Operations manual

A task guide for club admins, talent managers, dancers and content reviewers.

05-08
Club Admin team
Venue publication, team access, table signs and sticker checks.

09-15
Managers & talent
Shift control, roster, table requests, admission, VIP, rides and results.

16-21
Dancers
Onboarding, media, check-ins, visibility, activity and account help.

22-25
Content approval
Review queue, full-file checklist, decisions and release coverage.

Every task follows the same pattern
GO: where to start. Numbered steps: what to do. DONE WHEN: how to verify it. IF BLOCKED: the next action.

Use the right handout. Keep this complete manual with club administrators and managers. Give dancers pages 16-21 and the dancer one-page guide. Manager ranking details are not part of dancer training.

Revision 3 | 20 October 2026. Current written procedures checked against app source. Available app screenshots are earlier owner-supplied captures; new controls without a capture are described as text references. See edition notes on p. 27.

Find the task

GO Select a title to jump to its page.

24 Approve, reject or escalate

25 Review every publishing surface

HELP AND TRAINING

26 Troubleshooting and escalation

27 Training and edition notes

Arrows point to controls. The number matches the corresponding task step. Screenshots are navigation references: displayed names, counts, media and old approval badges are not evidence for a current approval decision.

Three separate controls: approval decides whether content may be published; profile visibility controls whether it is shown; a check-in channel chooses internal, external or both. A change to one does not automatically change the others.

Access and sign-in

GO www.mydancr.com > Sign in

Role	Access
Club owner	Team membership and club participation, plus manager operations.
Manager	Venue, roster, media approval, VIP, rides, contacts, finance and results.
Staff	Limited operations and guest admission/check-in actions; no media approval, VIP, rides or contacts.
Dancer	Own profile, media, check-ins and activity analytics.
Content reviewer	An assigned owner or manager. Reviews media using the club dashboard.

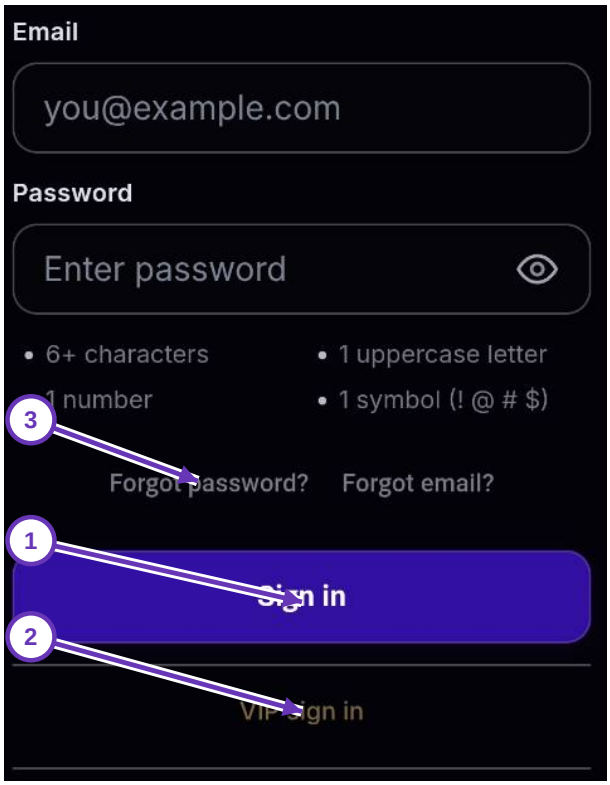

1. Use your own account. Enter the email and password for your dancer or club team account, then press Sign in. Complete any email-confirmation prompt.

2. Check your destination. Confirm the stage name or club before working. VIP guests must use VIP sign in or www.mydancr.com/vip.

3. Recover the original account. Use Forgot password? or Forgot email? if needed. An original-account warning on a shared test phone is an account-recovery issue; do not create another dancer account.

DONE WHEN The correct identity, club and permitted controls are displayed.

IF BLOCKED Club access missing? Ask the owner to check your membership. See the troubleshooting table on p. 26.

Earlier app capture. Arrows match numbered steps.

Alerts and the notification inbox

GO Club: Manage venue | Dancer: Account / Overview

1. Open Notification preferences. Check the optional categories available to your account. Club owners and managers should confirm venue, VIP and support alerts needed for their shift.

2. Check Email. Email starts on by default. Leave it enabled for the alerts you need; an earlier choice to mute optional alerts still applies.

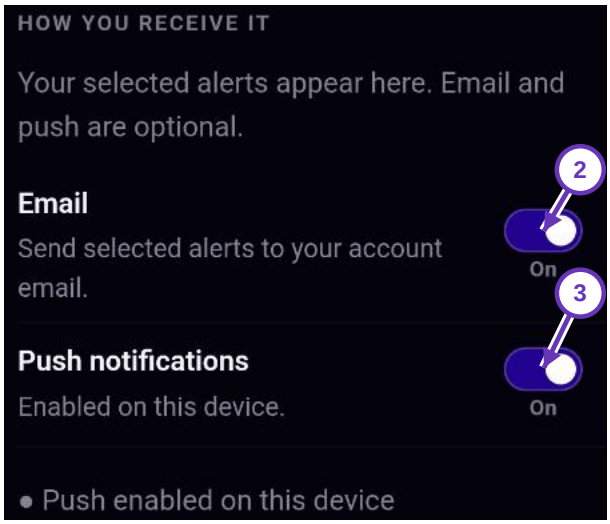

3. Enable phone push. Use Enable notifications and accept the device prompt. On iPhone, follow the displayed Add to Home Screen instructions and open the installed app when required.

4. Check your mail app. Email banners depend on the phone's mail-app settings for your account address. These are separate from website push permission.

5. Act in the operational queue. Mark all read and Clear all affect the inbox only. Return to the table, VIP or ride request to record the real outcome.

DONE WHEN Your mailbox is accessible, preferences match your duties and the device permission is set.

IF BLOCKED No alert? Check email address, spam and device permission; keep watching the dashboard queue meanwhile.

Earlier app capture. Arrows match numbered steps.

ALWAYS DISTINGUISH

Notification read does not mean request completed. Essential account/security messages and operational alerts may be handled separately from optional updates.

Publish and maintain the venue

GO Manage venue > Review your prepared venue page

1. Check the prepared package. Verify the location, name, address, phone, website, hours and official logo. Compare the Club Deal, guest terms and subscription with the agreement.

