, thumbnails, technical metadata, duration/dimensions, storage paths, hashes, moderation inputs/outputs, reason codes, reviewer actions, reports, and watermarks. MyDancer should avoid retaining unnecessary camera metadata or location embedded in media.

Location, NFC, device, and security data

For an eligible dancer check-in, latitude, longitude, accuracy, reading time, distance result, club, and verification expiry. For NFC and security events: tag/token digest, timestamp, club, browser session, device fingerprint or attributes, IP address, user agent, and audit payload. Public users do not receive raw dancer location.

Finance, commission, tax, and settlement data

Deal Orders, deal-specific fee snapshots, weekly club statements and items, ACH authorization/payment status, returns and trace/reconciliation references, verified redemption data, gross referral fee, dancer share, platform share, policy version, commission status, NATS affiliate login/account linkage and verification state, immutable commission-export events, attempt/error/reconciliation state, provider transaction/reference, tax classification/documents or status, and reversals. NATS or ACH credentials, external bank credentials, and identity images collected solely by a finance provider should remain with that provider rather than being copied into MyDancer's ordinary database.

Support, reports, legal, and DMCA data

Support threads/messages, reachable recovery email, report category and narrative, administrative actions, DMCA notice/counter-notice fields, strikes, correspondence, law-enforcement/legal requests, and preservation holds.

Cookies and similar technologies

Session cookies, local storage, CSRF/security tokens, preference values, anonymous attribution tokens, and provider SDK identifiers. The published cookie notice must identify any analytics/advertising technology actually in production. Essential storage supports authentication, security, preference, and redemption integrity.

3. Sources

Information comes from the User; clubs and authorized team members; dancers; automated device/browser events; NFC tags; content moderation; MyDancr eligibility, affiliation, and account-integrity records; Too Much Media/NATS; the selected ACH processor or banking partners; authentication, hosting, email, push, map, and support vendors; public sources used for club verification; other Users' reports; and authorities where lawful.

4. Purposes

- Create, authenticate, secure, recover, and administer accounts.
- Render public dancer, club, schedule, deal, and video experiences.
- Verify account eligibility representations, club authority, dancer affiliation, and time-limited presence.
- Process uploads, transformations, moderation, publication, reporting, and takedown.
- Personalize city results, follows, saved content, notifications, and rankings.
- Provide directions and user-requested external links.
- Create, validate, and prevent abuse of Club Deal redemptions and NFC tags.
- Create weekly club statements, reconcile ACH, calculate commissions, export eligible dancer commissions to NATS, reconcile failures, and meet tax/accounting duties.
- Provide support, recovery, appeals, legal notices, and DMCA processes.
- Prevent fraud, exploitation, trafficking, minors' access, security attacks, and prohibited conduct.
- Enforce agreements, protect rights and safety, defend claims, and comply with law.
- Develop and improve the Service using aggregated, deidentified, or access-controlled information.

5. Disclosures

MyDancr may disclose data to vendors acting under contract for hosting/database/storage/authentication, content moderation, push, email, maps, support, security, Too Much Media/NATS commission settlement, club ACH processing/banking, and professional services. The minimum data necessary should be disclosed for the function. No separate age-verification provider receives account data under the current model.

Public profile data is disclosed to visitors. A club receives information necessary to review its dancer affiliations, team, offers, Deal Orders, verified redemptions, weekly statements, and ACH status, but not private dancer commission records or customer contact details unless separately authorized by law and product design. A dancer receives the dancer's own profile, activity, affiliations, commissions, NATS linkage, and export status, but not customer identity.

MyDancr may disclose information in a merger, financing, acquisition, reorganization, or asset transfer subject to appropriate protections; to professional advisers; to authorities or parties when reasonably necessary for law, safety, fraud, trafficking, child protection, rights, or legal claims; and with the User's direction or consent.

MyDancr should state whether it "sells" or "shares" personal information under applicable state definitions only after a production vendor/data-use review. Contractual service-provider disclosure does not automatically answer that statutory question.

6. Account eligibility, club authority, and affiliation decisions

The current no-nudity model does not use a separate age-verification service. MyDancr records the User's contractual eligibility and truthful-account representations and applies account-state, approved-media, club-authority, venue-affiliation, and safety rules relevant to the requested feature. MyDancr does not routinely collect date of birth, exact age, government identification, selfies, or biometric media.

Any limited evidence later required for suspected fraud, account recovery, club authority, work-card compliance, or a specific legal obligation must be necessary and proportionate, use the shortest workable retention period, limit reviewer access, and document the decision. Introducing document, selfie, biometric, or vendor-based verification requires a separately approved product and legal change with appropriate notices, security, alternatives, retention, and deletion controls.

7. Too Much Media/NATS dancer-commission settlement

Too Much Media's NATS affiliate platform is the selected dancer-commission settlement system. To receive settlement, a dancer must establish and maintain an eligible NATS affiliate account and provide the NATS login/account identifier required to link it to the MyDancr dancer record. MyDancr may exchange that identifier, exact commission amount, currency, transaction purpose/reference, and the minimum status or failure data needed to export and reconcile the commission. Too Much Media/NATS may collect legal name, date of birth, address, business and tax information, government identification, sanctions/KYC data, payment-account details, device/security data, and transaction data under its own terms and privacy policy. Its approval, account restrictions, reserves, fees, closure, and supported payment methods are independently controlled by Too Much Media/NATS.

MyDancr maintains a private, durable, reversal-aware NATS export ledger so an ambiguous response is reconciled rather than automatically duplicated. The published policy must identify the contracted Too Much Media entity and link to the exact production terms/privacy notice before live data is sent. MyDancr must update the notice, contract/vendor record, and user acceptance before changing the commission-settlement provider or sending materially different data.

8. Choices and rights

Users can edit supported profile and preference fields, control marketing and optional notifications, unfollow, remove content subject to legal retention, disable visibility where supported, and request access, correction, deletion, or appeal through the designated address. Nevada consumers may submit a verified request regarding covered-information sale as applicable. Residents of other states or countries may have additional rights.

Identity verification may be required before fulfilling a request. MyDancr should not provide data that would disclose another person's information, undermine security/fraud systems, or violate legal retention. Privacy-rights requests submitted by an authorized representative require proof of authority. Appeals and response deadlines must follow applicable law.

9. Retention

MyDancr retains data only as long as reasonably necessary for the stated purposes, contracts, security, disputes, tax/accounting, DMCA, fraud, and law. The separate retention policy describes proposed periods by class. Public content is removed or restricted when no longer eligible, while minimum audit or finance facts may remain. Backups are isolated and expire through the backup cycle.

10. Security

Controls include managed authentication, encrypted transport, provider-managed encryption at rest, role and row-level access, private review storage, signed tokens, secret hashing, rate limits, server-side validation, least privilege, administrative audit, tag lifecycle, environment-secret management, and monitoring. No system is completely secure. The published policy must provide a security contact and an incident/breach process aligned with applicable notice law.

11. Minors

The Service is intended only for adults and does not knowingly permit anyone under 18 to create an account or appear in content. Suspected minor-related content or access should be immediately restricted and escalated under the safety policy. A parent, guardian, or authority may contact the designated safety address.

12. International processing

Providers and users may be located in different jurisdictions. If MyDancer serves users outside the United States or sends data internationally, counsel must approve transfer mechanisms, controller/processor terms, localization rules, and rights notices before launch in that jurisdiction.

