Start here: prepare the club

GO Manage venue > Review your prepared venue page

1 Setup | 2 Team | 3 Table QRs | 4 Stickers | 5 Oversight

Your first read: follow these 5 pages in order, then keep your matching one-page cheat sheet handy. Numbered arrows match the actions on each page.

1. Sign in and confirm access. Use your own club account at www.mydancr.com > Sign in. Confirm the club. The owner manages team membership; a manager handles operations. Use Forgot password? or ask the owner if access is missing.

2. Review the venue package. Manage venue > Review your prepared venue page. Check name, location, address, contact details, hours, official logo, Club Deal, guest terms and subscription against the agreement.

3. Preview customer experience. Open the preview. Check the correct location, offer, links and customer presentation.

4. Correct or publish. Need changes? Enter a specific correction of at least 10 characters and press Request changes. When the package is correct, press Approve & make live.

5. Verify publication. Wait for confirmation, then Open live venue page. Check LIVE status and the agreed venue information. An approved venue may be hidden when its active Club Deal is missing.

DONE WHEN The page shows LIVE and the public information matches the agreed package.

IF BLOCKED Hidden venue: check the active deal and saved publication state; request a correction through the club controls or Support. Do not recreate the club.

Earlier owner-supplied app capture. Arrows match numbered steps.

PUBLICATION CONTROLS - TEXT REFERENCE

Review your prepared venue page / Preview customer experience / Need changes? / Request changes / Approve & make live / Open live venue page. A current capture of these controls is unavailable.

FIRST-DAY CHECKLIST

Confirm the club and publication state, invite the right team, check table signs and the dancer sticker, then assign the shift and media-review coverage.

BEFORE FIRST ACCESS

An authorized representative submits the venue request. MyDancr reviews it, completes the agreement and issues a private signup code. Use that code to create the club account. The prepared workspace is private until the venue package is approved.

Full reference: Operations Manual, pp. 3, 5.

Give each teammate the right access

GO Manage venue > Team & activity

1 Setup | 2 Team | 3 Table QRs | 4 Stickers | 5 Oversight

1. Choose the role. Manager handles venue, roster, media reviews, VIP, rides and contacts. Staff has limited operational access. Only the owner manages team membership.

2. Invite team member. Enter Team member email, select Manager or Staff under Access level, then press Invite team member. An existing guest or dancer account can conflict.

3. Finish invitation setup. The recipient follows the private invitation and account-setup steps. If email fails and a secure link is supplied, share it only with that person.

4. Confirm access. Have the recipient verify the club and visible tabs. Check that their membership is active.

5. Remove stale access. Use the role control or Remove when duties change. Use Revoke for an unused invitation that should no longer be accepted.

DONE WHEN Each team member has their own account and only the access their work needs.

IF BLOCKED There is no reviewer-only club role. Assigning a content reviewer as Manager also gives them broader manager permissions.

Earlier owner-supplied app capture. Arrows match numbered steps.

TEAM CONTROLS - TEXT REFERENCE

Manage venue > Team & activity. Team member email / Access level / Invite team member / Revoke / Remove. A current capture of this panel is unavailable.

PERMISSION CHECK

A Manager can also approve media and use VIP, rides, contacts, finance and results. Staff cannot approve media. There is no separate restricted content-reviewer role.

Full reference: Operations Manual, pp. 6.

Prepare table QR signs

GO Manage venue > Support | support@mydancr.com

1. Prepare the table map. List the club location and table numbers. Specify a first and last number for each range, plus any exceptions or separately numbered areas.

2. Check the requested count. Both endpoints count: 201-210 makes 10 tables; 201-211 makes 11. Match the requested signs to the physical tables.

3. Request the batch. Send the club and numbering plan to MyDancr Support. MyDancr creates the codes; tell the team about existing signs so replacements are coordinated.

4. Check the supplied signs. Each sign must show the table number, Powered by MyDancr and www.mydancr.com. Check readability and the full QR image before printing or installation.

5. Match each sign to its table. Open each QR destination and confirm the club and table. Install the matching sign. Report wrong or obsolete codes to Support and remove old physical signs.

DONE WHEN Every installed code opens its intended club/table and matches the printed number.

IF BLOCKED Stop using a sign with the wrong destination. Send Support the club, printed table number and exact issue. Dancers use a separate dressing-room NFC sticker.

First	Last	Count
201	210	10
201	211	11
1	20	20

SIGN CHECKLIST

Table number is correct. QR opens the right club/table. Footer says Powered by MyDancr and www.mydancr.com.

WHO DOES WHAT

The club supplies its table map, checks every sign and installs it. MyDancr Support coordinates creation, replacement and deactivation.

Full reference: Operations Manual, pp. 7.

Check stickers and customer views

GO Dancers & tables > sticker controls | Club dashboard > View internal

1. Confirm the supplied sticker. Check the club, intended dressing-room placement and sticker label with MyDancr Support. Keep the label in the club setup record.

2. Check the installation. Install the assigned sticker in the agreed dressing-room area. Follow the supplied test instructions and verify the intended club before dancers use it.