2. Preview customer experience. Open the preview and check the location, offer, links and customer presentation.

3. Correct or publish. For corrections, enter at least 10 characters under Need changes? and press Request changes. When everything is correct, select Approve & make live.

4. Verify the result. Wait for confirmation, then Open live venue page. The correct venue and approved offer should appear.

5. Maintain the commercial status. Request deal corrections through the club controls or Support. Owners/managers can view finance; contact MyDancr Support for subscription changes.

DONE WHEN The page shows LIVE and the public information matches the agreed package.

IF BLOCKED An approved venue can be hidden without an active Club Deal. Its approval and affiliations remain saved; resolve the deal rather than recreating the club.

OWNER ONLY: LEAVING MYDANCR

Manage venue > Club participation > Remove club from MyDancr. Read the confirmation: this removes club participation, affiliations and check-in access, not dancers' personal accounts or media. Returning requires a new agreement and review.

PUBLICATION CONTROLS

Preview customer experience > Approve & make live. These are source-verified labels; a current screenshot was unavailable.

Invite and manage the team

GO Manage venue > Team & activity

1. Choose the role. Manager handles venue, roster, media reviews, VIP, rides and contacts. Staff has limited operational access. Only the owner manages team membership.

2. Invite team member. Enter Team member email, select Manager or Staff under Access level, then press Invite team member. An existing guest or dancer account can conflict.

3. Finish invitation setup. The recipient follows the private invitation and account-setup steps. If email fails and a secure link is supplied, share it only with that person.

4. Confirm access. Have the recipient verify the club and visible tabs. Check that their membership is active.

5. Remove stale access. Use the role control or Remove when duties change. Use Revoke for an unused invitation that should no longer be accepted.

DONE WHEN Each team member has their own account and only the access their work needs.

IF BLOCKED There is no reviewer-only club role. Assigning a content reviewer as Manager also gives them broader manager permissions.

AT A GLANCE

Owner: team + club operations. Manager: club operations + media approval. Staff: limited operations; no media approval, VIP, rides or contacts.

PRIVATE LINKS

Never place invitation links in public signs, screenshots or shared training handouts.

Request and check table QR signs

GO Manage venue > Support | support@mydancr.com

1. Prepare the table map. List the club location and table numbers. Specify a first and last number for each range, plus any exceptions or separately numbered areas.

2. Check the requested count. Both endpoints count: 201-210 makes 10 tables; 201-211 makes 11. Match the requested signs to the physical tables.

3. Request the batch. Send the club and numbering plan to MyDancr Support. MyDancr creates the codes; tell the team about existing signs so replacements are coordinated.

4. Check the supplied signs. Each sign must show the table number, Powered by MyDancr and www.mydancr.com. Check readability and the full QR image before printing or installation.

5. Match each sign to its table. Open each QR destination and confirm the club and table. Install the matching sign. Report wrong or obsolete codes to Support and remove old physical signs.

DONE WHEN Every installed code opens its intended club/table and matches the printed number.

IF BLOCKED Stop using a sign with the wrong destination. Send Support the club, printed table number and exact issue. Dancers use a separate dressing-room NFC sticker.

First	Last	Count
201	210	10
201	211	11
1	20	20

SIGN CHECKLIST

Table number is correct. QR opens the right club/table. Footer says Powered by MyDancr and www.mydancr.com.

WHO DOES WHAT

The club supplies its table map, checks each sign and installs it. MyDancr Support coordinates creation, replacement and deactivation.

Check stickers and customer views

GO Dancers & tables > sticker controls | Club dashboard > View internal

1. Confirm the supplied sticker. Check the club, intended dressing-room placement and sticker label with MyDancr Support. Keep the label in the club setup record.

2. Check the installation. Install the assigned sticker in the agreed dressing-room area. Follow the supplied test instructions and verify the intended club before dancers use it.

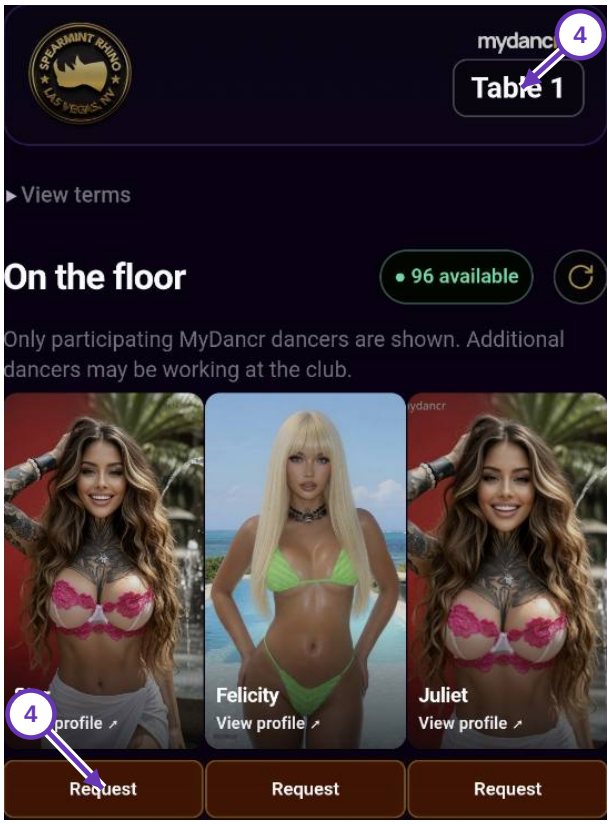

3. Report sticker faults. Use Dancers & tables > sticker controls > Test or Support. Include Issue, Details and the sticker label. Stop using a wrong or damaged tag; Support coordinates replacement and deactivation.

4. Check the internal view. Open View internal or a table QR link. Verify club, table, roster, Request buttons and Powered by MyDancr attribution.

5. Check external and embedded views. Open the live venue page and the actual club website embed. Check location, offer, roster and a dancer profile. Have the website maintainer use the approved embed.

DONE WHEN The sticker and customer links stay in the intended club context.

IF BLOCKED Wrong location or person? Stop using that tag/sign/link and contact Support with its label and destination. Keep private setup and invitation links out of public signs.

Earlier app capture. Arrows match numbered steps.

SURFACE DIFFERENCES

Internal is the club/table roster; external is public discovery; embedded is a club-branded view. Embedded profiles omit follow, share and follower counts. Staff full profiles can retain MyDancr styling.