13. Changes and contact

The published policy will state effective and updated dates, material-change notice, privacy request methods, appeal method, and the entity's address. A version history and acceptance/notice record should be maintained.

Part IV — Draft Dancer Agreement

1. Relationship and scope

This Dancer Agreement supplements the Terms for a person who creates a dancer account, submits a public professional profile, uses venue verification, posts shifts, uploads media, or receives commissions. It governs only the relationship with MyDancer. It does not create employment, partnership, agency, fiduciary duty, franchise, joint venture, or club engagement.

The dancer accepts this agreement and the linked dancer policies electronically during onboarding through an affirmative clickwrap action, such as selecting an initially unchecked agreement control and pressing “Agree and continue.” No paper contract or wet signature is contemplated. Before acceptance, MyDancer should make each incorporated document available to open and download. MyDancer should preserve the dancer account, document name and version, acceptance timestamp, and appropriate technical evidence such as IP address and user agent, and should require renewed electronic acceptance when a material change legally requires it.

The dancer is responsible for the dancer’s own relationship with each club, including classification, pay, tips, fees, scheduling, taxes, licensing, work cards, safety, and conduct. MyDancer does not direct the dancer’s performance work, set service prices, collect payment for dancer services, or guarantee customers, shifts, income, or admission.

2. Eligibility and truthful identity

The dancer represents that the dancer is at least 18, is the person operating the account, has legal capacity, and may lawfully work and publish the submitted content. The dancer must provide accurate stage identity and city information and must not use another person’s documents, likeness, stage identity, or account. MyDancer does not require a routine age-document or biometric verification flow in the current no-nudity model. A stage name may be public; any legal identity collected independently by a club, Too Much Media/NATS, tax authority, or other provider is governed by that relationship and applicable law.

The dancer must maintain all local work cards, entertainer licenses, permits, immigration/work authorization, and club requirements. A MyDancer badge or affiliation does not replace government or club verification.

3. Initial approval and affiliations

Before the profile becomes public, the dancer must make the required eligibility and truthful-account representations, complete required profile fields, obtain approval of required media, submit the profile, and complete first club verification through the approved flow. Club confirmation verifies only the represented affiliation and is not a general identity, age, employment, licensing, or safety guarantee. MyDancer may require limited additional review for suspected fraud, impersonation, safety concerns, or a specific legal obligation, or may decline publication.

After approval, the dancer may add or change affiliations only through the approved process. The dancer may post a shift only for an active approved affiliation and may not claim a club where the dancer is not authorized to work. The dancer must promptly remove or update an inaccurate affiliation or schedule.

4. Working Now and presence data

Working Now may require an approved dressing-room NFC tap or other server-validated presence check. The dancer authorizes collection of limited tag, timestamp, device/IP, and—when used—proximity data to validate the event, prevent fraud, operate the time window, and attribute eligible redemptions. The dancer may not share tags, simulate taps, alter device time/location, use automation, or ask another person to check in.

Working Now is time-limited and does not promise that the dancer remains continuously on premises or available to any customer. The dancer should end an inaccurate status through available controls and notify support of a malfunction.

5. Profile and media obligations

The dancer grants the Content and Media License and represents that each upload depicts consenting adults, is owned or properly licensed, is not misleading, contains no nudity or actual sexually explicit conduct, and complies with club, privacy, intellectual-property, and safety rules. The dancer must obtain releases from every recognizable person and location owner where required. The dancer must not upload hidden-camera, nonconsensual, trafficked, minor, infringing, or illegal content.

The dancer understands that media may be automatically and/or manually reviewed, transformed, watermarked, resized, transcoded, rejected, or later removed. Approval is not a legal clearance. The dancer remains responsible for rights and records.

6. Social links and off-platform conduct

Supported social links may be displayed as “Social links” or equivalent neutral wording. The dancer must control or be authorized to link each account. Links may not be used to evade MyDancr rules, solicit prohibited services, direct minors, mislead customers, or distribute malware. Third-party platform terms apply.

MyDancr does not monitor all off-platform conduct, but conduct connected to the Service may support enforcement when it creates safety, fraud, trafficking, impersonation, or legal risk.

7. Commissions and Too Much Media/NATS settlement

The dancer earns a reward only from a Profile-Originated Verified Redemption: an eligible Club Deal redemption that the server validly attributes to a customer journey originating from that dancer’s public profile, including an eligible shift or deal surface presented within the profile, and that the correct club’s authorized cashier NFC tag successfully confirms. A profile view, social click, follow, unverified selection, screenshot, failed or duplicate NFC event, demo record, ordinary club attendance, or club-page-only redemption without dancer-profile attribution does not earn commission.

For every Profile-Originated Verified Redemption, the dancer receives **30% for qualifying monthly events 1–9, 40% for events 10–24, and 50% for events 25 and above** of the applicable MyDancr gross referral fee. The percentage does not apply to the customer’s admission value, the deal’s face value, club revenue, tips, or any dancer service. Each event is priced using its ordinal at confirmation and is not retroactively repriced when a later event reaches a higher tier. The event must preserve the source profile, commission month, ordinal, policy version, 3,000-, 4,000-, or 5,000-basis-point share, gross referral fee, currency, club, deal, dancer, token, cashier confirmation, and timestamps. MyDancr may prospectively amend the compensation policy only through clear advance notice and renewed acceptance where required; accrued events keep their snapshot unless corrected for error, fraud, reversal, illegality, sanctions, or a genuine attribution dispute.

The dancer must open and maintain an eligible NATS affiliate account on Too Much Media’s platform, complete Too Much Media/NATS onboarding and any KYC, tax, sanctions, or payment-account requirements, provide the correct NATS account identifier, and keep the account eligible. The dancer authorizes MyDancr to export the exact eligible commission amount and necessary transaction/reference data to the linked NATS account. Provider fees, foreign exchange, limits, supported countries, reserves, payment-method availability, compliance review, and holds may apply under Too Much Media/NATS terms. MyDancr does not control its independent approval or account decisions and does not process a duplicate direct settlement while NATS is the active settlement provider.

MyDancr may hold a disputed amount during a documented investigation, offset an overpayment or fraudulent/reversed event as permitted by law, and require updated tax information. Undisputed earned dancer rewards are not conditioned solely on the club’s weekly ACH settlement. The dancer is responsible for taxes and for seeking professional advice.

COUNSEL · NATS settlement schedule

Align the public commission schedule with the signed Too Much Media/NATS configuration, including export cadence, minimum, reserve/hold period, statement dispute deadline, rejected or ambiguous export handling, inactivity/unclaimed-property allocation, fees, tax forms, and final-settlement timing.

8. Independent activity and safety

The dancer chooses whether and when to use the Service and whether to work at a club, subject to the dancer’s separate club obligations. Nothing requires the dancer to accept contact, perform, disclose legal identity publicly, or remain visible. The dancer may use incognito/visibility controls where available.

The dancer should use club security and emergency services for immediate safety. App support is not an emergency service. The dancer must report suspected trafficking, coercion, minor involvement, impersonation, or nonconsensual media promptly.