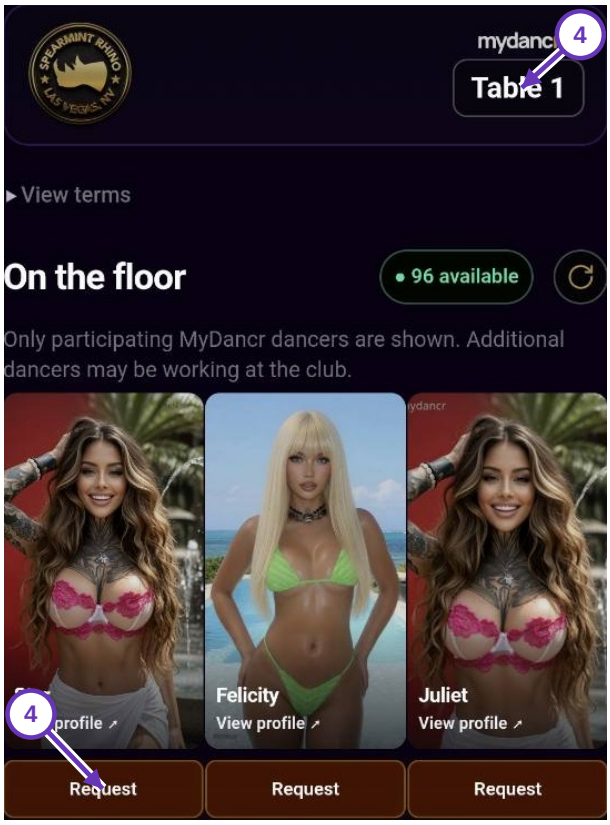

3. Report sticker faults. Use Dancers & tables > sticker controls > Test or Support. Include Issue, Details and the sticker label. Stop using a wrong or damaged tag; Support coordinates replacement and deactivation.

4. Check the internal view. Open View internal or a table QR link. Verify club, table, roster, Request buttons and Powered by MyDancr attribution.

5. Check external and embedded views. Open the live venue page and the actual club website embed. Check location, offer, roster and a dancer profile. Have the website maintainer use the approved embed.

DONE WHEN The sticker and customer links stay in the intended club context.

IF BLOCKED Wrong location or person? Stop using that tag/sign/link and contact Support with its label and destination. Keep private setup and invitation links out of public signs.

Earlier owner-supplied app capture. Arrows match numbered steps.

SURFACE DIFFERENCES

Internal is the club/table roster; external is public discovery; embedded is a club-branded view. Embedded profiles omit follow, share and follower counts. Staff full profiles can retain MyDancr styling.

Full reference: Operations Manual, pp. 8.

Daily oversight and handover

GO Tonight | Manage venue > Notification preferences / Support

1. Open Tonight and refresh. Confirm club identity and freshness. Compare Working now with the floor. Assign Table requests, Guest list, VIP requests and Ride requests to named people.

2. Assign review coverage. Name an owner or manager for Media approvals and their break cover. New-dancer media reaches the club after the NFC tap. Give the reviewer the separate Content Approval onboarding guide.

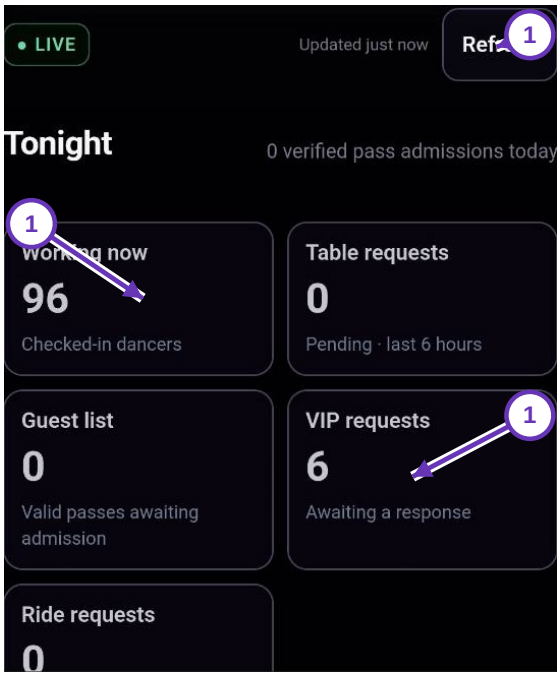

3. Keep alerts reachable. Manage venue > Notification preferences: email starts on by default; prior optional-alert choices still apply. Check categories, mailbox and spam. Enable phone push through the displayed instructions; iPhone may require Add to Home Screen.

4. Coordinate administration. Owners/managers can view finance. Send subscription or deal corrections to MyDancr Support. Only the owner manages team access and club withdrawal; follow the full reference procedure before a consequential change.

5. Verify the handover. Require a reference, actual status, next action and named owner for every unresolved request/review. Keep uncertain media private. Lock or sign out of shared devices.

DONE WHEN The club is ready, each queue has coverage and unresolved work has a named owner.

IF BLOCKED Missing access: owner. Stale queue: Refresh and inspect the existing record before repeating an action. Unsafe live content, account or privacy incident: platform support immediately.

Earlier owner-supplied app capture. Arrows match numbered steps.

ESCALATION RECORD

Club + account/record reference + local time/timezone + exact error + expected result + next owner. Exclude passwords, ID documents and private links.

BEFORE INDEPENDENT USE

Have the trainee find the correct club, locate team and review controls, check one sign destination, and describe an unresolved-item handover. Use read-only navigation or approved training records.

Edition: 21 Oct 2026. Earlier owner-supplied screenshots; new controls without captures use labeled text references. Procedures follow the master manual source baseline 25813c6c0. Recheck after workflow changes.