Open and close the shift

GO Club dashboard > Tonight

1. Confirm the club and freshness. Check venue identity and last update; press Refresh after returning to an old tab.

2. Review the live queues. Check Working now, Table requests, Guest list, VIP requests and Ride requests. Assign a named owner and break cover for each.

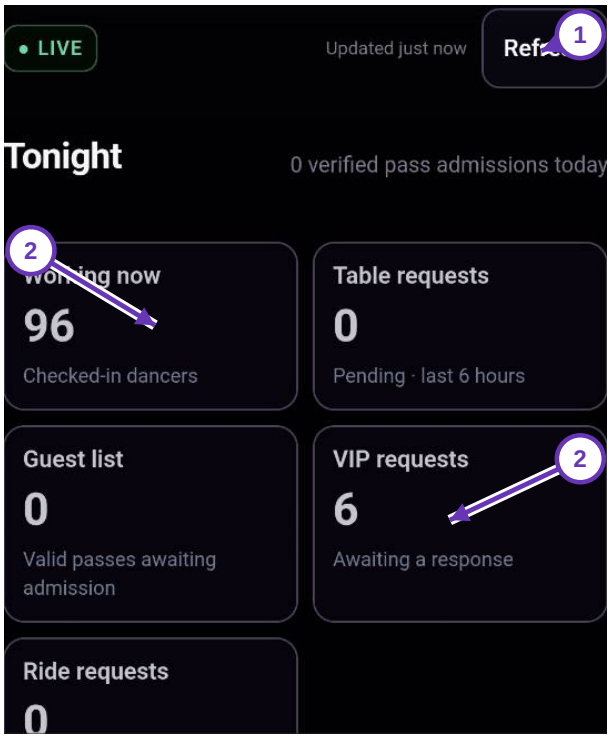

3. Check the roster and review coverage. Compare Working now with the floor. Make sure an owner or manager is handling Media approvals for new or changed uploads.

4. Reconcile before handover. End check-ins for dancers who left. Resolve table outcomes, pending VIP decisions and unconfirmed rides using facts, not assumptions.

5. Hand over unresolved work. Record request/upload references, current status, next action and owner. Leave uncertain media private. Lock or sign out of shared devices.

DONE WHEN The roster is accurate and every open item has a named owner.

IF BLOCKED Sample cards are training data. Clearing notifications or marking unfinished work complete does not constitute a handover.

Earlier app capture. Arrows match numbered steps.

HANDOVER FORMAT

Club / shift time / duty manager; then one line per open record: reference - actual state - next action - owner.

Manage the roster

GO Dancers & tables > affiliated dancers / roster

1. Find the dancer. Use Search dancers, Sort dancers, All affiliated / Working now and the available channel filters.

2. Open the profile. Select the portrait or View profile to confirm the person and approved media.

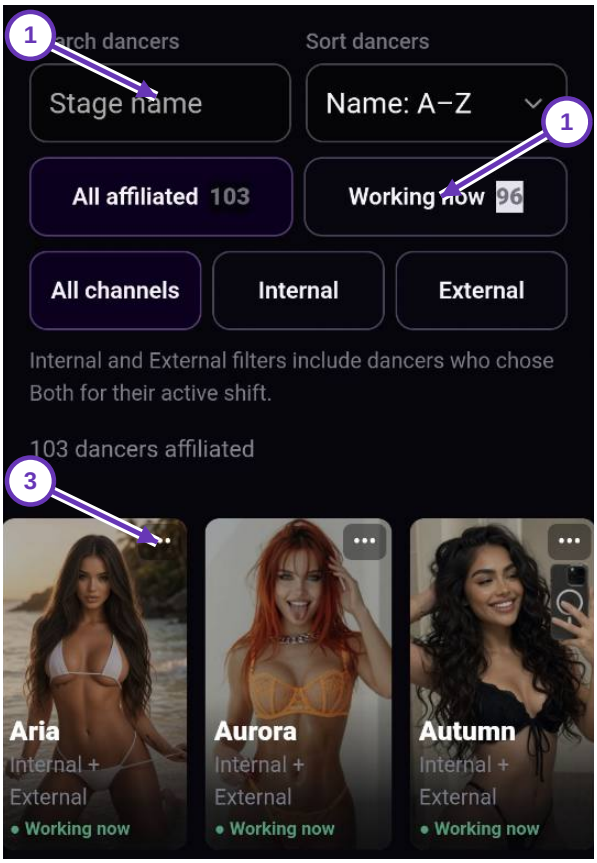

3. End an incorrect check-in. Use the card menu (...) > End check-in when the dancer has left or the active session is wrong.

4. Remove access only when intended. Owners/managers use Remove access for a club-access change, not to end an ordinary shift. Confirm the correct dancer.

5. Permit a future return. Removed dancers > Allow new tap lets the dancer tap again. It does not restore a shift or automatically start one.

DONE WHEN The right person is affiliated and their active state matches the floor.

IF BLOCKED Ending early does not bypass the cooldown. Do not remove/re-add access to force a new shift.

Earlier app capture. Arrows match numbered steps.

TWO SEPARATE STATES

Affiliated = connected to this club. Working now = an active check-in. A dancer can be affiliated without currently working.

Handle table requests

GO Dancers & tables > Table requests

1. Open the right record. Check table and dancer. Portrait opens the full profile; (...) > Request details opens the operational record.

2. Acknowledge. Use Mark seen once the team has received the request. Coordinate with the dancer; operational dancer alerts can also be sent.

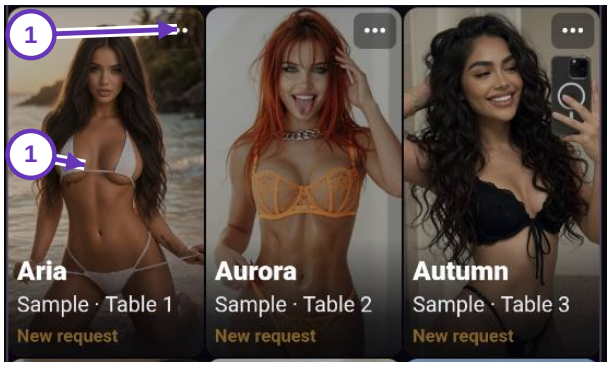

3. Record arrival or non-arrival. Select Mark arrived only when the dancer reaches the table. Otherwise use Didn't arrive at table when that is the actual outcome.