9. Enforcement and termination

MyDancer may pause onboarding, restrict media, remove an affiliation, stop a Working Now state, hold NATS exports, or disable the profile for verification failure, inaccurate schedules, tag abuse, prohibited content, fraud, sanctions, legal process, safety, or breach. Ordinary appeals follow the enforcement policy. Immediate restriction may precede notice where necessary.

On termination, public access ends, but accrued undisputed obligations and legally required records survive. The license ends for ordinary future promotion after removal, but continues as necessary for existing shared materials, technical backups, evidence, legal compliance, and defense of claims.

10. Dancer acknowledgments

The dancer acknowledges the customer-facing limits of badges and status, the absence of guaranteed earnings, the role of club admission and independent club rules, MyDancer's account-eligibility, affiliation, media-approval, and commission-calculation roles, Too Much Media/NATS's commission-settlement role, the absence of a separate age-verification service, the public nature of approved profile content, dynamic ranking signals, and the separate Content/Media, Acceptable Use, Account/Club Verification, Commission, Moderation, Privacy, and Retention policies.

Part V — Draft Club Agreement

1. Authority and account

The person accepting for a club represents authority to bind the legal operator identified in the club order/acceptance record. The club must provide accurate legal, licensing, location, contact, tax, and payment information. Access codes and invitations are single-purpose security credentials and may not be transferred. The club is responsible for owner, manager, and staff activity within granted permissions.

2. Independent businesses

The club and MyDancer are independent contractors. MyDancer does not operate the club, employ or supply dancers, control admission, supervise club workers, sell alcohol, provide security, or guarantee attendance. The club is solely responsible for premises, licenses, age checks, work cards, employment/classification, wage/tip/fee practices, alcohol, gaming, safety, accessibility, taxes, and house rules.

3. Public club information

The club authorizes MyDancer to display approved club name, address, location, hours, directions, website/phone, public media, roster/affiliations, schedules, Club Deals, and other submitted information. The club must keep it accurate and must have rights to submitted marks and media. MyDancer may standardize presentation and remove inaccurate or noncompliant content. Under the business-approved listing model, a verified club receives a promoted public club page and roster placement only while it is NFC-enabled and has at least one active approved Club Deal; expiration or suspension of the last active deal may pause public promotion without erasing private affiliation, audit, or settlement records.

4. Dancer affiliation verification

Only an authorized club representative may confirm a dancer affiliation. The representative must reasonably compare the dancer, stage name, and avatar presented through the secure workflow and must not approve a person the representative cannot identify as legitimately affiliated. Confirmation does not transfer the club's legal verification, licensing, employment, or safety duties to MyDancer.

The club must promptly end an affiliation that is no longer accurate and respond to disputes. It may not use affiliation review to retaliate unlawfully, misrepresent employment, obtain private dancer commission/NATS information, or control unrelated dancer content.

5. NFC tags

Dressing-room and cashier tags remain Company-controlled credentials even when installed at the club. The club must install each tag only at the approved location, restrict staff access, prevent copying or relocation, inspect for tampering, and report loss or compromise immediately. The club may not create lookalike tags, rewrite tokens, collect credentials, or bypass server confirmation.

The club authorizes collection of tap, device/IP, tag, venue, timing, and fraud data necessary to operate affiliation, presence, and redemption. MyDancer may disable or rotate a tag for security, misuse, termination, or maintenance.

6. Club Deals

The club may publish only approved admission or line-access offers. Each deal must be truthful, available on disclosed terms, and honored when valid, subject only to clearly disclosed capacity, age, dress code, hours, safety, and house rules. The club may not publish alcohol, drink, bottle-service, sexual-service, cash, gambling, controlled-substance, or unlawful offers. Before publication, the club and MyDancer must accept a Deal Order for that specific offer; approval of one offer or fee does not automatically govern another.

The club is the offeror and bears responsibility for consumer disclosures, fulfillment, staff training, and lawful refusal. MyDancer may review or remove a deal but does not become the offeror.

7. Negotiated referral fees and weekly ACH settlement

For each eligible server-verified redemption, the club owes the referral fee in the Deal Order governing that specific Club Deal. The order must identify the offer, fee or formula, currency, effective dates, weekly statement period, ACH method, and material restrictions. Different Club Deals may carry different negotiated referral fees. A requested change is ineffective until prospectively accepted by authorized representatives of MyDancer and the club. When the locked source qualifies as a dancer's public profile, MyDancer separately credits that dancer the applicable 30%, 40%, or 50% monthly tier share of that deal's MyDancer gross referral fee under the Dancer Commission Terms. That credit does not reduce, offset, or condition the club's referral-fee obligation.

MyDancer provides an itemized weekly statement identifying supporting verified redemptions without exposing dancer settlement-account information. The club pays MyDancer once each week by ACH, using the authorized debit or credit method stated in the Deal Order. The club must review the statement and raise a specific good-faith dispute within the approved period; undisputed amounts remain due. The final order must state the weekly cutoff and timezone, statement delivery, ACH authorization or instructions, debit/due day, weekends/holidays, returns and retries, taxes, lawful late charges, failed-payment costs, reconciliation, record retention, and suspension rights.

8. Team and security

The club must grant least privilege, promptly revoke departed personnel, maintain accurate owner/manager/staff roles, secure email accounts and devices, and review activity. The club is responsible for acts of authorized team members. Suspected compromise must be reported immediately.

9. Compliance and prohibited conduct

The club will maintain all adult-entertainment, cabaret, liquor, fire, occupancy, employment, tax, accessibility, and other licenses and comply with anti-trafficking, age, wage, discrimination, privacy, advertising, and consumer laws. The club will not use MyDancer to arrange prostitution, sexual services, unlawful contact, worker coercion, kickbacks, or retaliation.

10. Data and confidentiality

The club may use MyDancer data only to operate authorized club features. It may not build customer lists from anonymous signals, export dancer/customer data, sell data, scrape, reidentify, or use commission/engagement information for discriminatory or retaliatory purposes. Confidential information includes security architecture, tag credentials, fee terms where designated, nonpublic user data, and incident information.

11. Suspension and termination

MyDancer may suspend club publishing, deals, tags, team access, or account access for nonpayment, licensing concerns, unsafe or deceptive conduct, tag abuse, fraud, security, legal process, or breach. The club remains responsible for accrued fees, valid consumer commitments, and return/destruction of credentials. Public data may be retained as historical/legal records but should not suggest an active relationship after termination.

12. Commercial protections

The final Club Agreement should include negotiated confidentiality, security cooperation, insurance, audit of redemption disputes, warranties, mutual or allocated indemnities, liability cap, term/renewal, termination, governing law, notices, assignment, force majeure, and order-form precedence.

COUNSEL · Deal Order and ACH authorization

Use a venue master agreement plus a Deal Order for each published Club Deal. Each order should identify legal operator, DBA, licensed premises, authorized signer, exact offer and restrictions, offer-specific referral fee/formula, currency, weekly statement period, ACH debit authorization or credit instructions, debit/due day, return/retry procedure, tax handling, term, renewal, priority over conflicting deal copy, and special compliance conditions.

Part VI — Draft Content and Media Consent/License

1. Covered content

“Content” includes profile fields, stage name, biography, avatar, photos, videos, audio, thumbnails, logos, club media, social links, captions or labels created by the Service, offer materials, reports, and other material submitted, linked, or authorized for publication.

