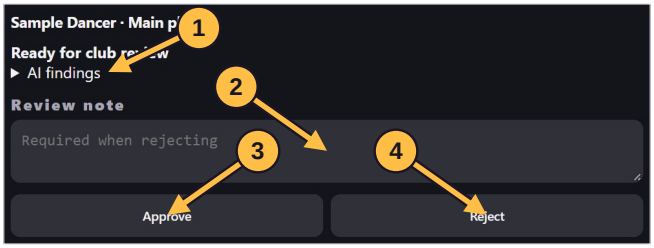
Content Approval Manager

Use assigned club owner/manager access. Confirm club, item identity, current version, rights and every intended destination.



Open queue	Dancers & tables > Media approvals > Refresh. New dancers enter after their eligible NFC tap; use Previous/Next as needed.
Inspect	Full photo; entire video with audio. Read AI findings. Check only adult account holder, coverage, prohibited content and rights.
Decide	Approve only the inspected revision. Reject requires Review note: explain the issue and correction. Wait for save confirmation.
Changed item	On stale/conflict error, refresh and inspect the current version. A replacement always needs fresh review.
Other content	Hold text, logos, offers and website changes as drafts until recorded sign-off; the app has no universal technical gate.
Verify release	Check internal profile, public profile/club, actual external embed and TV as applicable. Approval and visibility are separate.
Incident	Stop further release; record URL/version/time; use authorized hide/remove or escalate to MyDancr; verify every affected destination.

Remember. No preview or processing still active: do not approve. Missing sign-off: do not publish. AI findings assist the human decision.

Ready for the role. Can find a pending item, explain approval scope, write a useful rejection, record release sign-off and verify all destinations.

Help: duty manager for shift issues; club reviewer for media; owner for access. MyDancr: support@mydancr.com | Current guides: www.mydancr.com/guides