4. Finish or cancel. After arrival and completion, select Complete. Use Dismiss for cancellation under the club's procedure.

5. Verify the state. Wait for the saved update. If the outcome is uncertain, refresh and inspect the same request before repeating an action.

DONE WHEN The status reflects what happened, not what the team hopes will happen.

IF BLOCKED Seen is not arrival; a notification marked read is not a completed request.

Earlier app capture. Arrows match numbered steps.

NORMAL FLOW

Pending > Mark seen > Mark arrived > Complete

OTHER OUTCOMES

Seen > Didn't arrive at table. Dismiss cancels the request.

Scan passes and admit guests

GO Tonight > Guest list > Scan pass

1. Find the visit. Choose Tonight, Choose a date or All active passes. Search and filter Awaiting admission / Admitted / All. Clear filters or Load more if needed.

2. Scan the pass. Open Scan pass, allow camera access if prompted and follow the scanner. Confirm the correct venue and visit.

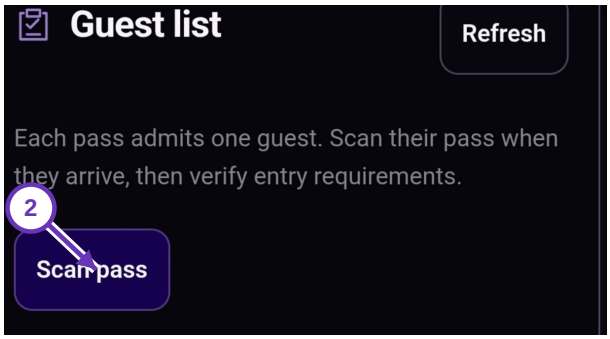

3. Verify eligibility. Check the guest and the displayed admission/arrival rules, including age, capacity, dress code and current offer conditions.

4. Record actual admission. Check the staff verification box, then press Admit guest & redeem pass only when admitting the guest.

5. Read the result. Admission confirmed records one verified visit. Already used must not admit another person; do not treat an unavailable/expired pass as valid.

DONE WHEN The admitted guest has a recorded admission and the pass is not reused.

IF BLOCKED Opening a pass is not redemption. If scanning or validation fails, keep the result for the duty manager; do not invent another entry.

Earlier app capture. Arrows match numbered steps.

WHAT STAFF RECORDS

One pass admits one guest. Guest-list dates and offer hours use the venue's local time.

Manage VIP access and visits

GO Tonight > VIP requests > VIP access

1. Invite the guest. Invite guest > email + optional private nickname > Send invitation. Only the invited email can use the link. Direct the guest to /vip.

2. Maintain VIP access. Invitations: Resend email / New share link replaces the old unused link; Revoke invitation cancels it. VIP guests: search > (...) > nickname or Remove VIP access.

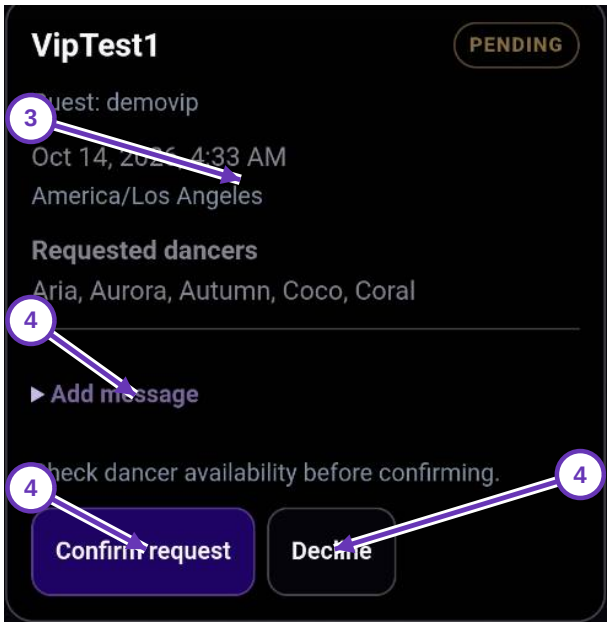

3. Read the request. Requests > Pending requests / All statuses; use Newer / Older requests as needed. Check visit date, time, venue timezone, party and selected dancers.

4. Confirm availability, then respond. Open the dancer profile if needed. Coordinate availability, expand Add message for a guest-facing note, then Confirm request or Decline.

5. Handle a later cancellation. On the confirmed record, use Cancel confirmed request and verify the saved state. Existing requests remain available if VIP access is removed.

DONE WHEN The correct guest has access and each visit has the intended decision.

IF BLOCKED Current VIP dancer selection is limited to Working now at that venue. Selection is interest, not guaranteed availability.

Earlier app capture. Arrows match numbered steps.

PRIVATE INVITATIONS

Links last seven days. Do not publish them. Nicknames are private to club owners/managers.

DIFFERENT RECORDS

A public I'm Going signal, an admission pass and a VIP request do not confirm one another.

Ride requests and shared contacts

GO Tonight > Ride requests / Contacts

1. Find the ride. Show rides filters Open (last 48 hours), All requests, Completed or Cancelled. Use Load older requests or Open pickup inbox if needed.

2. Contact the guest. Check venue, name, pickup point, party size and contact details. Select Call guest or use the supplied email to agree availability and timing.

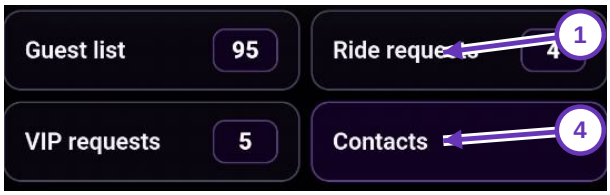

3. Update Ride status. Record Received, Contacted, Arranged, Completed or Cancelled as events occur. Wait for the saved result; coordinate transport with the team.

4. Search shared contacts. Use Contacts > search and the relevant shared group for authorized follow-up. Keep information with the people handling that visit.

5. Hand over unresolved rides. Give the next manager the request reference, actual arrangement and next action. Follow the current club offer and transport terms.

DONE WHEN The guest knows whether a ride is arranged and the status matches the agreement.

IF BLOCKED The public pickup form is not a confirmed ride. Ride status does not verify club admission. The old pickup chat is retired.

Earlier app capture. Arrows match numbered steps.

STAFF-ONLY INFORMATION

Owners/managers handle VIP, rides and shared contacts. Do not send guests to the private pickup inbox or share contact details beyond the permitted purpose.