2. Ownership and authority

The submitter retains ownership of original Content. The submitter represents and warrants that the submitter owns or has sufficient written rights, permissions, model releases, location/property releases, music/sound rights, trademark permissions, and privacy/publicity consents for MyDancr’s uses. Every depicted person must be an adult and must have knowingly consented to creation and distribution in the intended context.

The submitter must preserve underlying permissions, releases, and rights records for the period required by law and provide reasonable evidence to MyDancr or authorities where legally necessary. This clause does not impose a separate age-verification or §2257/§2257A recordkeeping program. MyDancr’s approval is not a substitute for records independently required by applicable law.

3. License to MyDancr

The submitter grants Company a nonexclusive, worldwide, royalty-free, sublicensable-to-service-providers, transferable-with-the-Service license to host, store, reproduce, format, crop, resize, transcode, compress, stream, watermark, display, perform, distribute, and make technical derivatives of Content to operate, secure, moderate, promote, and improve the Service and to comply with law. Promotional use outside the submitter’s ordinary profile/feed context should require the consent scope approved by counsel and, where appropriate, a separate release.

The license continues while Content is published and for a reasonable wind-down, cached/shared copy, backup, audit, dispute, moderation, DMCA, safety, and legal-compliance period. Deletion ends new ordinary promotional use after processing, but cannot retract a copy lawfully shared by another user or retained for legal purposes.

4. Name, likeness, and voice

The dancer authorizes use of the approved stage name, likeness, appearance, performance, and voice within the Service and associated Service promotion within the accepted scope. Legal name is not public unless the dancer separately directs and counsel approves. No license authorizes creating an endorsement the dancer did not make or materially altering Content to misrepresent conduct.

5. Moderation and technical processing

The submitter consents to automated and human analysis for safety, nudity/sexual-content classification, apparent-minor risk, violence, drugs, text, logos, fraud, and policy compliance; to secure transmission to contracted moderation providers; and to administrative review. Decisions can be wrong. This moderation is content screening, not identity or age verification. The submitter may use the appeal process but may not demand publication.

6. Prohibited content

Content may not include a minor; a person who did not consent; trafficking or coercion; hidden-camera or intimate material; actual sexual-service solicitation; unlawful sexual conduct; extreme violence; controlled substances or weapons promotion; hate or harassment; personal data exposed without authority; infringement; deceptive synthetic media; malware; or material otherwise prohibited by policy.

7. Music and third-party material

The submitter must not assume that music playing in a club, a social-platform license, or ownership of a recording grants synchronization or public-performance rights on MyDancr. MyDancr may mute, reject, or remove audio and should maintain a rights-cleared audio strategy before scaling video.

8. AI and synthetic media

The submitter must disclose materially synthetic or altered depictions and must not use AI to impersonate a real person, falsify club presence, evade moderation, or depict a minor or nonconsensual intimate content. The final policy should state whether MyDancer uses Content to train proprietary models; absent a clear opt-in and approved notice, this draft does not grant a training right.

9. No-nudity, consenting-adult, and content-boundary controls

At counsel's direction, this license does not impose proposed 18 U.S.C. §§ 2257/2257A producer-recordkeeping, labeling, custodian, or inspection duties and does not require a separate vendor age-verification process. Nudity and actual sexually explicit conduct are outside the accepted content categories; every depicted person must be an adult and must have consented; and the uploader must own or control the necessary rights. MyDancer may require consent, ownership, moderation, or provenance evidence reasonably necessary to enforce those narrower rules. Counsel should re-review the allocation if MyDancer materially changes its accepted content, production role, or applicable jurisdiction.

10. Removal and preservation

MyDancer may remove or preserve Content for policy, safety, rights, legal process, fraud, or technical reasons. Where lawful, MyDancer may retain a cryptographic hash, moderation decision, report, consent/acceptance record, and restricted evidentiary copy to prevent reupload or defend claims.

Part VII — Draft Acceptable Use and Prohibited Conduct Rules

1. Safety and adults only

Users may not access or use the Service if under 18; depict, identify, target, groom, solicit, exploit, or endanger a minor; misstate eligibility; upload child sexual abuse material; or fail to report a suspected minor or exploitation concern through available safety channels. MyDancr does not use a routine vendor age-verification gate in the current no-nudity model, but it may restrict a suspicious account or content while investigating.

2. No prostitution, trafficking, or sexual-service facilitation

Users may not offer, request, price, negotiate, arrange, advertise, transport for, pay for, or facilitate prostitution, escorting, sexual contact, sex acts, or private sexual services; use coded language, social links, profiles, shifts, deals, media, or support to do so; traffic, coerce, threaten, recruit, harbor, or control another person; or retaliate against a person who raises a concern.

3. Consent and privacy

Users may not upload or distribute nonconsensual intimate imagery, hidden-camera material, doxxing, private contact/identity data, location, financial data, verification documents, or another person's communications without authority. Stalking, surveillance, harassment, unwanted contact, and attempts to reidentify anonymous users are prohibited.

4. Truthful profiles, clubs, and schedules

Users may not impersonate; create duplicate accounts to evade enforcement; falsify stage name, identity, club authority, affiliation, shift, location, badge, ranking, endorsement, or availability; misrepresent licensing; or use another person's avatar/media. Clubs may not approve a false affiliation. Dancers may not post shifts for unapproved clubs.

5. Content rules

Users may not submit infringing, unlawful, exploitative, deceptive, hateful, threatening, graphically violent, self-harm-promoting, drug-selling, weapon-selling, malware, spam, or fraudulent content. Content must not include nudity, actual sexual conduct, or other categories barred by the current media standard.

6. Club Deal rules

Users may not publish or redeem offers for alcohol, drinks, bottle service, cash, cash equivalents, gambling, controlled substances, weapons, sexual services, or unlawful activity. Users may not duplicate, resell, transfer, screenshot to counterfeit, automate, alter, or falsely confirm a redemption. Clubs must not refuse a valid offer for an undisclosed discriminatory or deceptive reason.

7. NFC and technical integrity

Users may not copy, move, rewrite, obscure, damage, replace, emulate, relay, or reverse engineer an NFC tag; simulate a tap; manipulate location/time/device/session data; bypass rate limits; scrape; credential-stuff; probe vulnerabilities without authorization; introduce malicious code; interfere with availability; or access data outside assigned permissions.

8. Finance and referral integrity

Users may not create sham redemptions, self-deal, collude, recycle sessions, falsify weekly statements, ACH records, NATS accounts, or tax data, redirect attribution, claim an unauthorized commission relationship, make deceptive earnings claims, recruit a downline, charge participation fees, or use settlement flows for unlawful activity. Mistaken payments must be reported and returned as permitted by law.

9. Conduct in and around clubs

MyDancr does not control club conduct, but Users may not use the Service in connection with violence, threats, discriminatory harassment, coercion, unlawful recording, property damage, intoxicated driving, or evasion of club safety and entry rules. “Going,” “Working Now,” and follows are informational signals, not invitations or consent.

10. Enforcement

Violations may result in content restriction, warning, feature limitation, removal of affiliation/status, voided redemptions, tag revocation, commission-export hold, suspension, termination, evidence preservation, and referral to providers or authorities. MyDancr may consider severity, intent, history, harm, cooperation, and risk. Appeals do not require reinstatement during an active safety or fraud risk.