Read club results

GO Club dashboard > Results

1. Set a fair comparison. Choose Tonight, 7 days, 30 days or All time. Keep the same club and dates when comparing people or periods.

2. Read recorded activity. Review working time, table outcomes, guest-list admissions, VIP demand, customer interest and other available sections.

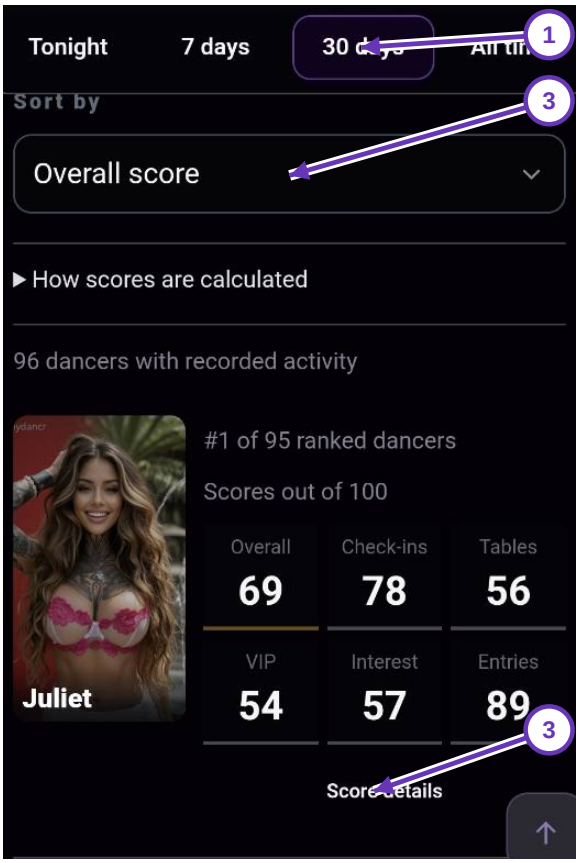

3. Find a dancer. Use search and the Dancer performance sort controls. Open Score details for the manager view.

4. Interpret rank in context. Rank is relative to eligible dancers in that club/period. Ties can share rank. Early data or Not enough data is not a zero-performance judgment.

5. Coach from observable activity. Discuss attendance, responses and actual demand. Dancers retain their own activity analytics; scoring details stay with club management.

DONE WHEN The conclusion uses the right period and is supported by recorded activity.

IF BLOCKED Views, requests and intentions are not earnings or verified attendance. Weighted ordering continues on discovery grids and video feeds.

Earlier app capture. Arrows match numbered steps.

DISTRIBUTION

This page is for club management. Do not include it in dancer onboarding handouts. No weighting formulas are supplied in this guide.

Dancer onboarding

GO Dancer dashboard > onboarding / Profile

1. Save your details. Enter a stage name (2-40 characters), select your city and wait for Saved or Details saved.

2. Add your photos. Submit at least three profile photos in total, including a main photo. The avatar is generated from the main photo; pending uploads count toward the setup form.

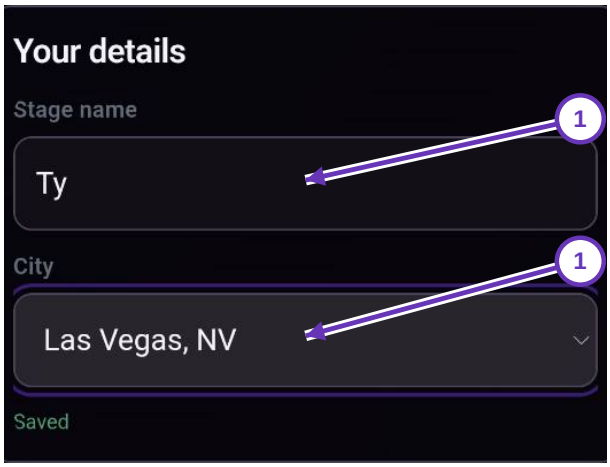

3. Read and accept the agreement. Open the terms, accept the checkbox if you agree and press Continue.

4. Complete Verify 18+ if required. Follow the secure Ondato document/selfie flow using your own identity. Return to MyDancr and check the result. Not required means the step is not required; it does not mean verified.

5. Connect to your club. Tap the physical dressing-room sticker and finish the displayed steps. This connection lets the club review pending media; see p. 19.

DONE WHEN Details are saved and each onboarding requirement shows a clear status.

IF BLOCKED Setup completion does not publish pending content. Identity verification and media approval are separate. Use account support for a stalled or wrong-account state.

Earlier app capture. Arrows match numbered steps.

YOUR FOUR TABS

Overview: working status. Profile: details/media. Results: your activity. Account: preferences/help.

IDENTITY DOCUMENTS

Keep ID documents inside the secure verification flow; do not send copies to ordinary club email or chat.

Main photo and photo uploads

GO Profile > Main photo / Add photos/videos > Photos

1. Choose your main photo. Use the Main photo controls to upload or Choose uploaded photo. Crop photo adjusts the card; check that your face stays visible.

2. Check the automatic avatar. It comes from the main image. Adjust the avatar crop if needed; there is no separate club roster photo to maintain.

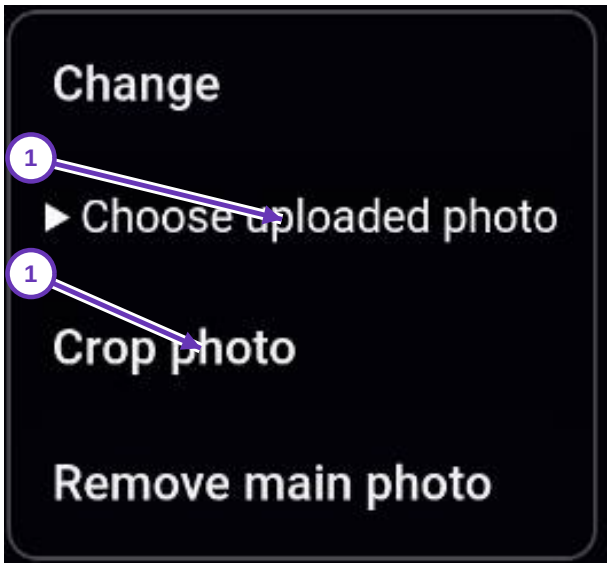

3. Add gallery photos. Select Gallery for one or more files or Camera to take a photo. JPEG, PNG, WebP, HEIC and HEIF are accepted, up to 25 MB each.

4. Wait for transfer and review. A failed transfer can be retried. Processing and pending approval are different states. The club queue receives new-dancer media after the first NFC connection.

5. Organize approved photos. Use (...) for available crop, main-photo, pin or remove actions. Pinning changes your profile gallery order, not shared feed placement. Read rejection notes and replace corrected files.

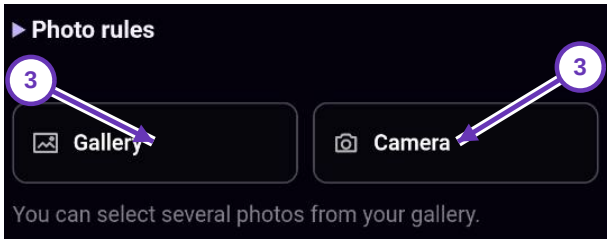

DONE WHEN The main image and avatar match, and each upload has a known review status.

IF BLOCKED The main photo is used for public cards and internal rosters where you are eligible. A saved change is not necessarily approved; the previous approved image may remain during review.

Earlier app capture. Arrows match numbered steps.

PHOTO SOURCE

Earlier app capture. Arrows match numbered steps.

BEFORE UPLOADING

Only you (18+) may appear, including reflections/backgrounds. Follow the coverage and rights rules; no logos, watermarks or contact details. See the full review checklist on p. 23.

Upload videos

GO Profile > Add photos/videos > Videos

1. Check Video rules. Use vertical or square MP4, WebM or MOV, 1-30 seconds long and up to 25 MB.

2. Confirm both permissions. Only you are shown and the video is of you; and you own or may publish all visuals and audio, including music.

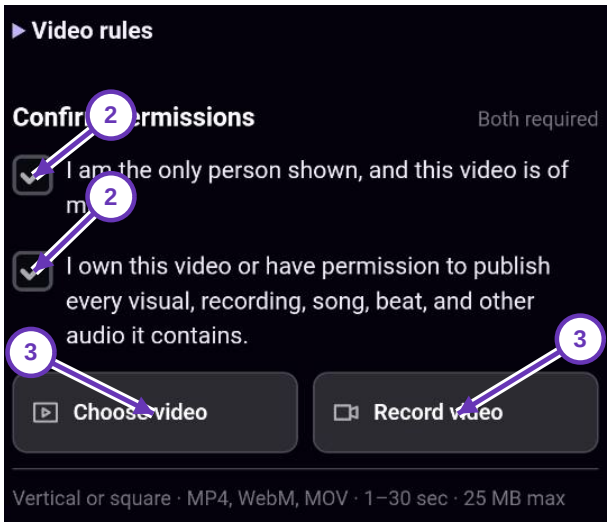

3. Choose or record. Select Choose video or Record video. Use the offered crop/trim controls to meet the format and duration rules.

4. Wait for processing and human review. Keep track of transfer, processing and approval separately. AI checks assist the reviewer; passing them does not publish the file.

5. Verify approved playback. Open your profile Videos tab and play the complete video. Eligible approved videos can also enter MyDancrTV.

DONE WHEN The approved file plays correctly and contains permitted visuals and audio.

IF BLOCKED Music on your phone is not proof of publishing rights. For rejected files, read the correction and submit a compliant replacement.

Earlier app capture. Arrows match numbered steps.

UPLOAD-STATE SHORTCUT

Failed transfer: retry. Processing: wait. Pending approval: club review. Rejected: read reason and correct the file.

Check in and end your shift

GO Dressing-room NFC sticker > Overview > Working Now

1. Tap the physical sticker. Unlock your phone, tap, open the link if prompted and sign in to your dancer account. No particular dashboard page must be open first. Confirm the club.

2. Choose where you appear. Internal only: club roster, with a full-profile link. External only: public discovery. Both: both surfaces, subject to your eligibility and visibility.

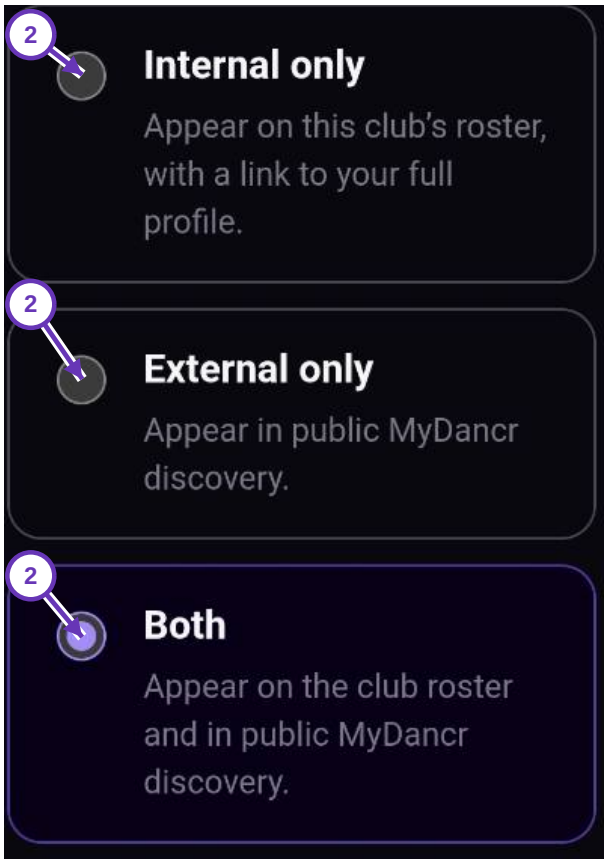

3. Finish the displayed requirements. On the first tap, your club can review pending media. If review is pending, wait, then refresh your onboarding/dashboard status.

4. Check Working Now. Confirm the active club and end time. A check-in lasts up to six hours, followed by a six-hour cooldown across clubs. Retapping does not extend it.

5. End when you leave. Overview > End Working Now > Yes, end now. Choose Keep working if opened by mistake. Ending early does not bypass the cooldown.

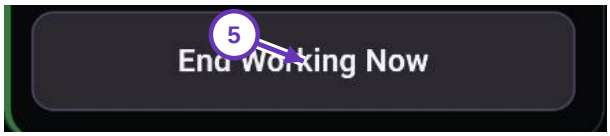

DONE WHEN Working now reflects the correct club and your actual presence.