Part VIII — Draft Account Eligibility and Venue-Verification Policy

1. Contractual eligibility

Users must make the eligibility representations stated in the Terms. A club may require 21 or another lawful age for entry, and dancers must independently satisfy the legal age, work-card, licensing, and venue requirements applicable to their work. MyDancer does not use a routine age-verification vendor in the current no-nudity model. The Service must not imply that account access or a public profile equals eligibility for club entry or work.

2. Role-based controls

Controls should be proportionate to role and action. Email confirmation and accepted eligibility representations support ordinary account access. A public dancer must also complete the required profile/media workflow and initial club-affiliation confirmation. Club owners and authorized managers must establish authority for the club role. Too Much Media/NATS separately controls its affiliate-account, KYC, tax, sanctions, and payment-account requirements for commission settlement.

3. Dancer account and stage identity

Before public approval, the dancer must provide truthful account and stage information, accept the eligibility representations, provide the required avatar and profile media, and complete the venue gate. Public display uses the stage name. MyDancer does not routinely collect government identification, date of birth, age evidence, selfies, or biometric media.

If suspected fraud, impersonation, account recovery, club authority, or a specific legal requirement later justifies limited evidence, it must be encrypted, access-restricted, and not exposed beyond the minimum necessary decision interface. MyDancer should record only the evidence category, result, dates, reviewer, and decision unless counsel requires more. Introducing biometric processing or a separate age/identity vendor is outside the current model and requires a separately approved product, privacy, consent, retention, security, and accessibility review before collection.

4. Club authority

A club owner or manager must establish authority through an administrator-issued code, invitation, licensing/business records, domain/contact confirmation, or other approved evidence. Team members receive scoped roles. A staff account cannot bind the club or access owner-only finance unless expressly authorized.

5. Initial venue gate

A first-time dancer's profile remains private until an authorized club confirms a legitimate affiliation using the secure verification flow. The club should compare the stage name and avatar and attest to authority and affiliation accuracy. MyDancer then applies the remaining account, media, visibility, and safety rules. Venue confirmation is not a general identity or age certification and does not approve rejected media or an incomplete profile.

6. Later affiliations and shifts

An approved dancer may add or switch affiliations through the dashboard, but the new club must independently approve. Only active approved affiliations appear in the shift venue selector. Ending an affiliation prevents future shifts and Working Now at that club but does not erase historical finance or legal records.

7. NFC assurance

NFC tags are scoped by type and club. Dressing-room tags support affiliation/presence; cashier tags support deal verification. Tokens are secret or hashed, tags have lifecycle states, and server confirmation is required. Tags should be installed in controlled areas and rotated on compromise.

8. NATS affiliate-account verification

Dancers receiving commissions must complete Too Much Media/NATS onboarding and any required KYC, sanctions, tax, payment-account, and account-matching checks. MyDancr must verify the dancer-to-NATS account linkage and resolve a mismatch before exporting commission. Too Much Media/NATS approval does not itself create a MyDancr commission; only a qualifying Profile-Originated Verified Redemption calculated under the accepted Dancer Commission Terms does so.

9. Review, restriction, and failure

MyDancr may review or restrict the relevant feature after material account changes, suspicious activity, affiliation disputes, NATS or ACH failures, sanctions alerts, security incidents, or a specific legal requirement. Failure to establish club authority, a legitimate affiliation, account control, or finance-provider eligibility may restrict only the affected role or feature where practical. A User may appeal a mistaken result but cannot require MyDancr to accept unreliable evidence.

10. Data minimization

MyDancr should collect the minimum account, authority, affiliation, and finance-linkage data necessary; separate public stage identity from any legal or provider identity; limit retention; log privileged access; prohibit ordinary email transmission of sensitive documents; and avoid exposing government identifiers to clubs, dancers, or customers. A separate age-verification provider is not part of this model.

Part IX — Draft DMCA and Takedown Policy

1. Designated agent

The published policy must list Company's Copyright Office-registered designated agent name, organization, complete mailing address, phone if used, and email, and must remain synchronized with the Copyright Office directory. Registration renewal must be calendared.

2. Copyright notice

A notice should identify the copyrighted work; identify the material and provide information reasonably sufficient to locate it; provide claimant contact information; state a good-faith belief that use is not authorized by the owner, agent, or law; state under penalty of perjury that the notice is accurate and the claimant is authorized; and include a physical or electronic signature.

MyDancr may ask for missing information. Knowingly material misrepresentations can create liability. Notices should target specific URLs, profile/media IDs, or other locators rather than an entire account when narrower action is possible.

3. Action on a complete notice

MyDancr will expeditiously restrict or remove identified material where appropriate, notify the uploader, preserve the case record, and provide counter-notice information. MyDancr may forward the notice, including claimant contact information, to the uploader. The claimant should understand this disclosure before submission.

4. Counter-notice

A counter-notice should identify removed material and its former location; state under penalty of perjury a good-faith belief that removal resulted from mistake or misidentification; provide name, address, and phone; consent to the jurisdiction required by 17 U.S.C. § 512(g); accept service from the claimant or agent; and include a signature.

MyDancr may forward the counter-notice to the claimant. Unless the claimant gives timely notice of a filed court action seeking restraint, MyDancr may restore material in the statutory window, subject to independent policy rules.

5. Other rights complaints

Trademark, privacy, publicity, impersonation, nonconsensual imagery, and safety complaints are not DMCA notices and should use reporting/support channels. MyDancr may restrict material under its Terms even if a DMCA counter-notice is valid.

6. Repeat infringers

MyDancr maintains and reasonably implements a repeat-infringer policy in appropriate circumstances. Strikes should be tied to valid cases, permit consideration of retractions/court outcomes/counter-notices, and support termination where appropriate. Users may not evade termination with new accounts.

7. Preservation and abuse

Case records, notices, counters, delivery, actions, and restoration dates are retained for the approved legal period. Fraudulent, abusive, or knowingly false submissions may be rejected, referred, or support account enforcement.

Part X — Draft Club Deal and NFC Redemption Terms

1. Nature of a Club Deal

A Club Deal is a limited promotional benefit offered by the identified club. It is not cash, stored value, a reservation, a ticket, a promise of entry, or a payment for any dancer service. Current categories are half-off admission and skip-the-line. The club is responsible for the offer and lawful fulfillment.

2. Eligibility and conditions

The user must satisfy the club's lawful age, identification, capacity, dress code, hours, safety, and house rules. A deal may have one redemption per guest, session, time period, or other clearly disclosed limit. Unless the deal says otherwise, it cannot be combined, transferred, resold, or exchanged for cash.

3. Selection and redemption

Selecting a deal creates an eligible checkout/redemption state but does not complete redemption. At the cashier, the user unlocks the device and holds it near the official MyDancr cashier NFC tag. The browser or app opens the server flow, which must confirm the correct club, deal, token, status, expiry, tag, and duplication rules. Only a successful server response completes redemption.

4. Attribution

If the user selected the deal through an eligible dancer's public profile—including an eligible shift or deal surface presented within that profile—MyDancr locks that source before issuing the redemption token. A successful cashier NFC confirmation that otherwise satisfies these terms creates a Profile-Originated Verified Redemption. Its dancer reward equals **30%, 40%, or 50% of the applicable MyDancr gross referral fee** according to whether it is the dancer's 1st–9th, 10th–24th, or 25th-and-later qualifying event in the commission month. The user and club may not change or erase valid source data. A club-page-only redemption without dancer-profile attribution creates no dancer reward. No customer charge or dancer-service transaction is created.