IF BLOCKED Public profile visibility is separate from check-in. An original-account warning needs account recovery/support, not another account.

Earlier app capture. Arrows match numbered steps.

END SHIFT

Earlier app capture. Arrows match numbered steps.

Visibility and profile sharing

GO Profile > Visibility & sharing

1. Check Profile visibility. Read Public or Incognito before changing anything.

2. Hide temporarily. Go incognito hides your profile and content without deleting the uploads. Wait for the saved status.

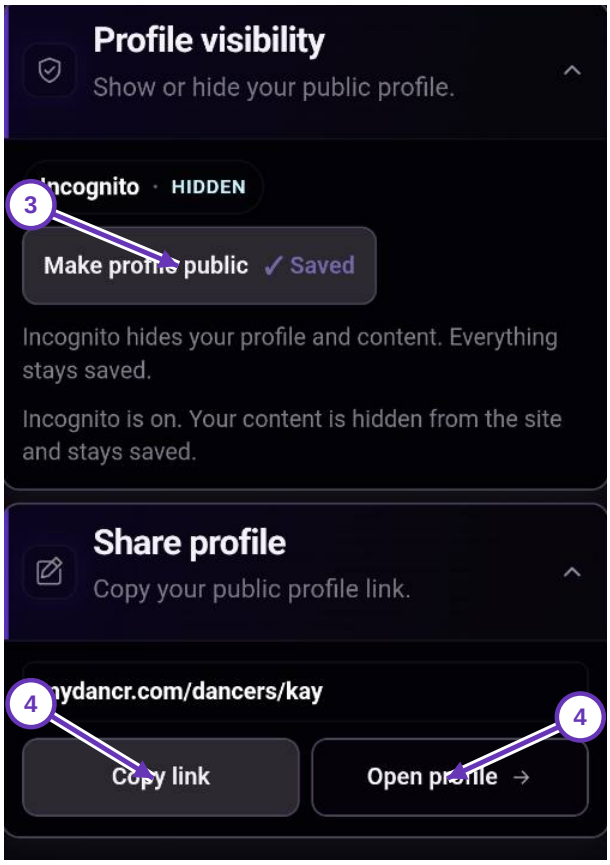

3. Show it again. Make profile public restores visibility subject to approval and account eligibility.

4. Share your profile. Expand Share profile > Copy link, or Open profile to inspect the destination.

5. Check the destination. Confirm your stage name, main photo and approved media before sharing. A copied link does not bypass incognito or approval restrictions.

DONE WHEN The saved visibility matches your intention and the copied URL is yours.

IF BLOCKED Internal only is a check-in channel. Incognito is a profile-visibility control. They are not interchangeable.

Earlier app capture. Arrows match numbered steps.

Your results and account help

GO Results | Account

1. Choose the period and club. Use This shift, 7 days, 30 days or All time and the club selector. Confirm the filters before comparing.

2. Read demand and outcomes. Review table requests, VIP requests, returning VIP requesters and verified entries. Request details separates available sources/outcomes.

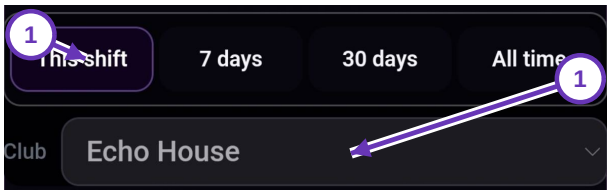

3. Read your activity. Review shifts/hours, followers, profile views, likes, video views, trends and top content. Active sessions may not yet appear in completed-session totals.

4. Keep your account reachable. Use Account for preferences and help; see p. 4 for email/push. Use Forgot password? or Forgot email? to recover access.

5. Report a discrepancy. Include club, selected dates, expected activity and exact message. Use the support format on p. 26; never include passwords or ID files.

DONE WHEN You know the period, source and meaning of the figures you are reading.

IF BLOCKED Requests and I'm Going are interest signals. They do not establish attendance, a booking or earnings.

Earlier app capture. Arrows match numbered steps.

GET HELP FROM THE RIGHT PERSON

Transfer/file problem: retry or correct. Pending media: club reviewer. Account/identity issue: account support. Missing recorded club activity: duty manager, then support.

Open the approval queue

GO Dancers & tables > Media approvals

1. Confirm your access. Use an owner or manager account for the right club. Staff cannot approve media; reviewer responsibility does not create a separate restricted role.

2. Refresh the queue. Select Refresh. New dancers join the club queue after their NFC tap. Check the count and use Previous / Next to work all pages (12 items per page).

3. Identify the exact item. Read stage name and the Photo, Main photo, Avatar or Video label. Check the actual preview/version, not a previous upload.

4. Read AI findings. Check running, passed, flagged or manual-review status. Expand AI findings when present. Passing AI is not human approval or proof of identity/rights.

5. Review, then decide. Apply p. 23 to the full image/video. Use the decision guide on p. 24. Never approve missing previews or unfinished processing.

DONE WHEN You can inspect the correct item and understand any automated findings.

IF BLOCKED Disabled approval is not a control to work around. If a preview cannot be inspected, leave it private and follow p. 26.

Earlier app capture. Arrows match numbered steps.

CURRENT CONTROLS - TEXT REFERENCE

Media approvals / Refresh / AI findings / Review note / Approve / Reject / Previous / Next. Current queue screenshots remain unavailable in this edition.

AFTER A DECISION

Wait for the success message and removal from the pending queue. Returning to the first page is normal. An uncertain save requires Refresh before another action.

Photo and video review checklist

GO Use on every photo, main image, avatar and video

1. Inspect the complete asset. Photo: whole frame plus final crop. Avatar: face visible. Video: play every scene with audio from beginning to end; do not approve from its thumbnail.

2. Check people and coverage. Only the uploader, age 18+, may appear, including in backgrounds/reflections. Apply the coverage rules below.

3. Check text, objects and audio. Look for brands, logos, watermarks, contact details, solicitation and other prohibited content. Listen to the complete audio.

4. Check rights and technical readiness. The uploader must own or have permission for all visuals/audio. Review AI findings. Do not override a technical block or guess about identity or rights.