5. Prohibited offers and use

No alcohol, drink, bottle service, sexual service, cash, gambling, controlled substance, weapon, illegal product, or deceptive offer is allowed. Users may not counterfeit, automate, copy, relay, tamper, duplicate, sell, or exploit tokens/tags; use multiple accounts/sessions to evade limits; or induce staff to bypass confirmation.

6. Club obligations

The club must train staff, place the tag in the approved cashier location, maintain connectivity and alternate support steps, honor valid redemptions on published terms, display exclusions clearly, protect the tag, and report compromise. The club may refuse entry for a lawful disclosed reason but may not falsely mark a redemption or discriminate unlawfully.

7. Errors, outages, and disputes

If a server or tag outage prevents confirmation, no unverified screen should automatically create a commission event or weekly statement item. The user or club may contact support with the deal, club, time, and reference. MyDancr may verify logs, correct a technical error, or deny a claim lacking reliable evidence. Screenshots are not final proof.

8. Expiry and changes

The club may prospectively pause or end a deal subject to existing consumer obligations and notice. MyDancr may suspend a deal for risk or noncompliance. An issued token expires on the server schedule. Terms displayed at selection should be preserved with the redemption record.

Part XI — Draft Dancer Commission and Too Much Media/NATS Settlement Terms

1. Overview

These terms govern rewards for eligible dancers. They do not govern club wages, tips, dancer services, customer purchases, or employment compensation, and they do not create an agent commission program. “Commission Event” means a server-created record that satisfies the applicable policy and attribution rules. “Profile-Originated Verified Redemption” means an allowed Club Deal redemption successfully confirmed by the correct club’s authorized cashier NFC tag where the immutable source captured before token issuance identifies an eligible dancer’s public profile—including a qualifying shift or deal surface presented within that profile—as the customer journey’s origin. “NATS Affiliate Account” means the dancer’s eligible, verified affiliate account on Too Much Media’s NATS platform. “NATS Export” means MyDancer’s transaction or import event transmitting the exact eligible commission amount and reference to that account for settlement.

2. Qualifying dancer event

A dancer reward requires all of the following at confirmation: an allowed active Club Deal; a valid server-issued redemption; successful cashier NFC confirmation at the correct club; nonexpired, nonduplicate, nonfraudulent status; immutable source from the dancer’s public profile, including an eligible shift or deal surface within that profile; complete dancer, club, deal, token, and shift/context attribution where required; and an account not disqualified by sanctions, fraud, or legal restriction.

Views, follows, directions, social clicks, applause, “going,” unverified selections, failed taps, club-page-only redemptions without dancer attribution, screenshots, demo data, or prohibited offers do not qualify.

3. Tiered profile-originated dancer share

The attributed dancer’s share of the applicable MyDancer gross referral fee is determined by the event’s ordinal among that dancer’s qualifying Profile-Originated Verified Redemptions in the commission month:

- **1st–9th qualifying event:** 30% dancer share; 70% retained by MyDancer.
- **10th–24th qualifying event:** 40% dancer share; 60% retained by MyDancer.
- **25th and each later qualifying event:** 50% dancer share; 50% retained by MyDancer.

The commission month is the calendar month determined in the verified club’s configured local timezone. Tiers apply incrementally, not retroactively: an event is priced at the tier reached when the authorized cashier NFC confirmation occurs, and a later tier does not reprice prior events. The gross referral fee is the negotiated fee for the specific Club Deal in its accepted Deal Order, not admission price, deal value, club revenue, tip, or dancer compensation. The event stores the source profile, commission month, ordinal, policy version, 3,000-, 4,000-, or 5,000-basis-point share, gross fee, currency, Deal Order/deal, club, dancer, shift/context, token, cashier confirmation, timestamps, and calculation snapshot.

A future change to a percentage, threshold, commission-month rule, or qualifying source applies only prospectively after clear notice and renewed acceptance where required; it must not silently alter an accrued event.

4. Separate club receivable

The club’s referral-fee obligation and MyDancer’s dancer reward are separate. A weekly club ACH settlement can be pending while the dancer reward is eligible for NATS export. MyDancer may not deny an otherwise valid reward solely because the club has not paid, but may correct or hold an event for fraud, duplication, mistake, reversal, illegality, sanctions, or a genuine attribution dispute.

5. No agent commission under these terms

An introduction, email, demo, account signup, recruiting claim, or club team role does not create an agent commission. MyDancer currently operates no agent commission program. A later program would require a separate counsel-approved agreement, product implementation, event attribution, tax/compliance process, acceptance flow, and publication; it may not be inferred from these dancer terms and may not reduce an accrued dancer commission.

6. Attribution conflicts

The server's contemporaneous records, accepted club order, event timestamps, and administrator audit control attribution. MyDancer may investigate duplicate claims, self-dealing, preexisting accounts, inactive periods, reassignment, and fraud. A payee must dispute a statement within the counsel-approved period and identify the specific event.

7. NATS affiliate onboarding and export

A dancer must establish and maintain an eligible NATS Affiliate Account, complete Too Much Media/NATS identity/KYC, sanctions, tax, payment-account, and account-matching checks, provide the correct NATS account identifier, and authorize the data exchange required for settlement. MyDancer may store the NATS login/account identifier, linkage and verification state, export eligibility, exact exported amount, immutable ledger state, attempt/error/reconciliation state, reversal, and provider transaction/reference but should not store full external account credentials.

MyDancer exports each eligible commission through NATS while NATS is the selected settlement system. A successfully exported event must not also be paid directly by MyDancer. A timeout or ambiguous provider response enters reconciliation-required status rather than being automatically retried and potentially duplicated. If the integration becomes unavailable or legally unsuitable, MyDancer may pause exports and change providers with reasonable notice and a transition plan, subject to accrued-payment duties and applicable law.

8. Statements, export cycle, and settlement timing

The dashboard or statement should distinguish accrued, eligible, waiting for affiliate linkage, pending export, processing, exported, failed, reconciliation required, reversed, held, and canceled status and show available references. The final version must state MyDancer's export frequency and cutoff, Too Much Media/NATS settlement timing, minimum balance, fee allocation, rejected-payment handling, and final settlement. Amounts below the minimum may roll forward only as disclosed and as permitted by law.

COUNSEL · Commission settlement schedule

Approve an attached schedule that matches the signed Too Much Media/NATS configuration and addresses export cutoff, weekends/holidays, provider delay, ambiguous response, KYC failure, inactive or mismatched accounts, death/incapacity, unclaimed property, tax holds, currency conversion, fees, and record disputes.

9. Holds, corrections, reversals, and offsets

MyDancer may place a proportionate hold during a documented investigation of duplicate or fabricated redemptions, tag compromise, account takeover, sanctions, legal process, provider review, material breach, or calculation error. MyDancer will release undisputed amounts when feasible. It may correct a mistake, reverse an invalid event, or offset a documented overpayment as permitted by law and with statement detail.

10. Taxes and classification

Dancers are responsible for taxes, business registration, and professional advice. MyDancer or Too Much Media/NATS may request tax forms, report payments, and withhold where required. A commission does not create employment, club agency, franchise, partnership, or authority to bind MyDancer.

11. No transfer and survival

Commission rights may not be sold, pledged, assigned, or redirected except with written approval or by law. Accrued undisputed obligations and audit/dispute terms survive termination. Fraudulent or illegal events never become payable.

Part XII — Draft Moderation, Reporting, Suspension, and Appeals Policy

1. Scope and principles

MyDancer moderates to protect adults, consent, lawful club promotion, rights, finance integrity, and system safety. Decisions may involve automated tools and trained reviewers. MyDancer prioritizes imminent harm, minors, trafficking, nonconsensual content, credible threats, account takeover, commission/ACH fraud, and tag compromise.

2. Content states

Content and accounts may be draft, checking, pending review, approved, rejected, restricted, disabled, removed, or restored. A prior approval does not prevent later review after a report, model update, rights complaint, changed context, or legal requirement. Pending content is not public and should not count toward approval requirements.

3. Automated review

Automated tools may assess file integrity, nudity/sexual content, age risk, violence, drugs, text, logos, spam, fraud, or duplication. Inputs and outputs should be access-controlled and recorded with provider/model/version where practical. Automated review must not be represented as infallible or as legal approval.

4. User reports

A reporter should identify the target, category, and enough facts to investigate. MyDancer may request clarification but should minimize sensitive evidence. Emergency or criminal conduct should be reported to emergency services or authorities. Knowingly false, retaliatory, or abusive reports may lead to enforcement.

5. Review and action

Reviewers may approve, restrict, remove, request information, disable features, suspend accounts, revoke affiliations/tags, void events, hold commission exports, or escalate. The record should include issue, evidence, rule, action, reviewer, timestamp, notice, and appeal. Access must be least-privilege, especially for identity, intimate media, location, NATS, and ACH data.

6. Notice

When lawful and safe, MyDancer should tell the affected User what was acted on, the general reason/policy, duration, required correction, and appeal method. Notice may be delayed or limited to protect a reporter, investigation, security control, minor, trafficking victim, legal process, or other person.

7. Immediate suspension

MyDancer may act before full review for suspected minors/CSAM, trafficking, nonconsensual intimate imagery, credible violence, account takeover, sanctions, material fraud, tag compromise, legal order, or imminent platform harm. A hold should be no broader or longer than reasonably necessary.

8. Appeals

An eligible User may appeal once within the approved period, identify the decision, explain the mistake, and provide lawful evidence. A reviewer not solely responsible for the original decision should assess material appeals where feasible. MyDancer should communicate outcome and restore access/content when appropriate. Repetitive or abusive appeals may be closed.

9. Club and affiliation disputes

Affiliation disputes should compare club authority, dancer account, verification event, timing, and current relationship. MyDancer may temporarily hide the affiliation without deciding employment rights. A club cannot use MyDancer review to withhold legal wages or retaliate; a dancer cannot require a club to confirm a relationship it disputes.

10. Finance disputes

Commission disputes use immutable redemption, tag, source, club, shift, Deal Order, policy-version, NATS export, and settlement records. MyDancer may separate undisputed amounts. Clubs cannot see private dancer commission-settlement terms; dancers cannot see unrelated club ACH or other dancers' records.

11. Repeat violations and termination

MyDancer may escalate warnings to restriction, suspension, or termination based on severity, pattern, intent, and risk. Copyright repeat-infringer decisions use the DMCA policy. Evasion through a new account is prohibited.

12. Law enforcement and transparency

MyDancer will respond to valid legal process and may make emergency or mandatory reports where required. Requests should be authenticated, scoped, logged, and reviewed. MyDancer may publish aggregate transparency information that does not identify Users.

Part XIII — Draft Data-Retention and Account-Deletion Policy

1. Principles

MyDancr retains personal information only for a documented operational, contractual, security, safety, financial, rights, or legal purpose. Retention is based on record class rather than keeping every account record indefinitely. Access becomes more restricted when a record is no longer active.

2. Proposed retention schedule for counsel approval

- **Authentication and active account:** life of account; security/session metadata for a short rolling period; deletion processing after authenticated request.
- **Public profile fields and ordinary content:** while published plus a short removal/cache period; transformed/storage copies deleted through a verified cleanup job; backups expire on cycle.
- **Rejected uploads:** short appeal and abuse-prevention period; longer restricted hash/decision where necessary to prevent reupload or address safety.
- **Eligibility, authority, and affiliation records:** retain accepted eligibility representations, club-authority decisions, dancer-affiliation events, and any narrowly justified fraud/account-recovery evidence for the shortest approved operational, dispute, or legal period. The current model does not routinely collect age documents, date of birth, selfies, or biometric material.
- **Affiliation and NFC presence:** active relationship plus a limited audit/fraud/dispute period; public status expires promptly.
- **Precise geolocation:** shortest operational/fraud window feasible; retain derived pass/fail, distance, accuracy, and event evidence longer only if necessary.
- **Views, clicks, rankings, and analytics:** rolling product/analytics period, then aggregate or deidentify; delete direct identifiers when no longer needed.
- **Club Deal tokens and attempts:** token life plus fraud/dispute period.
- **Verified redemptions, Deal Orders, weekly statements, ACH, commissions, NATS exports/settlement, and tax records:** statutory accounting/tax period plus open dispute, audit, return/reversal, and legal-hold needs.
- **Too Much Media/NATS references:** affiliate login/account identifier, export reference, status, amount, currency, failure/hold reason, reversal, and reconciliation record through the approved finance/statutory period; never retain the NATS password or unnecessary payment-account credentials. Too Much Media/NATS independently retains regulated KYC and transaction data under its policy.
- **Support and account recovery:** case life plus quality, security, and dispute period; remove unnecessary identity evidence.
- **Reports and moderation:** action/appeal period plus safety, repeat-abuse, and claim-defense needs.
- **DMCA:** statutory, litigation, repeat-infringer, and defense period.
- **Club agreements, Deal Orders, and commission records:** agreement life plus limitation, tax, audit, and dispute period.
- **Administrative and security logs:** risk-based rolling period; longer for material incidents or legal hold.

COUNSEL · Exact periods required

Convert every “short,” “limited,” “rolling,” and “statutory” period above into an approved number of days/years and confirm backup architecture, tax law, limitation periods, DMCA, consent/eligibility evidence, fraud models, and state privacy requirements.

3. Account deletion process

An authenticated User may request deletion in account controls. MyDancr should confirm scope and consequences, stop public display, disable access, delete the authentication user, queue database/storage/provider cleanup, and provide confirmation. A recovery or privacy process is available when the User cannot sign in.

Deletion is not complete merely because a database row cascades. The process must cover storage objects, transformed media, search/cache entries, push identifiers, email lists, provider data where Company controls deletion, and orphan detection. Jobs should be idempotent, logged, retried, and monitored.

4. Exceptions

MyDancr may retain minimum records required for Deal Orders, weekly statements, ACH, commissions, NATS exports/settlement, taxes, fraud/security, returns/reversals, DMCA, reports, consent/release evidence, legal claims, sanctions, and legal holds. Retained data is not used for ordinary promotion and should be segregated or access-restricted.