Check	Approval standard
People	Uploader only, 18+. No other people or minors, including reflections/backgrounds.
Coverage	Bikinis, opaque lingerie, thongs and cleavage may be allowed. Cover nipples, areolas, genitals and anus. Thong-exposed buttocks may be allowed. No sex acts or masturbation.
Branding / contacts	No visible brands, logos or watermarks; no phone, email, social/payment handles or QR codes anywhere.
Conduct	No sexual solicitation, drug use/sales, graphic violence, weapon threats, self-harm, hate, harassment, threats, coercion, nonconsensual content or deceptive impersonation.
Rights / format	Own or have permission for all visuals and audio. Video: vertical/square MP4, WebM or MOV; 1-30 seconds; up to 25 MB. Do not bypass failed technical checks.

DONE WHEN Every checklist category has been inspected before a publishing decision.

IF BLOCKED Any uncertainty about people, age, consent, ownership or inspectability: keep the file private and escalate. AI findings are evidence to review, not a substitute for the checklist.

Approve, reject or escalate

GO Media approvals > Review note > decision

1. Choose the outcome. Escalate means leave the item private and contact the responsible team. It is not a dedicated queue button.

Decision	Use when	Action
APPROVE	All checks passed by the human reviewer; complete preview inspected; no unresolved issue.	Press **Approve** when enabled.
REJECT	A clear rule violation or correction is identified.	Write a specific **Review note**, then **Reject**.
ESCALATE	Missing preview, processing, uncertain age/identity/consent/rights, suspected abuse, or a changed upload.	Leave private. Contact the club lead/platform team. Refresh after the issue is resolved.

Write a correction the dancer can act on

> "Another person appears in the mirror. Replace this with a photo showing only you."
>
> "A visible logo appears on the clothing. Replace or edit the file so no logo remains."
>
> "Your payment handle appears at 00:07. Remove it and submit a corrected video."

A rejection note needs at least 3 characters (maximum 4,000). Avoid vague notes such as "bad photo" or unsupported allegations.

2. Save once and verify. After Approve or Reject, wait for confirmation and removal from the pending queue. If the upload changed or the result is uncertain, Refresh and inspect the current version.

3. Review replacements anew. A corrected file is a new review. Inspect the replacement itself; do not approve solely because the previous note was addressed.

4. Check the release. After approval, inspect the eligible profile/internal/public surface. If still hidden, check remaining enrollment, verification, visibility and channel requirements.

DONE WHEN The saved outcome matches the exact file inspected, and unresolved content stays private.

IF BLOCKED One approval can release an asset across eligible internal, external and TV surfaces. It does not override profile eligibility.

Review every publishing surface

GO Release checklist beyond the media queue

1. Dancer media. New photos/videos require human approval, including main images and avatars. Existing approved assets are not automatically re-queued; audit them when a historical review is required.

2. Profile text. Stage name and city save in the profile workspace. Do not assume a separate human queue blocks every edit. Inspect live details and report misleading or prohibited text.

3. Social links. Send link-review questions to MyDancr Support. Include the dancer and link reference; club media approval does not approve a social link.

4. Venue pages and branding. Review the official package and deal terms before publication (p. 5). Venue logos/covers have separate processing rules; the dancer-media queue does not govern every branding edit.

5. Live internal, external and TV views. After a release, check the correct person and approved content. Report unsafe live content to MyDancr Support for the applicable removal/restriction action.

DONE WHEN Each content type has a review owner and a verified release path.

IF BLOCKED This operating policy does not create a product-wide technical hold on every text or branding edit. Do not tell staff that all changes share the same approval gate.

RELEASE CHECK

Correct club/person > correct approved version > intended visibility/channel > working media/links > no prohibited content.

KEEP AN AUDIT REFERENCE

Record club, dancer/asset reference, decision, reason when needed, reviewer and time under your team procedure. Avoid duplicating sensitive source media in ordinary messages.

Troubleshooting and escalation

GO Account / Manage venue > Support | support@mydancr.com

Problem	Next action
Wrong dashboard / account warning	Confirm email and role. VIP uses /vip. Recover the original dancer account. Club membership problems go to the owner.
Failed upload transfer	Use the retry control; check format/size and connection. Do not repeatedly resubmit a processing file.
Processing / no preview	Wait, then Refresh. Reviewer leaves the item private; escalate a persistent failure.
Pending / rejected media	Pending: confirm the first NFC connection and club reviewer. Rejected: read the reason and correct the file.
Approved but not visible	Check enrollment, required verification, profile visibility and check-in channel. Then inspect the eligible destination.
Stale queue / uncertain save	Refresh the relevant panel and inspect the existing record before repeating the action. Check club/date/filters.
Missing alert	Check account mailbox, spam, optional preferences and device permission. Continue using the dashboard queue.
Wrong QR / sticker destination	Stop using the affected sign/tag; record club, label, physical placement and destination for the administrator.

Send a useful support report
Role + club + account/record reference + local time/timezone + device/browser + expected result + exact result/error + safely cropped screenshot. Exclude passwords, ID documents and private invitation/programming links.

DONE WHEN One owner has the record reference, a factual problem description and the next action.

IF BLOCKED Escalate suspected unauthorized access, unsafe live content or a privacy incident immediately. Do not circulate the sensitive material.

Training and edition notes

GO Use the matching one-page guide during onboarding.

Before independent use, have the trainee demonstrate:

- ☐ Correct account, club and sign-in route; recovery without a duplicate account.
- ☐ Their role's main task, followed by checking the saved outcome.
- ☐ The difference between a notification, request, arrival and completed task.
- ☐ Who handles failed transfers, pending media and account/identity problems.
- ☐ A safe support report and sign-out from a shared device.

Demonstrate read-only navigation or use approved training records. Do not publish real content, send an invitation or record an admission merely for practice.

Trainee: _____ Role: _____

Date: _____ Follow-up: _____

Edition and maintenance

Revision 3, 20 October 2026. Written procedures were checked against the current workspace implementation, including club access, venue publication, QR/sticker management, live request queues, dancer onboarding and the human media-review flow. Application source baseline: abb9f3585.

The browser connection was unavailable. This edition therefore uses real owner-supplied screenshots with tighter crops and annotated arrows; it does not claim fresh captures of the new approval queue. Current queue controls are a labeled text reference on p. 22.

After a release, recheck permissions, approval rules, button labels, upload limits and check-in behavior. Replace earlier captures with current ones when available. Production configuration, including required age verification, can vary; follow the current account status.

This manual documents behavior and operating routines. It does not change permissions, approve content or replace the club's admission, privacy and incident procedures.