5. Club and dancer records

Deleting a User account does not delete another legal entity's records or rewrite historical events. A dancer's public profile can be removed while a weekly club statement, verified redemption, dancer commission event, and NATS export retain a pseudonymous or internal reference. A club account deletion does not erase consumer redemption support, an accepted Deal Order, or ACH reconciliation records.

6. Backups and vendors

Backups are protected from ordinary use and expire through the documented cycle. If restored, deletion tombstones or replay jobs prevent deleted data from silently becoming active. Vendor contracts should require deletion/return, security, incident notice, subprocessors, and assistance with rights requests, subject to provider legal retention.

7. Legal holds

Authorized legal personnel may place a scoped hold that suspends ordinary deletion for identified records. Holds should identify matter, owner, scope, start, review, and release. Users may receive a limited response where disclosure of the hold is prohibited.

8. Deidentification and aggregation

Where retention of trends is useful, MyDancr should aggregate or deidentify so information is not reasonably linkable to a person, maintain technical/contractual controls against reidentification, and not present deidentified data as anonymous if linkage remains reasonably possible.

Implementation and attorney handoff checklist

Publication prerequisites

1. Insert legal entity, addresses, effective dates, and contacts in every public document.
2. Register and verify the DMCA agent; calendar renewal; match the public page.
3. Remove retired or unapproved providers from disclosures, configuration, acceptance copy, data maps, and live product dependencies; document that no routine vendor age-verification flow exists in the current no-nudity model.
4. Contract with and configure the exact Too Much Media/NATS entity; verify supported dancer countries/currencies, affiliate onboarding, KYC/tax allocation, fees, reserves, limits, complaints, privacy, export cadence, failure and reconciliation behavior.
5. Keep agent commissions disabled. Treat any future agent program as a separately scoped product and legal launch.
6. Approve the club master agreement, offer-specific Deal Order, and weekly ACH authorization/instructions; display each deal's effective referral fee to the authorized signer.
7. Implement Deal-Order-specific fee snapshots, weekly itemized statements, ACH debit or credit processing, returns/retries, trace references, disputes, and reconciliation before accepting the revised club commercial terms.
8. Implement clickwrap acceptance with document version, timestamp, user/account, IP/user agent as appropriate, and downloadable copy.
9. Separate customer Terms acceptance from Dancer, Club, Media, Club Deal, Account/Club Verification, NATS Commission Settlement, Deal Order, and ACH acceptances/notices.
10. Train club-authority, affiliation, moderation, fraud, and support reviewers; restrict sensitive-record access; test deletion and review outcomes.
11. Apply counsel's direction not to impose proposed §2257/§2257A duties or a separate age-verification vendor under the current no-nudity model; confirm consenting-adult representations, ownership, accepted-content boundaries, releases where required, music rights, and emergency reporting.
12. Confirm every Club Deal category and enforce the alcohol/sexual-service prohibition at database and API boundaries.
13. Validate that only approved affiliated clubs appear for dancer shifts.
14. Validate first-time venue gate and later affiliation flows on real mobile devices.
15. Validate NFC tag types, installation, rotation, compromise, offline/error, duplicate, expiry, and audit flows.
16. Validate immutable dancer-profile source attribution, Deal-Order fee snapshot, the 1–9/10–24/25+ monthly tier boundaries, nonretroactive event pricing, independent club/dancer ledgers, and NATS export/reconciliation with test redemptions and reversals.
17. Finalize the NATS commission-export and settlement schedule, minimum, tax, failure, hold, reversal, fee, and unclaimed-property handling.
18. Map all production providers/subprocessors and execute privacy/security terms.
19. Implement exact retention/deletion jobs and evidence; test storage cleanup and backup restore behavior.
20. Configure marketing consent and opt-out; keep transactional/security notices separate.
21. Adopt incident response, law-enforcement, trafficking/minor, and emergency escalation playbooks.
22. Select the Arizona pilot city/county and complete Arizona state and local adult-entertainment, club, privacy/security, tax, worker/referral, advertising, and ACH review before onboarding pilot clubs.

Acceptance matrix

- **Visitor:** Terms and Privacy notice; no account acceptance, but clear browse/use notice.
- **Customer:** Terms + Privacy; optional notification/marketing consent; Club Deal terms at selection/redemption.

- **Dancer:** affirmative electronic clickwrap acceptance of the Terms + Privacy + Dancer Agreement + Content/Media License + Acceptable Use + Account Eligibility/Club Verification terms + Too Much Media/NATS Commission Settlement terms; no paper or wet-signature contract; renewed clickwrap acceptance for material commission changes. No separate age-verification-provider acceptance is part of the current model.
- **Club owner/authorized signer:** Terms + Privacy + Club Agreement + each offer-specific Deal Order + weekly ACH authorization/instructions + NFC/Deal terms + data/security obligations.
- **Club manager/staff:** Terms + Privacy + Acceptable Use + team-role acknowledgment + NFC handling; no authority to accept owner-only commercial changes unless granted.
- **Agent:** no active role or commission acceptance in this packet; a future program requires a separate launch package.
- **Administrator/support:** workforce confidentiality, access, moderation, security, finance, privacy, incident, DMCA, and acceptable-use policies.

Product counsel test scripts

- Create each account role; confirm copy and acceptance version.
- Complete dancer account-eligibility, truthful-account, profile/media, and initial club-affiliation flows; test incomplete, duplicate, suspicious, wrong-club, revoked, rejected, deleted, and appealed outcomes without invoking a separate age-verification provider, routine ID-document collection, or biometric processing.
- Confirm deleted media stays deleted after reload and is removed from public/storage paths.
- Preview a dancer profile and compare it to the live component, including videos and social links.
- Complete first club verification and a later affiliation change; attempt an unauthorized shift.
- Run dressing-room NFC Working Now start, expiry, cooldown, checkout, revoked tag, and wrong-club cases.
- Publish allowed and prohibited Club Deals; verify API/database enforcement.
- Select from club and dancer contexts; test cashier NFC, expiry, duplicate, screenshot, wrong club, revoked tag, anonymous and signed-in states.
- Reconcile a weekly club statement and ACH payment/return; verify distinct Deal Orders and fee snapshots; test profile-originated tier ordinals 1, 9, 10, 24, and 25, month reset, independent dancer commission, NATS linkage, export success/failure/timeout, reconciliation-required state, KYC hold, reserve, mismatched account, reversal, correction, fee, and statement.
- Confirm no agent account, commission accrual, settlement, or recruiting/downline promise is active.
- Exercise follow, going, favorite, notification opt-out, email classification, account recovery, reports, moderation, appeal, DMCA, deletion, legal hold, and vendor cleanup.

Closing attorney review note

The strongest legal posture will come from keeping product behavior narrower than promotional language: public club discovery, approved adult promotional media, venue-confirmed affiliations, limited schedules, negotiated admission/line-access Club Deals, verified NFC events, transparent referral attribution, weekly club ACH settlement, Too Much Media/NATS dancer-commission settlement, and auditable safety/enforcement. The first planned pilot outside the Las Vegas demo market is Arizona and requires a selected-city/county addendum before launch. Any later messaging, booking, paid content, customer payments, alcohol offers, private-services marketplace, or agent commission program would materially change this packet and should not launch through an informal feature update.

Selected primary authorities and provider materials

Counsel should confirm the applicability, current version, and jurisdictional scope of every authority before publication. This list supports issue spotting; it is not an opinion that any statute necessarily applies.
